1 / 9

Microsoft 인증MB-335시험에 도전해보려고 하는데 공부할 내용이 너무 많아 스트레스를 받는 분들은 지금 보고계시는 공부자료는 책장에 다시 넣고Fast2test의Microsoft 인증MB-335덤프자료에 주목하세요. Fast2test의 Microsoft 인증MB-335덤프는 오로지 Microsoft 인증MB-335시험에 대비하여 제작된 시험공부가이드로서 시험패스율이 100%입니다. 시험에서 떨어지면 덤프비용전액환불해드립니다.

Microsoft MB-335 자격증 시험은 공급망 관리 분야에서 진출을 희망하는 사람들에게 극도로 인기 있는 자격증입니다. 이 자격증 시험은 후보자의 지식과 기술을 테스트하여 Microsoft Dynamics 365 공급망 관리 솔루션의 구현과 구성 능력을 확인합니다. 이 자격증을 보유한 인증 전문가는 제조, 물류 및 재고를 포함한 공급망 운영의 능력을 증명합니다.

MB-335시험대비 최신버전 덤프자료, MB-335유효한 최신버전 덤프

Fast2test에서는 전문Microsoft MB-335인증시험을 겨냥한 덤프 즉 문제와 답을 제공합니다.여러분이 처음Microsoft MB-335인증시험준비라면 아주 좋은 덤프입니다. Fast2test에서 제공되는 덤프는 모두 실제시험과 아주 유사한 덤프들입니다.Microsoft MB-335인증시험패스는 보장합니다. 만약 떨어지셨다면 우리는 덤프비용전액을 환불해드립니다.

최신 Microsoft Certified: Dynamics 365 MB-335 무료샘플문제 (Q192-Q197):

질문 # 192

You need to resolve the ModelA charging issue.

Which two configurations should you set on the work order finite capacity? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Asset
- B. Ignore schedule
- C. Worker
- D. Ignore scheduled execution
- E. Tool

정답: A,E

질문 # 193

An electronics manufacturing company is transitioning from infinite capacity planning to finite capacity planning to improve scheduling efficiency and manage resource constraints effectively.

The company observes that its manufacturing process typically requires a minimum lead time of five days.

The company requires finite capacity scheduling to create realistic production schedules that account for resource limitations over a defined minimum lead time of five days.

You need to implement finite capacity planning with a time fence that aligns with the five-day manufacturing lead time.

Solution: Set a finite capacity time fence for one day of manufacturing.

Does the solution meet the goal?

- A. No
- B. Yes

정답: A

질문 # 194

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company implements Dynamics 365 Supply Chain Management and configures the system to support process manufacturing.

The company manufactures pain-relieving lotions. Several of the primary ingredients are delivered at different concentrations depending on the ingredient and vendor. Ingredient A is the primary active ingredient in the lotion. IngredientB is used as a compensating ingredient.

You need to ensure that the system is set up to support the manufacturing process.

Solution: Create a dimension-based product with configurations. Use a price model to calculate the different configurable option costs.

Does the solution meet the goal?

- A. No
- B. Yes

정답: A

설명:

No, the solution does not meet the goal. A dimension-based product with configurations is used for discrete manufacturing, not process manufacturing. A price model is used to calculate the cost of different configurations of a product, not the cost of different concentrations of an ingredient. For process manufacturing, you need to use a formula-based product with batch attributes and potency management. A formula defines the materials, ingredients, and outcomes of a specific process. Batch attributes are used to capture the characteristics of a batch of products or ingredients. Potency management is used to adjust the quantity of an ingredient based on its concentration or strength.

질문 # 195

A manufacturing company uses Dynamics 365 Supply Chain Management.

The shop floor has multiple pieces of the same model of equipment. The equipment produces a finished good that requires special handling.

The equipment has a visual guide available. The shop floor manager requires the following:

- * The most recent visual guide must be available for all pieces of the equipment at the same time.
- * The shop floor workers must have a visual guide available for handling of the finished good.

You need to configure the visual guides to meet the shop floor requirements.

What should you configure for each requirement? To answer, drag the appropriate features to the correct requirements. Each feature may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

정답:

설명:

Explanation:

A white background with black text AI-generated content may be incorrect.

질문 # 196

A company makes engine parts used in the automotive industry.

They are in the process of retooling an existing manufacturing plant. They are looking to use Dynamics 365 for Finance and Operations to help support the Bill of Materials (BOM) product lifecycle for engineering version control.

You must translate existing production processes into the proper elements. You need to create BOM lifecycle states to translate existing production processes into the proper elements.

What type of BOM product lifecycle state should you create? To answer, select the appropriate BOM state in the answer area.

Answer Area

Scenario

Create runs for existing orders that need to be scheduled for production.

Create visibility into cost and materials estimates for prototype products.

Create visibility into cost estimates for products that use a very constrained component for the next three months.

BOM type

engineering
draft
costing
production

engineering
