Oracle Guided Learning Project Management Foundations Associate - Rel 1 Sample Questions (Q33-Q38):

NEW QUESTION # 33

What are the deliverables of an OGL project?

- A. Job aids
- **B. OGL KPIs**
- C. Total number of content items

Answer: B

Explanation:

The deliverables of an OGL project are OGL Key Performance Indicators (KPIs) (option B), which measure success through metrics like user adoption, content usage, and feedback scores. These KPIs provide a quantifiable assessment of the project's impact, aligning with Oracle's outcome-focused approach. The total number of content items (option A) is a byproduct, not a

deliverable, while job aids (option C) are specific content types, not the overarching output. KPIs encapsulate the project's effectiveness and value, offering stakeholders a clear, data-driven evaluation of OGL's contribution to business objectives.

NEW QUESTION # 34

What is the standard use of a Use Case?

- A. You want to familiarize the project team with overall business processes.
- B. You want clear, step-by-step instructions for essential tasks.
- C. You want targeted assistance for specific areas of the host application.

Answer: C

Explanation:

A Use Case in OGL provides targeted assistance for specific areas of the host application, addressing unique scenarios or challenges. Familiarizing teams with processes (option A) aligns with Business Process Training, and step-by-step instructions (option C) are for Base Guides.

NEW QUESTION # 35

What are recommended agenda items for the OGL kickoff?

- A. Focus on business outcomes, leverage best practices, and continuously improve.
- B. Start developing content, deploy OGL in production, and define Hypercare solutions
- C. Get an overview of the OGL cloud service and implementation process, identify key roles and responsibilities, and review the training plan and digital learning assignments.

Answer: C

Explanation:

The OGL kickoff agenda typically includes an overview of the cloud service and implementation process, identifying roles and responsibilities, and reviewing the training plan. These set the foundation for the project. Option A involves later-stage activities, and option C is too vague for a kickoff focus.

NEW QUESTION # 36

What are the attributes of a successful OGL project's testing document?

- A. Is saved to your computer desktop
- B. Includes people responsible for review and sign-off
- C. Is missing the status of development for each content item

Answer: B

Explanation:

A successful OGL testing document must identify people responsible for review and sign-off to ensure accountability and completion. Saving to a desktop (option B) is irrelevant to success, and missing development status (option C) undermines tracking, making it a flaw, not an attribute.

NEW QUESTION # 37

Which content library saves users time by keeping cloud configuration support, documentation, and "how-to" guidance easily accessible?

- A. Oracle Content
- B. Use Cases
- C. Business Process Training
- D. My Content

Answer: A

Explanation:

The Oracle Content library is a centralized repository in OGL that provides prebuilt resources, including cloud configuration support, official documentation, and "how-to" guides. This library is designed to save users time by offering readily accessible, standardized content. Business Process Training (option A) focuses on process education, My Content (option C) is for custom user-created content, and Use Cases (option D) target specific scenarios rather than broad configuration support. Oracle Content is the most efficient option for quick access to essential guidance.
