Now, I am glad to introduce a secret weapon for all of the candidates to pass the exam as well as get the related certification without any more ado-- our C\_CPI\_2506 study materials. We aim to help as many people as possible rather than earning as much money as possible. With our C\_CPI\_2506 practice test, you only need to spend 20 to 30 hours in preparation since there are all essence contents in our study materials. What's more, if you need any after service help on our C\_CPI\_2506 Exam Guide, our after service staffs will always here to offer the most thoughtful service for you.

## SAP C\_CPI\_2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>SAP Integration Suite Overview: This section of the exam measures the skills of Integration Consultants and covers the foundational concepts of the SAP Integration Suite. It provides an understanding of the suite's capabilities, its role in connecting applications, and its relevance in modern cloud-based integration scenarios.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>SAP Event Mesh: This section of the exam measures the skills of Solution Architects and centers on using SAP Event Mesh to support event-driven integration. It highlights the importance of asynchronous communication, event publishing, and subscription models, allowing organizations to build scalable and decoupled systems.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Implementing Cloud Integration: This section of the exam measures the skills of Integration Consultants and examines how cloud integration flows are designed and deployed. It emphasizes creating integration scenarios, handling connectivity, and applying best practices to build efficient, secure, and reliable integration processes in SAP's cloud environment.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Managing APIs: This section of the exam measures the skills of Solution Architects and focuses on managing APIs within the SAP ecosystem. It covers topics such as API provisioning, lifecycle management, security policies, and monitoring, ensuring candidates can handle APIs effectively for enterprise integration needs.</li> </ul>

**C\_CPI\_2506 Exam Preparation & C\_CPI\_2506 Study Guide & C\_CPI\_2506 Best Questions**

VCETorrent SAP Certification Exam comes in three different formats so that the users can choose their desired design and prepare SAP C\_CPI\_2506 exam according to their needs. The first we will discuss here is the PDF file of real SAP C\_CPI\_2506 Exam Questions. It can be taken to any place via laptops, tablets, and smartphones.

## SAP Certified Associate - Integration Developer Sample Questions (Q36-Q41):

### NEW QUESTION # 36

How do you configure a SOAP adapter for asynchronous processing?

- A. Message Exchange Pattern: Request-Reply Process Settings WS Standard
- **B. Message Exchange Pattern: One-Way Process Settings: WS Standard**
- C. Message Exchange Pattern: Request-Reply Process Settings Robust
- D. Message Exchange Pattern: One-Way Process Settings: Robust

**Answer: B**

Explanation:

To configure a SOAP adapter for asynchronous processing, you must set the message exchange pattern to one-way and the process settings to WS standard. The message exchange pattern defines how the sender and receiver communicate with each other using SOAP messages. The one-way pattern means that the sender sends a message to the receiver without expecting a response. The process settings define how the SOAP adapter handles errors and acknowledgements during message processing. The WS standard setting means that the SOAP adapter uses WS-ReliableMessaging protocol to ensure reliable delivery of messages and WS-Addressing protocol to identify the endpoints and actions of messages. Reference: Configure the SOAP (SOAP 1.x) Sender Adapter | SAP Help Portal, Configure the SOAP (SOAP 1.x) Receiver Adapter | SAP Help Portal

### NEW QUESTION # 37

You have set up an integration process to use a SOAP adapter. Which event allows you to run the integration flow directly after deployment?

- A. End Event
- B. End Message
- C. Start Event
- **D. Start Message**

**Answer: D**

Explanation:

A Start Message event allows you to run the integration flow directly after deployment. A Start Message event is triggered when a message arrives at the integration flow through an inbound channel, such as a SOAP adapter. You can use a Start Message event to initiate an integration process based on a message input. Reference: Modernize Integration with SAP Integration Suite | openSAP

### NEW QUESTION # 38

You configured a content modifier as follows: Action: Create | Name: ProductID | Source Type: XPath Source Value: //ProductID | Data Type: java.lang.string. After testing the content modifier, you receive an error message that contains the following fragment: "Java.lang.ClassNotFoundException: java.lang.string..." What caused the error message?

- A. Incorrect source value
- **B. Incorrect data type**
- C. Incorrect name
- D. Incorrect source type

**Answer: B**

Explanation:

In SAP Cloud Integration, when defining Content Modifier properties, the Java data type names are case-sensitive.

Correct type # java.lang.String

In the configuration, java.lang.string was used (lowercase "s"), which causes a ClassNotFoundException, since Java cannot find the class.

Other options are correct in form:  
Source Type = XPath # Valid.  
Source Value = //ProductID # Valid XPath.  
Name = ProductID # Valid.  
Thus, the error occurred because of incorrect data type specification.

#### NEW QUESTION # 39

You want to send messages over an SOAP adapter to an integration flow. Which method do you use to send the messages?

- A. GET
- B. PATCH
- **C. POST**
- D. UPDATE

**Answer: C**

Explanation:

To send messages over a SOAP adapter to an integration flow, you must use the POST method. The POST method is used to create or update a resource on the server using the SOAP message body as the input. The SOAP adapter supports both SOAP 1.1 and SOAP 1.2 protocols and can handle both one-way and request-reply message exchange patterns. The SOAP adapter can be configured as a sender or a receiver channel in an integration flow. Reference: SOAP (SOAP 1.x) Adapter | SAP Help Portal, SOAP Sender Adapter: Example Integration Flow | SAP Help Portal

#### NEW QUESTION # 40

You have created a product based on an API proxy, but you have not published the product yet. What is a consequence?

- A. The product is displayed in the API Business Hub Enterprise with the note "not published".
- **B. The product is not displayed in the API Business Hub Enterprise.**
- C. The product is displayed in the API Business Hub Enterprise but is grayed out.

**Answer: B**

Explanation:

In API Management (part of SAP Integration Suite), when you create an API Product (which bundles API Proxies for consumption):

Publishing is required before it becomes visible in API Business Hub Enterprise (Developer Portal).

If the product is not yet published, it remains in the design-time environment and is invisible to app developers.

Only published products are available for subscription and discovery.

Other options:

The product will not be shown grayed out or with a "not published" note; it simply won't be visible at all in the Business Hub Enterprise.

#### NEW QUESTION # 41

.....

The VCETorrent is one of the top-rated and leading platforms that offer real and exam trainers verified SAP Certified Associate - Integration Developer C\_CPI\_2506 practice test questions. These SAP Certified Associate - Integration Developer C\_CPI\_2506 exam questions are designed after deep research and verified by qualified SAP C\_CPI\_2506 exam preparation experts. So rest assured that you will get the top-notch VCETorrent C\_CPI\_2506 exam questions. These VCETorrent C\_CPI\_2506 exam questions are the ideal SAP Certified Associate - Integration Developer C\_CPI\_2506 exam preparation material that will prepare you to perform well for the final SAP Certified Associate - Integration Developer C\_CPI\_2506 Certification Exam. So rest assured that with the VCETorrent C\_CPI\_2506 exam questions you will get everything that is necessary for C\_CPI\_2506 exam preparation and success. Take a decision right now and just get registered in SAP C\_CPI\_2506 certification exam and start preparation with VCETorrent C\_CPI\_2506 exam questions. The VCETorrent is committed since the beginning to offer the top-notch SAP Certified Associate - Integration Developer C\_CPI\_2506 exam questions to SAP Certified Associate - Integration Developer C\_CPI\_2506 exam candidates.
