- B. If you have existing data in a separate file for each day, then create a partitioned table and upload each file into the appropriate partition.
- C. Use ORDER BY to put a table's rows into chronological order and then change the table's type to "Partitioned".
- D. Run a query to get the records for a specific day from an existing table and for the destination table, specify a partitioned table ending with the day in the format "\$YYYYMMDD".

**Answer: C**
