Top Rated Features of Cisco 100-160 Practice Test Questions. The ActualPDF is committed to making the Cisco 100-160 exam preparation journey simple, smart, and swift. To meet this objective the ActualPDF is offering 100-160 practice test questions with top-rated features. These features are updated and real Cisco 100-160 Exam Questions, availability of Cisco Certified Support Technician (CCST) Cybersecurity 100-160 exam real questions in three easy-to-use and compatible formats, three months free updated Cisco 100-160 exam questions download facility, affordable price and 100 percent Cisco Certified Support Technician (CCST) Cybersecurity 100-160 exam passing money back guarantee.

Cisco 100-160 Exam Syllabus Topics:

| Topic | Details |
|---------|--|
| Topic 1 | <ul style="list-style-type: none">Incident Handling: This section of the exam measures the skills of an Incident Responder and centers on recognizing security incidents, responding appropriately, and containing threats—forming the essential foundation of incident response procedures. |
| Topic 2 | <ul style="list-style-type: none">Basic Network Security Concepts: This section of the exam measures the skills of a Network Defender and focuses on understanding network-level protections, including firewalls, VPNs, and intrusion detectionprevention systems, providing insight into how threats are mitigated within network environments. |
| Topic 3 | <ul style="list-style-type: none">Vulnerability Assessment and Risk Management: This section of the exam measures the skills of a Risk Management Analyst and entails identifying and assessing vulnerabilities, understanding risk priorities, and applying mitigation strategies that help manage threats proactively within an organization's systems |
| Topic 4 | <ul style="list-style-type: none">Endpoint Security Concepts: This section of the exam measures the skills of an Endpoint Security Specialist and includes securing individual devices, understanding protections such as antivirus, patching, and access control at the endpoint level, essential for maintaining device integrity. |
| Topic 5 | <ul style="list-style-type: none">Essential Security Principles: This section of the exam measures the skills of a Cybersecurity Technician and covers foundational cybersecurity concepts such as the CIA triad (confidentiality, integrity, availability), along with basic threat types and vulnerabilities, laying the conceptual groundwork for understanding how to protect information systems. |

Best Cisco 100-160 Practice | New 100-160 Exam Question

The ActualPDF is committed to making the Cisco 100-160 certification exam preparation simple, smart, and successful. To achieve this objective ActualPDF is offering top-notch and real 100-160 exam questions in three different formats. The names of these Cisco Certified Support Technician (CCST) Cybersecurity (100-160) exam questions formats are PDF files, desktop practice test software, and web-based 100-160 practice test software.

Cisco Certified Support Technician (CCST) Cybersecurity Sample Questions (Q299-Q304):

NEW QUESTION # 299

Which of the following is an integral part of the CIA triad in cybersecurity?

- A. Data loss prevention (DLP)
- B. Intrusion Detection System (IDS)
- C. Firewall
- D. Two-factor authentication (2FA)

Answer: D

Explanation:

The CIA triad in cybersecurity stands for confidentiality, integrity, and availability. Two-factor authentication (2FA) ensures confidentiality by adding an extra layer of security, requiring users to provide two forms of authentication before gaining access. It helps protect against unauthorized access and adds an additional level of assurance for ensuring data confidentiality.

NEW QUESTION # 300

Which of the following best defines the concept of preserving digital evidence?

- A. Gathering all digital evidence in a physical location.
- B. Destroying digital evidence after analysis to save storage space.
- C. Encrypting the digital evidence to prevent unauthorized access.
- D. Making an exact copy of the digital evidence for analysis.

Answer: D

Explanation:

Preserving digital evidence involves creating an exact copy of the original evidence to be used for analysis. This ensures that the original evidence remains intact and uncontaminated, while allowing investigators to work with a replicated version. It is crucial to prevent any modifications to the original evidence, as any changes can compromise the accuracy and integrity of the investigation.

NEW QUESTION # 301

Which protocol is responsible for resolving IP addresses to domain names?

- A. UDP
- B. TCP
- C. DNS
- D. HTTP

Answer: C

Explanation:

DNS (Domain Name System) is responsible for resolving IP (Internet Protocol) addresses to domain names. It translates human-readable domain names, such as www.example.com, into IP addresses, which are numerical identifiers used to locate and identify devices on a network.

NEW QUESTION # 302

What is the purpose of a firewall in a network security system?

- A. To prevent unauthorized access to or from private networks

- B. To scan and filter network traffic for potential threats
- C. To provide secure remote access to the network
- D. To encrypt data transmitted over the network

Answer: A

Explanation:

Option 1: Correct. A firewall is designed to prevent unauthorized access to or from private networks by monitoring and controlling network traffic based on predetermined security rules.

Option 2: Incorrect. While a firewall can scan and filter network traffic for potential threats, this is not its primary purpose.

Option 3: Incorrect. While encryption may be a feature of some firewalls, it is not the primary purpose of a firewall in a network security system.

Option 4: Incorrect. While a secure remote access solution may include a firewall, this is not the primary purpose of a firewall in a network security system.

NEW QUESTION # 303

What is the purpose of Security Information and Event Management (SIEM) systems?

- A. To analyze network traffic and detect potential security threats.
- B. To authenticate and authorize users to access network resources.
- C. To encrypt sensitive data to protect it from unauthorized access.
- D. To centrally collect, store, and analyze logs from various systems to detect and respond to security incidents.

Answer: D

Explanation:

Option 1: This option is incorrect. While SIEM systems may perform analysis of network traffic, their primary purpose is not network traffic analysis, but rather log collection and analysis for security incident detection and response.

Option 2: This option is correct. SIEM systems are designed to centrally collect, store, and analyze logs from various systems to detect and respond to security incidents. They provide real-time monitoring, correlation, and analysis of security events, allowing organizations to identify potential threats and take appropriate actions.

Option 3: This option is incorrect. Encryption of sensitive data is not the purpose of SIEM systems. While encryption is an important security measure, SIEM systems focus on log management and analysis rather than encryption.

Option 4: This option is incorrect. User authentication and authorization are not within the scope of SIEM systems. SIEM systems focus on log collection and analysis for security incident detection and response, rather than user access control.

NEW QUESTION # 304

.....

From the moment you first touch 100-160 simulating exam, you can feel the sense of security we are trying to bring you. You are not only the user of 100-160 training prep, but also our family and friends. We have the same goal to let you enjoy the best service and the best quality of our 100-160 Exam Questions. Meanwhile, we have developed our 100-160 learning braindumps so much to help you pass the exam. And you will be bound to pass the exam with our 100-160 training quiz.
