## 100% Pass 2026 Talend Valid Talend-Core-Developer: Reliable Talend Core Certified Developer Exam Exam Review

The importance of cracking the Professional Talend Talend-Core-Developer Certification test is increasing, and almost everyone is taking it to validate their skills. Talend Core Certified Developer Exam (Talend-Core-Developer) has tried its best to make this

learning material the best and most user-friendly, so the candidates don't face excessive issues. The applicants can easily prepare from our real Talend Core Certified Developer Exam Exam QUESTIONS and clear test within a few days.

## Talend Core Certified Developer Exam Sample Questions (Q53-Q58):

### NEW QUESTION # 53

You need to create a centralized metadata connection to a database server for an application. Which steps should you take before building a Job that reads from that database? Choose 3 answers.

- A. Drag the Db Connections metadata onto the Designer to read from the database component.
- B. Add a tMap component to handle and convert Db Types.
- C. Create Db Connections metadata to describe the database connection.
- D. Retrieve the schemas from the database connection.
- E. Add a tCreateTable component to create a table in the database.

**Answer: A,C,D**

Explanation:

Comprehensive and Detailed Explanation:

To establish a centralized metadata connection to a database server in Talend Studio, follow these steps before constructing a Job that reads from the database:

- \* Create Db Connections Metadata to Describe the Database Connection (Option C):
- \* In the Repository panel, right-click on "Metadata" and select "Create connection."
- \* Fill in the necessary details such as database type, host, port, database name, username, and password.
- \* Test the connection to ensure it is configured correctly.
- \* Save the connection metadata for reuse across multiple Jobs.
- \* Retrieve the Schemas from the Database Connection (Option E):
- \* After creating the database connection metadata, expand it to view the available schemas.
- \* Retrieve the required schemas by importing the table structures.
- \* This step ensures that the schema definitions are centralized and can be reused in different Jobs.
- \* Drag the Db Connections Metadata onto the Designer to Read from the Database Component (Option D):
- \* In the Repository, locate the previously created database connection metadata.
- \* Drag and drop the desired table or schema onto the Designer workspace.
- \* Talend Studio will automatically create the appropriate input component (e.g., tDBInput) configured with the connection and schema details.

By following these steps, you ensure a centralized and consistent approach to managing database connections and schemas, promoting reusability and reducing configuration errors.

### NEW QUESTION # 54

You need to share a connection between multiple database components in a Studio Job. Which component should you use?

- A. tDBOutput
- B. tDBRun
- C. tDBCommit
- D. tDBConnection

**Answer: D**

Explanation:

Comprehensive and Detailed Explanation:

In Talend, when multiple components need to share the same database connection, the tDBConnection component is used.

- \* tDBConnection (Correct Answer - Option D):
- \* This component establishes a database connection that can be reused by multiple database components (such as tDBInput, tDBOutput, and tDBRow) within the same Job.
- \* Reduces redundant connection creation, improving performance and efficiency.
- \* To use it, other database components must set "Use an existing connection" in their configuration.
- \* Why not other options?
- \* tDBOutput (Option A): Used for writing data to a database but does not manage shared connections.
- \* tDBRun (Option B): Used to execute a subJob but does not handle database connections.
- \* tDBCommit (Option C): Used for committing transactions, but it requires a shared connection (which tDBConnection provides).

#### NEW QUESTION # 55

After enabling the Observability Metric Collector metric generation located in the \etc\org.talend.ipaas.rt.observability.cfg, which additional configurations should you apply? Choose 2 answers.

- **A. Lifetime**
- B. Schedule the metrics generation using CRON based trigger
- **C. Frequency**
- D. Configure the time zone

**Answer: A,C**

Explanation:

Comprehensive and Detailed Explanation:

After enabling the Observability Metric Collector in Talend's configuration file (org.talend.ipaas.rt.observability.cfg), it's essential to set additional parameters to control the behavior of metric collection:

\* Frequency (Option C): Determines how often metrics are collected. Setting this ensures that data is gathered at appropriate intervals for monitoring needs.

\* Lifetime (Option D): Specifies how long the collected metrics are retained. This helps manage storage and ensures that outdated metrics are purged.

Configuring these parameters ensures that the metric collection aligns with organizational requirements for monitoring and performance analysis.

#### NEW QUESTION # 56

Which statements are true about the execution logs of a task running on a Remote Engine? Choose 2 answers.

- A. Logs are stored in Parquet format on the server where the Remote Engine is running.
- **B. Logs can be downloaded from Talend Management Console.**
- C. Logs are stored in an H2 database hosted on the server where the Remote Engine is running.
- **D. Logs are stored in the file system of the server where the Remote Engine is running.**

**Answer: B,D**

Explanation:

Comprehensive and Detailed Explanation:

When a task executes on a Talend Remote Engine, the execution logs are handled as follows:

\* Logs are stored in the file system of the server where the Remote Engine is running (Option A):

\* The Remote Engine writes execution logs to its local file system, typically in plain text or log formats. These logs provide detailed information about the task's execution and are essential for troubleshooting and monitoring.

\* Logs can be downloaded from Talend Management Console (Option C):

\* Talend Management Console (TMC) aggregates execution logs from Remote Engines, allowing users to access and download them directly through the TMC interface. This centralized access simplifies monitoring and debugging across multiple environments.

Why not other options?

\* Option B: While some components of Talend may use H2 databases for internal purposes, execution logs are not typically stored in an H2 database on the Remote Engine server.

\* Option D: Execution logs are generally stored in plain text or standard log formats, not in Parquet format. Parquet is a columnar storage file format commonly used for efficient data processing, not for logging purposes.

#### NEW QUESTION # 57

What are the key capabilities of Talend Cloud Data Preparation that improve data quality and accessibility? Choose 3 answers.

- **A. Transform**
- B. Format data
- **C. Standardize data**
- D. Discover
- **E. Cleanse data**

**Answer: A,C,E**

Explanation:

Comprehensive and Detailed Explanation:

Talend Cloud Data Preparation enhances data quality and accessibility through:

- \* Cleanse data (Option C):
- \* Identifying and correcting inaccuracies or inconsistencies to ensure data integrity.
- \* Transform (Option D):
- \* Modifying data structures or values to meet specific requirements or formats.
- \* Standardize data (Option E):
- \* Ensuring uniformity in data presentation and format, facilitating consistency across datasets.

Why not other options?

- \* Option A: Discovery is typically associated with data profiling, not preparation.
- \* Option B: Formatting is a subset of transformation and standardization processes.

## NEW QUESTION # 58

.....

Our Talend-Core-Developer practice guide is cited for the outstanding service. In fact, we have invested many efforts to train our workers. All workers will take part in regular training to learn our Talend-Core-Developer study materials. So their service spirits are excellent. We have specific workers to be responsible for answering customers' consultation about the Talend-Core-Developer Learning Materials. All our efforts are aimed to give the best quality of Talend-Core-Developer exam questions and best service to our customers.
