involvement in the SAP Certified Associate - Positioning SAP Business Suite (C-BCSBS-2502) exam. SAP C-BCSBS-2502 Certification Exam concentrate on material which incorporates a rundown of the multitude of points and an outline making sense of the general subject.

## **SAP Certified Associate - Positioning SAP Business Suite Sample Questions (Q13-Q18):**

### **NEW QUESTION # 13**

A multinational company is struggling with fragmented data across different departments, leading to inefficiencies in finance, procurement, and supply chain operations. They need an SAP solution that integrates these business processes into a unified system with real-time data access. Which SAP solutions should they implement? There are 3 correct answers to this question.

- **A. SAP BusinessObjects**
- B. SAP SuccessFactors
- **C. SAP ERP**
- **D. SAP S/4HANA**
- E. SAP Ariba

**Answer: A,C,D**

### **NEW QUESTION # 14**

Which key features are included in SAP Business Suite for human capital management? There are 2 correct answers to this question.

- A. Freight and logistics tracking
- **B. Payroll and benefits administration**
- **C. Employee performance tracking**
- D. Customer engagement analytics

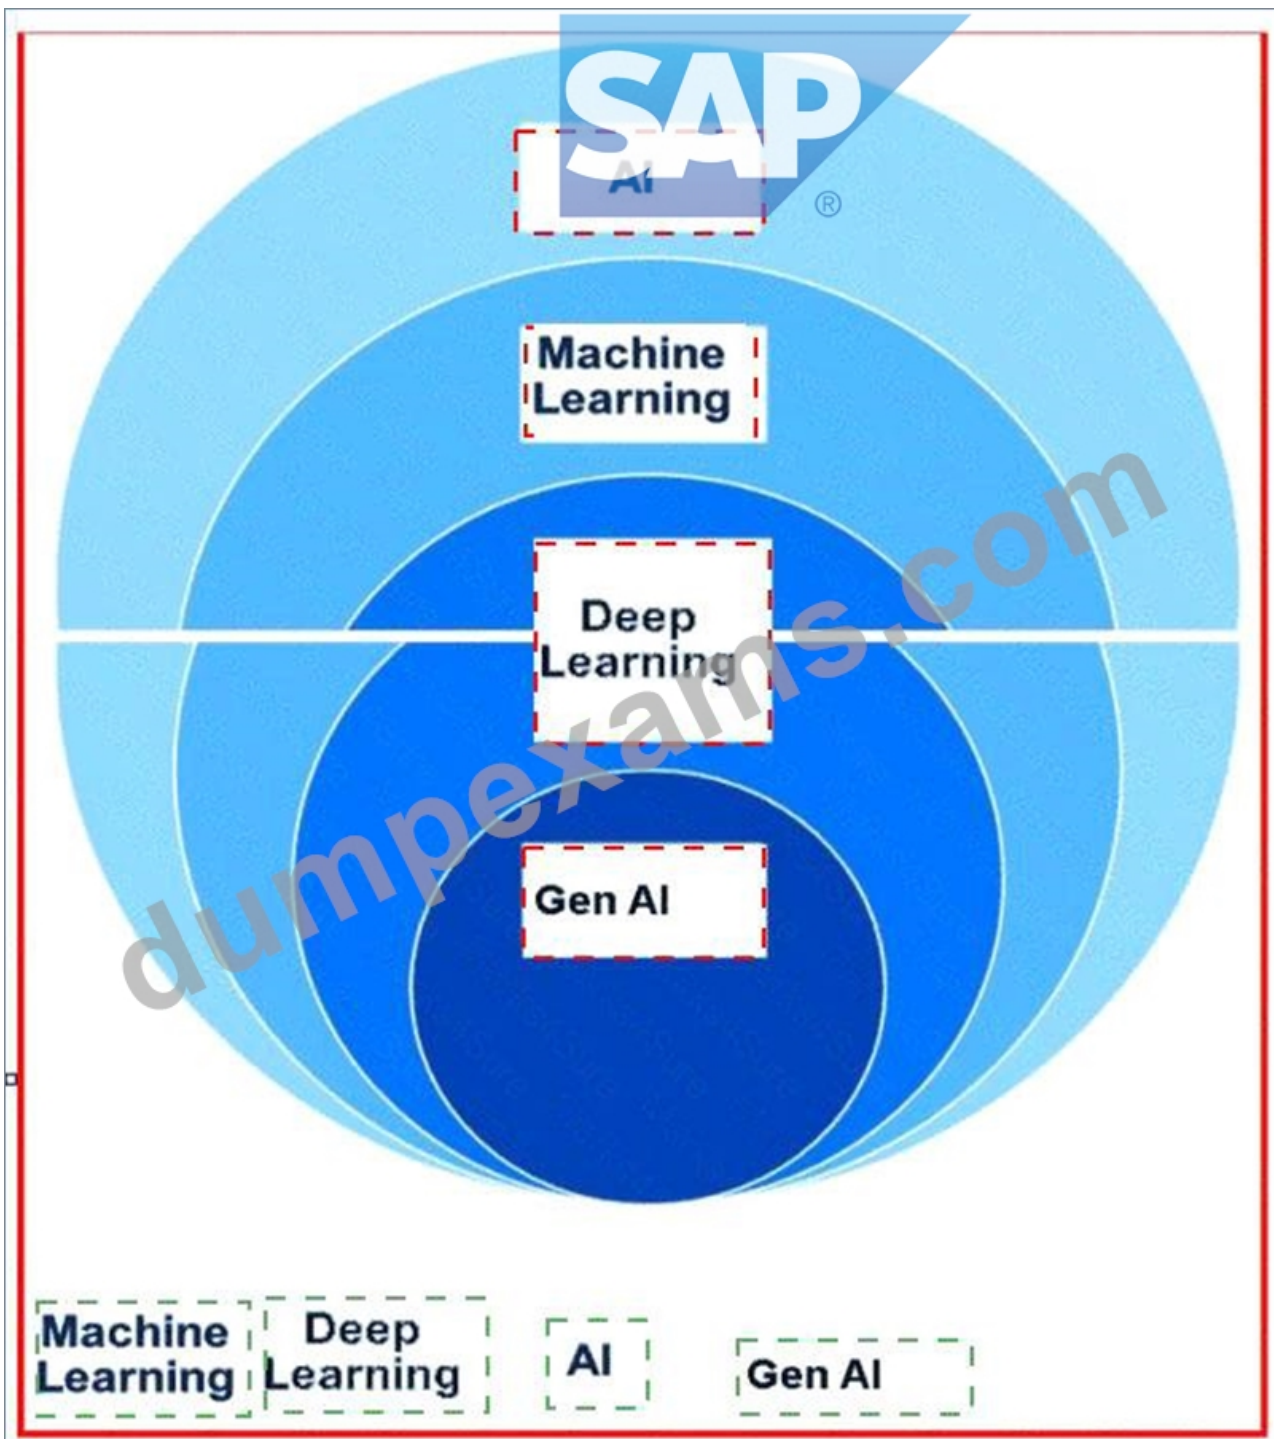

**Answer: B,C**

### **NEW QUESTION # 15**

Drag and drop the key terms to the correct position.

**Answer:**

Explanation:

Explanation:

\* Largest Circle (Outer Layer):AI (Artificial Intelligence)

\* Second Layer (inside AI):Machine Learning

\* Third Layer (inside Machine Learning):Deep Learning

\* Innermost Layer (inside Deep Learning):Generative AI (Gen AI)

\* AI (Artificial Intelligence):The broadest field. Encompasses all intelligent systems that mimic human behavior, decision making, or reasoning.

\* Machine Learning:A subset of AI. Uses algorithms to learn patterns from data and make predictions.

\* Deep Learning:A subset of Machine Learning. Involves neural networks with many layers (hence "deep"), great for processing images, language, etc.

\* Generative AI:A subset of Deep Learning. These models (like GPT, DALL-E, etc.) can generate new content such as text, images, or code.

Visual Placement from Largest to Smallest:

\* AI (outermost, encompasses everything)

\* Machine Learning (inside AI)

\* Deep Learning (inside Machine Learning)

\* Generative AI (inside Deep Learning)

### NEW QUESTION # 16

What are the key marketing messages of SAP Business Data Cloud? Note: There are 3 correct answers to this question.

- A. Foster reliable AI
- B. Unleash transformative insights
- C. Connect all data
- D. Connect SAP data
- E. Unleash AI-powered insights

**Answer: A,B,C**

Explanation:

SAP Business Data Cloud (BDC) is a Software-as-a-Service (SaaS) solution designed to unify and harmonize data from SAP and non-SAP sources, enabling organizations to achieve advanced analytics, actionable insights, and reliable AI-driven outcomes. The question asks for the key marketing messages of SAP BDC, with three correct answers. Below, each option is evaluated based on official SAP documentation and marketing materials, including SAP.com, SAP Learning, and web sources from the provided search results, which align with the "Positioning SAP Business Data Cloud" narrative.

\* Option A: Connect SAP data While SAP BDC does connect SAP data as part of its functionality, this is not a primary marketing message. The platform's broader value proposition emphasizes connecting all data (SAP and non-SAP) to create a unified semantic layer, rather than focusing solely on SAP data.

Marketing messages highlight the ability to harmonize mission-critical data across diverse sources, not just SAP-specific data. The documentation and promotional materials consistently stress the integration of both SAP and third-party data to drive insights and AI, making this option too narrow to be a key marketing message. Extract: "SAP Business Data Cloud is a fully managed SaaS solution that unifies and governs all SAP data and seamlessly connects with third-party data-giving line-of-business leaders context to make even more impactful decisions." This option is incorrect.

\* Option B: Unleash transformative insights A central marketing message of SAP BDC is its ability to "unleash transformative insights" by delivering prebuilt analytical applications and harmonized data that empower decision-making across finance, HR, operations, and other business functions. This message is prominently featured in SAP's promotional materials, including e-books and web pages, which emphasize how the platform enables organizations to gain actionable, real-time insights to transform business processes and outcomes. The phrase "unleash transformative insights" is explicitly used in marketing content, aligning with the platform's value proposition. Extract: "In this SAP e-book, discover the benefits of SAP Business Data Cloud, a fully managed cloud solution that unifies data and analytics with semantically rich data from your key business processes. Explore key use cases for HR, finance, and operations and learn how you can unleash transformative business insights, connect all your data, and foster reliable AI in your organisation." Extract: "Learn how SAP Business Data Cloud unifies data and business analytics with semantically rich data. ... Deliver transformational insights for advanced analytics and planning with prebuilt applications across all lines of business." This option is correct.

\* Option C: Unleash AI-powered insights While SAP BDC leverages AI to deliver insights, the specific phrase "unleash AI-powered insights" is not a primary marketing message in the official SAP documentation or promotional materials. The platform's AI capabilities are framed under broader messages like "foster reliable AI" or delivering "transformative insights" through AI-powered applications. The marketing focus is on the reliability and integration of AI within business processes, rather than solely emphasizing AI-powered insights as a standalone message. The documentation highlights AI as a tool to enhance insights, but the exact phrasing of this option does not match the key marketing messages. Extract: "Automate, adapt, and learn in real time with AI-powered applications that understand your business. ... Choose from a breadth of AI and machine learning capabilities that are fueled by trusted business data." This option is incorrect.

\* Option D: Foster reliable AI Fostering reliable AI is a key marketing message for SAP BDC, emphasizing the platform's ability to provide a trusted data foundation for generative AI that is relevant, responsible, and reliable. This message is critical in addressing customer challenges with AI adoption, such as poor data quality and integration issues, which SAP BDC resolves through its unified data layer and integration with tools like SAP Databricks. The phrase "foster reliable AI" is explicitly used in SAP's marketing materials, highlighting how the platform ensures AI outputs are trustworthy and business-ready. Extract: "In this SAP e-book, discover the benefits of SAP Business Data Cloud, a fully managed cloud solution that unifies data and analytics with semantically rich data from your key business processes. Explore key use cases for HR, finance, and operations and learn how you can unleash transformative business insights, connect all your data, and foster reliable AI in your organisation." Extract: "Foster reliable AI: Ensure data across applications and operations has a foundation for generative AI that is reliable, responsible, and relevant." This option is correct.

\* Option E: Connect all data Connecting all data, including SAP and non-SAP sources, is a cornerstone marketing message for SAP BDC. The platform is promoted as a solution that harmonizes mission-critical data across an open data ecosystem, leveraging a powerful semantic layer to provide comprehensive business insights. This message underscores the platform's ability to break down data silos and integrate diverse data sources, enabling advanced analytics and AI. The phrase "connect all your data" is explicitly

used in SAP's marketing content, making it a key message. Extract: "In this SAP e-book, discover the benefits of SAP Business Data Cloud, a fully managed cloud solution that unifies data and analytics with semantically rich data from your key business processes. Explore key use cases for HR, finance, and operations and learn how you can unleash transformative business insights, connect all your data, and foster reliable AI in your organisation." Extract: "Connect all your data:

Harmonize all your mission-critical data with an open data ecosystem, leveraging a powerful semantic layer to give you an unmatched knowledge of your business." This option is correct.

Summary of Correct Answers:

\* B: "Unleash transformative insights" highlights SAP BDC's ability to deliver actionable, real-time insights through prebuilt applications, transforming business decision-making.

\* D: "Foster reliable AI" emphasizes the platform's trusted data foundation for reliable, responsible, and relevant AI outcomes.

\* E: "Connect all data" underscores the platform's capability to harmonize SAP and non-SAP data, enabling a unified data ecosystem for analytics and AI.
