## PMI-PMOCP勉強方法 & PMI-PMOCP復習教材

PMIさまざまな種類の候補者がPMI-PMOCP認定を取得する方法を見つけるために、多くの研究が行われています。シラバスの変更および理論と実践の最新の進展に応じて、PMI-PMOCPテストトレントを修正および更新します。PMI-PMOCP認定トレーニングは、厳密な分析による近年のテストと業界動向に基づいています。したがって、お客様のPMI Project Management Office Certified Professionalのために、より多くの選択肢が用意されています。試験のためにPMI-PMOCP試験問題を選択することをお勧めします。

## PMI Project Management Office Certified Professional 認定 PMI-PMOCP 試験問題 (Q78-Q83):

### 質問 # 78

A PMO professional has been tasked with evolving the PMO's value proposition in a rapidly changing, capital-intensive industry that has been strongly impacted by new environmental, social, and governance (ESG) regulations. The organization's strategy emphasizes flexibility and innovation, but the PMO must also ensure compliance with these evolving requirements.

What should the PMO professional do when developing a PMO value proposition?

- A. Develop a value proposition that prioritizes financial metrics.
- B. Create a value proposition based on a recently launched PMO standard.
- C. Develop a value proposition that incorporates industry-specific requirements.
- **D. Create a value proposition aligned with the organization's strategic goals.**

**正解: D**

解説:

A PMO's value proposition must be aligned with the organization's overarching strategic goals, including the need for flexibility, innovation, and regulatory compliance. Option C encapsulates this alignment, ensuring that the PMO supports business priorities and evolving market requirements effectively.

Focusing solely on financial metrics (Option A) or on PMO standards (Option B) risks misalignment or being outdated. While industry-specific requirements (Option D) are important, they should be integrated into the broader strategic goals rather than forming the entire basis of the value proposition.

PMI emphasizes that a well-crafted PMO value proposition reflects strategic priorities to maximize organizational value.

#### 質問 # 79

A PMO professional at a software company is in charge of ensuring effective use of methodology and integration between projects, monitoring progress, and identifying any deviations from the defined objectives.

Which responsibility describes the role of the PMO professional in this scenario?

- A. Identify the necessary resources required for the implementation of projects to achieve the expected results.
- B. Update the project management plan with the approved scope change and communicate it to the different stakeholders.
- C. Analyze the duration of the user acceptance test that might affect the timeline of a project in the portfolio.
- **D. Identify and address issues and interdependence with different projects impacting the project outcomes.**

**正解: D**

解説:

A key responsibility of a PMO professional is to monitor project interdependencies and address issues that may impact project and portfolio outcomes. This oversight ensures coordinated execution and risk mitigation.

Updating plans (Option A) and resource identification (Option D) are important tasks but more tactical.

Analyzing test durations (Option B) is a project-level activity and less integrative.

PMI-PMOCP Lifecycle Management highlights the PMO's role in integration and oversight for effective delivery.

#### 質問 # 80

A food industry company recently acquired a new company. To ensure a quick integration, several project managers are assigned to combine the product portfolios. The PMO for the integration program was informed by the project managers that they encountered a regulatory compliance change regarding several products manufactured by the acquired company. This is having a significant impact on the ongoing product portfolio integration.

Which actions should the PMO professional take to support the quick adaptation to these changes in the future?

- A. Develop a training for the project managers with the regulatory department that emphasizes the importance of complying with regulatory requirements.
- **B. Schedule a regular touchpoint between the project managers and the regulatory experts for the adjustment of project plans to incorporate changes in regulatory requirements or market conditions.**
- C. Review the issue with the project managers and make sure they are capturing problems in the lessons learned register so that information can be leveraged for similar future projects.
- D. Standardize all project management processes to ensure uniformity across all product portfolio integration projects.

正解: B

解説:

To manage ongoing and future regulatory changes efficiently, the PMO professional should establish regular communication channels between project managers and regulatory experts. PMI-PMOCP highlights the importance of proactive collaboration to identify, interpret, and incorporate regulatory changes quickly into project plans, minimizing disruptions.

Capturing lessons learned (option A) is useful but reactive. Standardizing processes (option C) and providing training (option D) are important but do not replace real-time regulatory engagement critical for timely adaptation.

#### 質問 # 81

A PMO professional for an engineering company was contacted by a newly hired project manager who wanted to submit an urgent change request to reset the baseline for the project schedule. The project manager did not understand the process for submitting such a request. Because this project is critical for the company, any delays might put the project at risk.

What should the PMO professional do?

- A. Ensure that the project manager attends the required training that will provide more information about the change management process.
- B. Instruct the project manager to follow the project management governance model, which has predefined processes and procedures for change requests.
- C. Support the project manager in creating the change request and guide the project manager through its submission and approval.
- D. Tell the project manager to refer to the organizational process assets (OPAs) for the change request template and provide support as needed.

正解: C

解説:

In the context of the PMI-PMOCP Governance domain, one of the critical functions of the PMO professional is to provide proactive support and guidance to project managers, especially when urgent changes are needed in critical projects. Although organizational process assets (OPAs) and governance models provide important frameworks and tools, the PMO's role extends beyond simply pointing to these resources. The PMO professional should actively assist the project manager in preparing the change request to ensure it is correctly documented and aligned with organizational standards, reducing risk and delays.

According to PMI's PMO practice guides and the PMI-PMOCP exam content outline, the Governance domain emphasizes oversight, adherence to processes, and facilitation. Helping the project manager navigate the change management process embodies good governance and improves project outcomes. This approach supports organizational strategy by enabling timely decision-making and maintaining project control.

Furthermore, while training is important, it is not an immediate solution for urgent requests. Telling the project manager to self-serve through OPAs (Option A) or simply directing them to follow governance models (Option B) without hands-on assistance risks delays and misunderstandings, particularly for new PMs.

#### 質問 # 82

An enterprise PMO (EPMO) is working with different countries to staff project managers across the organization. Customers are providing feedback stating that the staffing is taking more time than expected when compared to the deadlines agreed upon with the customer.

Which two key performance indicators (KPIs) should the PMO professional monitor for this PMO service?

(Choose 2)

- A. The Net Promoter Score (NPS) related to general customer satisfaction.
- B. The number of days taken on average to formally finalize customer requests.
- C. The retention of project managers in their roles on the assigned projects.
- D. The average time needed to recruit project managers for the customer.
- E. The percentage of project manager roles filled within the deadline.

正解: D、E

解説:

To address staffing timeliness, the PMO should monitor the average recruitment time (B) and the percentage of roles filled within the agreed deadlines (E). PMI-PMOCP stresses these metrics as direct indicators of staffing service performance and customer satisfaction related to timeliness.

Other KPIs like NPS (A) or retention (D) provide additional insight but are less relevant to staffing cycle time issues.
