Reliable FCP_FAZ_AN-7.6 Test Book - FCP_FAZ_AN-7.6 Exam Quizzes

Exam4Docs has been going through all ups and downs tested by the market, and now our FCP_FAZ_AN-7.6 exam questions have become perfectly professional. We never circumvent the difficulties of our FCP_FAZ_AN-7.6 study materials happened on the road as long as there is bright at the end, and it is the satisfactory results you want. And we have helped so many of our customers achieve their certifications according to our FCP_FAZ_AN-7.6 learning guide.

Fortinet FCP - FortiAnalyzer 7.6 Analyst Sample Questions (Q41-Q46):

NEW QUESTION # 41

Which statement about the FortiSIEM management extension is correct?

- A. It can be installed as a dedicated VM.
- B. Its use of the available disk space is capped at 50%.
- C. It allows you to manage the entire life cycle of a threat or breach.
- D. It requires a licensed FortiSIEM supervisor.

Answer: D

NEW QUESTION # 42

Exhibit.

What does the data point at 12:00 indicate?

- A. The performance of FortiAnalyzer is below the baseline.
- B. The sqiplugind service is caught up with the logs
- C. The log insert log time is increasing.
- D. FortiAnalyzer is using its cache to avoid dropping logs.

Answer: C

NEW QUESTION # 43

An administrator on your team has configured multiple reports to run periodically. Management has an additional request that all new generated reports be sent to a company email inbox for accessibility. The mail server has already been configured on FortiAnalyzer. Which item must configure on FortiAnalyzer so that emails are sent when the reports are generated?

- A. Enable an output profile on the reports.
- B. Add a mailto:<email address> option within the report layouts.
- C. Enable the option to email all reports under the mail server.
- D. Enable email notification under the report calendar.

Answer: A

Explanation:

To ensure that reports generated by FortiAnalyzer are automatically sent to an email inbox, you need to set up an output profile for the reports. Output profiles specify where and how reports should be delivered, including the option to send them via email.

Option D - Enable an Output Profile on the Reports:

An output profile can be configured on FortiAnalyzer to define delivery options, including emailing the report to specified recipients. This setup ensures that every time a report is generated according to the schedule, it is automatically emailed to the configured address.

NEW QUESTION # 44

Exhibit.

The screenshot shows a FortiAnalyzer interface with a table of disk quota information. The table has columns for 'Dataset Name', 'Type', 'Allocated', 'Used', 'Quota', 'Status', and 'Last Update'. The data is as follows:

Dataset Name	Type	Allocated	Used	Quota	Status	Last Update
ADOM1	Log	3.00 GB	2.00 GB	4.00 GB	OK	2023-08-22 10:00:00
FGT_B	Log	3.00 GB	2.00 GB	4.00 GB	OK	2023-08-22 10:00:00
FGT_A	Log	3.00 GB	2.00 GB	4.00 GB	OK	2023-08-22 10:00:00
Quarantine	Log	3.00 GB	2.00 GB	4.00 GB	OK	2023-08-22 10:00:00

What can you conclude from this output?

- A. The allocated disk quota to ADOM1 is 3 GB.
- B. Archive logs are using more space than analytic logs.
- C. FGT_B is the Security Fabric root.**
- D. There is not disk quota allocated to quarantining files.

Answer: C

NEW QUESTION # 45

After a generated a report, you notice the information you were expecting to see in not included in it. However, you confirm that the logs are there:

Which two actions should you perform? (Choose two.)

- A. Check the time frame covered by the report.**
- B. Disable auto-cache.
- C. Test the dataset.**
- D. Increase the report utilization quota.

Answer: A,C

Explanation:

When a generated report does not include the expected information despite the logs being present, there are several factors to check to ensure accurate data representation in the report.

* Option A - Check the Time Frame Covered by the Report:

* Reports are generated based on a specified time frame. If the time frame does not encompass the period when the relevant logs were collected, those logs will not appear in the report. Ensuring the time frame is correctly set to cover the intended logs is crucial for accurate report content.

* Conclusion: Correct.

* Option B - Disable Auto-Cache:

* Auto-cache is a feature in FortiAnalyzer that helps optimize report generation by using cached data for frequently used datasets. Disabling auto-cache is generally not necessary unless there is an issue with outdated data being used. In most cases, it does not directly impact whether certain logs are included in a report.

* Conclusion: Incorrect.

* Option C - Increase the Report Utilization Quota:

* The report utilization quota controls the resource limits for generating reports. While insufficient quota might prevent a report from generating or completing, it does not typically cause specific log entries to be missing. Therefore, this option is not directly relevant to missing data within the report.

* Conclusion: Incorrect.

* Option D - Test the Dataset:

* Datasets in FortiAnalyzer define which logs and fields are pulled into the report. If a dataset is misconfigured, it could exclude certain logs. Testing the dataset helps verify that the correct data is being pulled and that all required logs are included in the report parameters.

* Conclusion: Correct.

Conclusion:

* Correct Answer: A. Check the time frame covered by the report and D. Test the dataset.

* These actions directly address the issues that could cause missing information in a report when logs are available but not displayed.
