Our Infoblox Qualified NIOS DDI Expert - INE (NIOS-DDI-Expert) web-based practice exam software also simulates the Infoblox Qualified NIOS DDI Expert - INE (NIOS-DDI-Expert) environment. These Infoblox NIOS-DDI-Expert mock exams are also customizable to change the settings so that you can practice according to your preparation needs. PassExamDumps web-based Infoblox Qualified NIOS DDI Expert - INE (NIOS-DDI-Expert) practice exam software is usable only with a good internet connection.

For candidates who will buy NIOS-DDI-Expert learning materials online, they may care more about the quality of the exam dumps. We have a professional team to collect the latest information of the NIOS-DDI-Expert exam dumps, therefore the quality can be guaranteed. Moreover, we have online and offline chat service staff, who have professional knowledge for NIOS-DDI-Expert Learning Materials. If you have any questions, you can consult us. We will give you reply as soon as possible. Free demo for NIOS-DDI-Expert exam dumps will also be offered, and you can have a try before purchasing.

NIOS-DDI-Expert Study Materials, NIOS-DDI-Expert Reliable Exam Papers

Subjects are required to enrich their learner profiles by regularly making plans and setting goals according to their own situation, monitoring and evaluating your study. Because it can help you prepare for the NIOS-DDI-Expert exam. If you want to succeed in your exam and get the related exam, you have to set a suitable study program. We believe that if you purchase NIOS-DDI-Expert Test Guide from our company and take it seriously into consideration, you will gain a suitable study plan to help you to pass your NIOS-DDI-Expert exam in the shortest time.

Infoblox Qualified NIOS DDI Expert - INE Sample Questions (Q50-Q55):

NEW QUESTION # 50

How does an administrator obtain new NIOS releases?

- A. Download from <https://support.infoblox.com>

- B. In Grid UI, go to Grid > Software > Download
- C. Contact Infoblox Technical Support for a Software Bundle
- D. Contact the Infoblox Account Manager for a Support Bundle

Answer: A

Explanation:

Comprehensive and Detailed In-Depth Explanation: Obtaining new NIOS software releases follows a standardized process tied to Infoblox's support infrastructure:

* Official Method: New releases (e.g., NIOS 8.6.x) are available for download from the Infoblox Support

Portal (<https://support.infoblox.com>) under the "Downloads" section. Admins log in with valid credentials, select the appliance model, and download the .upgrade file.

* Options Analysis:

* A: "Grid > Software > Download" isn't a valid path in Grid Manager. The UI supports uploading and distributing releases (Grid > Upgrade), but not direct downloading. Incorrect.

* B: Technical Support can assist with issues or provide files in rare cases (e.g., beta releases), but it's not the standard method—self-service via the portal is preferred. Incorrect.

* C: Account Managers handle sales, not software distribution. "Support Bundle" is also a misnomer—it's for diagnostics, not upgrades. Incorrect.

* D: The support portal is the documented, primary source for NIOS releases, aligning with INE's focus on Grid upgrade procedures. Correct.

* Steps: Download the file, upload it via Grid Manager (Grid > Upgrade > Upload), and initiate the upgrade process.

* Practical Example: In an INE lab, you'd download NIOS 8.6.2 from the portal, upload it, and test a Grid-wide upgrade, troubleshooting any distribution failures. References: Infoblox NIOS Administrator Guide - Obtaining Software Releases; INE Course Content: NIOS DDI Grid Deployment.

NEW QUESTION # 51

By default, how do peers in an Infoblox DHCP Failover association operate in NORMAL mode?

- A. The primary peer answers roughly half of the lease requests and the secondary answers the other half
- B. Whichever peer receives the request first will answer the request
- C. The primary answers all lease requests
- D. The primary answers all lease requests up to the utilization threshold, then the secondary answers requests

Answer: A

Explanation:

Comprehensive and Detailed In-Depth Explanation: DHCP Failover in NIOS ensures redundancy and load balancing between primary and secondary peers in NORMAL mode:

* Default Behavior: The lease pool is split (typically 50/50 unless customized via "split" settings), and each peer manages its portion. Clients send DHCPDISCOVER broadcasts, and relays (or direct requests) distribute them to both peers. The peers coordinate via TCP 647, ensuring:

* Primary answers from its half.

* Secondary answers from its half.

* Load is roughly balanced (not precisely 50/50 due to relay behavior).

* Options:

* A: Matches the default split-pool design, where peers share the load. Correct.

* B: "First come, first serve" isn't how failover works—peers don't race; they use pool allocation. Incorrect.

* C: No utilization threshold triggers a switch—both peers serve concurrently from their pools. Incorrect.

* D: Primary-only answering defeats failover's redundancy and balancing. Incorrect.

* Practical Example: In an INE lab, you'd configure a 50/50 split, simulate client requests, and troubleshoot lease distribution via DHCP logs, verifying NORMAL mode behavior. References:

Infoblox NIOS Administrator Guide - DHCP Failover; INE Course Content: NIOS DDI DHCP Troubleshooting.

NEW QUESTION # 52

You accidentally deleted several DNS entries from the Grid. How can you recover from this mistake with the least service disruption?

- A. Restore the database from the last backup
- B. Promote a GMC to be the new GM
- C. Force HA failover on the GM, if it is an HA pair
- **D. Restore the records from the recycle bin**

Answer: D

Explanation:

Comprehensive and Detailed In-Depth Explanation: Accidentally deleting DNS entries (e.g., A records) in NIOS requires a recovery method that minimizes downtime and complexity. Here's the analysis:

* Recycle Bin Feature: NIOS includes a Recycle Bin (Data Management > DNS > Recycle Bin) that temporarily stores deleted objects (e.g., zones, records) unless permanently purged or the bin is disabled. Restoring from here is instantaneous and doesn't interrupt services.

* Options:

* A: Restoring from a backup (Grid > Grid Manager > Backup > Restore) replaces the entire database, requiring service restarts and potentially losing post-backup changes. High disruption.

Incorrect.

* B: Promoting a Grid Master Candidate (GMC) to Grid Master (GM) shifts control but doesn't recover deleted records—it's for GM failure, not data loss. Irrelevant. Incorrect.

* C: Forcing HA failover on the GM switches active/passive nodes but doesn't restore data, as both share the same database. No effect. Incorrect.

* D: Restoring from the Recycle Bin (select records > Restore) reverts the deletion with no service impact, assuming the bin is enabled (default in NIOS). Correct.

* Practical Example: In an INE lab, you'd delete an A record, navigate to the Recycle Bin, restore it, and verify DNS resolution—all without downtime, testing troubleshooting skills.

* Caveat: If the Recycle Bin is disabled or entries are purged, backup restoration (A) becomes necessary, but the question implies least disruption, favoring D. References: Infoblox NIOS Administrator Guide - Recycle Bin; INE Course Content: NIOS DDI DNS Troubleshooting.

NEW QUESTION # 53

Which CSV export format is recommended for tasks that involve data manipulation and reimporting to the NIOS Grid?

- A. Standard CSV (Visible) Format
- **B. Infoblox CSV Import Format**
- C. Both formats are equally suitable
- D. Neither format is suitable for data manipulation

Answer: B

Explanation:

Comprehensive and Detailed In-Depth Explanation: NIOS supports two CSV export formats in Grid Manager (Data Management > Export):

* Infoblox CSV Import Format: Structured specifically for NIOS, with headers matching import fields (e.g., "fqdn,ip_address,mac_address"). Includes all necessary metadata for reimporting, making it ideal for editing (e.g., in Excel) and reuploading via the Data Import Wizard (DIW).

* Standard CSV (Visible) Format: A human-readable format showing only visible Grid Manager data, lacking the full structure for reimport. It's better for reporting or external analysis, not manipulation/reimport.

* Why A: The Infoblox format ensures compatibility with NIOS's import process, preserving object relationships and mandatory fields (e.g., marked with *). Editing and reimporting in this format maintains data integrity.

* Option Analysis:

* B: Standard format isn't designed for reimport—missing fields cause import failures. Incorrect.

* C: They serve different purposes; only Infoblox format suits reimporting. Incorrect.

* D: Infoblox format is suitable, so this is false. Incorrect.

* Practical Example: In an INE lab, you'd export DNS records in Infoblox CSV format, update IPs, and reimport to test bulk management, a Grid deployment skill. References: Infoblox NIOS Administrator Guide - CSV Export/Import; INE Course Objective: NIOS DDI Grid Deployment.

NEW QUESTION # 54

In the DHCPv4 failover NORMAL state, leases are only stored on the primary peer.

- A. False
- B. True

Answer: A

Explanation:

Comprehensive and Detailed In-Depth Explanation: In NORMAL state:

- * Lease Storage: Both primary and secondary peers store leases via sync (TCP 647). Each manages its pool share (e.g., 50/50), but all leases are replicated for redundancy.
- * Why False: "Only primary" contradicts failover's design—both peers maintain a full lease database for failover readiness.
- * Practical Example: In an INE lab, check leases on both peers (Data Management > DHCP > Leases), simulate primary failure, and troubleshoot secondary takeover. References: Infoblox NIOS Administrator Guide - DHCP Failover; INE Course Content: NIOS DDI DHCP Troubleshooting.

NEW QUESTION # 55

.....

If you still doubt the accuracy of our Infoblox exam dumps, you can download the free trial of test questions in our website. You will well know the ability of our NIOS-DDI-Expert dumps torrent clearly. If you decide to join us, you just need to spend one or two days to practice NIOS-DDI-Expert Top Questions and remember the key knowledge of real dumps, the test will be easy for you.
