Research indicates that the success of our highly-praised FCSS_SASE_AD-25 test questions owes to our endless efforts for the easily operated practice system. Most feedback received from our candidates tell the truth that our FCSS_SASE_AD-25 guide torrent implement good practices, systems as well as strengthen our ability to launch newer and more competitive products. Accompanying with our FCSS_SASE_AD-25 Exam Dumps, we educate our candidates with less complicated Q&A but more essential information, which in a way makes you acquire more knowledge and enhance your self-cultivation to pass the FCSS_SASE_AD-25 exam.

Fortinet FCSS_SASE_AD-25 Exam Syllabus Topics:

Topic	Details

Topic 1	• Advanced FortiSASE Solutions: This section of the exam measures the expertise of Solution Architects and validates the ability to work with advanced FortiSASE features. It covers deployment of SD-WAN using FortiSASE, implementation of Zero Trust Network Access (ZTNA), and the overall role of FortiSASE in optimizing enterprise connectivity. The section highlights how these advanced solutions improve flexibility, enforce zero-trust principles, and extend security controls across distributed networks and cloud systems.
Topic 2	• Analytics and Monitoring: This section of the exam measures the skills of Security Analysts and emphasizes the monitoring and reporting aspects of FortiSASE. Candidates are expected to configure dashboards, logging settings, and analyze reports for user traffic and security issues. Additionally, they must use FortiSASE logs to identify potential threats and provide insights into incidents or abnormal behavior. The focus is on leveraging analytics for operational visibility and strengthening the organization's security posture.
Topic 3	• SASE Deployment: This section of the exam measures the knowledge of Implementation Consultants and focuses on the practical aspects of deploying FortiSASE. Candidates will explore user onboarding methods, configuration of administration settings, and the application of security posture checks with compliance rules. The exam also includes key functions such as SIA, SSA, and SPA, alongside the design of security profiles that perform effective content inspection. By combining these tasks, learners demonstrate readiness to roll out secure and scalable deployments.
Topic 4	• SASE Architecture and Components: This section of the exam measures the skills of Network Engineers and introduces the fundamentals of SASE within enterprise environments. Candidates are expected to understand the SASE architecture, identify FortiSASE components, and build deployment cases for real-world scenarios. The content emphasizes how SASE can be integrated into a hybrid network, showcasing secure design principles and the use of FortiSASE capabilities to support business and security objectives.

100% Pass 2026 Fortinet FCSS_SASE_AD-25: FCSS - FortiSASE 25 Administrator –Valid Dump Torrent

Nowadays everyone is interested in the field of Fortinet because it is growing rapidly day by day. The FCSS_SASE_AD-25 credential is designed to validate the expertise of candidates. But most of the students are confused about the right preparation material for Fortinet FCSS_SASE_AD-25 Exam Dumps and they couldn't find real FCSS - FortiSASE 25 Administrator (FCSS_SASE_AD-25) exam questions so that they can pass FCSS_SASE_AD-25 certification exam in a short time with good grades.

Fortinet FCSS - FortiSASE 25 Administrator Sample Questions (Q37-Q42):

NEW QUESTION # 37
Refer to the exhibits.

A FortiSASE administrator is trying to configure FortiSASE as a spoke to a FortiGate hub. The VPN tunnel does not establish Based on the provided configuration, what configuration needs to be modified to bring the tunnel up?

- A. The BGP router ID needs to match on the hub and FortiSASE.
- B. The hub needs IKEv2 enabled in the IPsec phase 1 settings.
- C. FortiSASE spoke devices do not support mode config.
- D. NAT needs to be enabled in the Spoke-to-Hub firewall policy.

Answer: B

NEW QUESTION # 38
Which statement applies to a single sign-on (SSO) deployment on FortiSASE?

- A. SSO users can be imported into FortiSASE and added to user groups.
- B. SSO is recommended only for agent-based deployments.
- C. SSO identity providers can be integrated using public and private access types.
- D. SSO overrides any other previously configured user authentication.

Answer: D

NEW QUESTION # 39
A customer needs to implement device posture checks for their remote endpoints while accessing the protected server. They also want the TCP traffic between the remote endpoints and the protected servers to be processed by FortiGate.
In this scenario, which three setups will achieve the above requirements? (Choose three.)

- A. Sync ZTNA tags from FortiSASE to FortiGate.
- B. Configure FortiGate as a zero trust network access (ZTNA) access proxy.
- C. Configure ZTNA servers and ZTNA policies on FortiGate.
- D. Configure ZTNA tags on FortiGate.
- E. Configure private access policies on FortiSASE with ZTNA.

Answer: B,C,D

Explanation:
To meet the requirements of implementing device posture checks for remote endpoints and ensuring that TCP traffic between the endpoints and protected servers is processed by FortiGate, the following three setups are necessary:
Configure ZTNA tags on FortiGate (Option A):
ZTNA (Zero Trust Network Access) tags are used to define access control policies based on the security posture of devices. By configuring ZTNA tags on FortiGate, administrators can enforce granular access controls, ensuring that only compliant devices can access protected resources.
Configure FortiGate as a zero trust network access (ZTNA) access proxy (Option B):
FortiGate can act as a ZTNA access proxy, which allows it to mediate and secure connections between remote endpoints and protected servers. This setup ensures that all TCP traffic passes through FortiGate, enabling inspection and enforcement of security policies.
Configure ZTNA servers and ZTNA policies on FortiGate (Option C):
To enable ZTNA functionality, administrators must define ZTNA servers (the protected resources) and create ZTNA policies on FortiGate. These policies determine how traffic is routed, inspected, and controlled based on device posture and user identity.
Here's why the other options are incorrect:
D . Configure private access policies on FortiSASE with ZTNA: While FortiSASE supports ZTNA, the requirement specifies that TCP traffic must be processed by FortiGate. Configuring private access policies on FortiSASE would route traffic through FortiSASE instead of FortiGate, which does not meet the stated requirements.
E . Sync ZTNA tags from FortiSASE to FortiGate: Synchronizing ZTNA tags is unnecessary in this scenario because the focus is on FortiGate processing the traffic. The tags can be directly configured on FortiGate without involving FortiSASE.
Fortinet FCSS FortiSASE Documentation - Zero Trust Network Access (ZTNA) Deployment FortiGate Administration Guide - ZTNA Configuration

NEW QUESTION # 40
When configuring FortiSASE administration settings, which option is critical for ensuring compliance with data protection regulations?

- A. Setting up geographic restrictions
- B. Limiting the number of user sessions
- C. Enabling file sharing
- D. Disabling encryption

Answer: A

NEW QUESTION # 41
When viewing the daily summary report generated by FortiSASE. the administrator notices that the report contains very little dat a.
What is a possible explanation for this almost empty report?

- A. Digital experience monitoring is not configured.
- B. Log allowed traffic is set to Security Events for all policies.
- C. There are no security profile group applied to all policies.
- D. The web filter security profile is not set to Monitor

Answer: B

Explanation:
If the daily summary report generated by FortiSASE contains very little data, one possible explanation is that the "Log allowed traffic" setting is configured to log only "Security Events" for all policies. This configuration limits the amount of data logged, as it only includes security events and excludes normal allowed traffic.
Log Allowed Traffic Setting:
The "Log allowed traffic" setting determines which types of traffic are logged.
When set to "Security Events," only traffic that triggers a security event (such as a threat detection or policy violation) is logged.
Impact on Report Data:
If the log setting excludes regular allowed traffic, the amount of data captured and reported is significantly reduced.
This results in reports with minimal data, as only security-related events are included.
FortiOS 7.2 Administration Guide: Provides details on configuring logging settings for traffic policies.
FortiSASE 23.2 Documentation: Explains the impact of logging configurations on report generation and data visibility.

NEW QUESTION # 42

......

The operation of our FCSS_SASE_AD-25 exam torrent is very flexible and smooth. Once you enter the interface and begin your practice on our windows software. You will easily find there are many useful small buttons to assist your learning. The correct answer of the FCSS_SASE_AD-25 exam torrent is below every question, which helps you check your answers. We have checked all our answers. You just need to wait a few seconds before knowing your scores. The scores are calculated by every question of the FCSS_SASE_AD-25 Exam guides you have done. So the final results will display how many questions you have answered correctly and mistakenly. You even can directly know the score of every question, which is convenient for you to know the current learning condition.
