

最真實C_ACDET_2506認證考古試題及參考答案

從Google Drive中免費下載最新的Testpdf C_ACDET_2506 PDF版考試題庫：<https://drive.google.com/open?id=1YUaVupJCLw47QoVeIQF5CAeZVv3po-nx>

我們Testpdf SAP的C_ACDET_2506考試學習指南可以成為你職業生涯中的燈塔，因為它包含了一切需要通過的C_ACDET_2506考試，選擇我們Testpdf，可以幫助你通過考試，這是個絕對明智的決定，因為它可以讓你從那些可怕的研究中走出來，Testpdf就是你的幫手，你可以得到雙倍的結果，只需要付出一半的努力。

SAP C_ACDET_2506 考試大綱：

主題	簡介
主題 1	<ul style="list-style-type: none">• Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.
主題 2	<ul style="list-style-type: none">• Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.
主題 3	<ul style="list-style-type: none">• Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.

SAP C_ACDET_2506熱門證照，C_ACDET_2506考試指南

Testpdf考題大師的C_ACDET_2506權威考試考古題軟體是SAP證照廠商的授權產品，C_ACDET_2506試題都是考試原題的完美組合，覆蓋率95%以上，答案由多位專業資深講師原版破解得出，正確率100%。提供2種SAP C_ACDET_2506考題大師版本供你選擇，分別是軟體版本C_ACDET_2506考試考古題和PDF格式C_ACDET_2506考試考古題。

最新的 SAP Certified Associate C_ACDET_2506 免費考試真題 (Q34-Q39):

問題 #34

Which SAP Ariba solutions are included in SAP Ariba Strategic Sourcing Suite? Note: There are 2 correct answers to this question.

- A. SAP Ariba Buying and Invoicing
- B. SAP Ariba Category Management
- C. SAP Ariba Contracts
- D. SAP Ariba Supplier Lifecycle and Performance

答案: B,C

問題 #35

A customer requests a dynamic list from CSV. Which field type supports that?

- A. Hyperlink
- B. Single-Select Enum
- C. Computed Field
- D. Flex Master Data-based field

答案: D

解題說明:

TheFlex Master Data (FMD)-based fieldtype supports dynamic lists sourced from CSV uploads. FMD fields act like advanced picklists that can contain thousands of values, imported via CSV templates defining the master data structure and entries. These fields are searchable, scalable, and ideal for large or frequently changing datasets.

Single-select enumerations are static lists manually defined and cannot import large CSV datasets. Computed fields calculate values dynamically based on expressions and are not designed for listing selectable values.

Hyperlink fields store URLs, unrelated to selection lists.

FMD fields are the preferred approach when a customer requires large or frequently updated lookup lists in sourcing projects or contracts.

問題 #36

You have defined a custom field to have a default value based on another field. You have verified that the defaulting happens correctly the first time. However, when the dependent field changes value, your custom field does not change. What scenarios could cause this? (Select 3 correct answers)

- A. The custom field has the property Lock Initial value enabled, which prohibits a field to be changed once it's set
- B. The parameter Application.Base.RecomputeValueOnFieldChange is not enabled
- C. Your custom field has the property Respect User Value enabled, and the user has manually entered another value into the field
- D. The defaulting Expression sets a value that violates the custom field Validity Condition
- E. Your dependent field does not have the property Refresh screen on value change enabled

答案: B,C,E

解題說明:

* B:If the dependent field isn't configured to refresh the UI when its value changes (no "Refresh screen on value change" enabled), the defaulting logic won't retrigger.

* C:The global parameter Application.Base.RecomputeValueOnFieldChange must be enabled so that dependent default expressions recalculate on field changes; otherwise, they won't update automatically.

* E:The "Respect User Value" property, when enabled, means that if a user manually overrides the default, the system will not recalculate or overwrite the field even if dependencies change.Lock Initial Value (A) prevents edits after first default but doesn't affect recomputation, and violating validity (D) would trigger an error, not silently block updates.

問題 #37

The full SAP Ariba Strategic Sourcing suite baseline (Greenfield baseline scenario) has been applied to the customer Test site. The

customer and project team will configure SAP Ariba Sourcing and deploy that to the Production site, then configure and deploy the remaining solutions in stages. What does this mean for subsequent migration activities?

- A. Both SAP Ariba Sourcing as well as subsequent migration activities would be Brownfield deployments.
- B. If the baseline applied the full suite, the full suite must be configured and migrated to production at the same time.
- C. Subsequent migration activities will require a complete reconfiguration of existing solutions.
- **D. Subsequent migration activities follow Bluefield deployment scenario.**

答案： D

解題說明：

In SAP Ariba deployments, when a full Greenfield baseline has been applied initially-meaning a fresh, full suite setup on the Test site-and the customer deploys a single solution (like Sourcing) to Production first, all subsequent deployments follow a Bluefield scenario. This means that later stages of deployment (e.g., Contracts, Supplier Risk) involve selective migration and incremental configuration changes to Production without rebuilding everything from scratch. Bluefield scenarios specifically accommodate environments where Production may already be live with transactions, requiring careful selective migration to avoid disruption. This contrasts with Brownfield, which typically involves upgrading or reusing existing deployments without full baseline resets. Also, Greenfield deployments do not require all suite components to migrate simultaneously; phased deployments are supported. This approach ensures minimal risk during deployment and provides flexibility to roll out additional modules progressively. Extract summary:SAP Ariba documentation highlights Bluefield for phased, incremental deployments post Greenfield baseline application to accommodate live production environments.

問題 #38

Which of the following accurately describes the migration of flex master data templates using the migration tool?

- **A. The templates are migrated by the tool, but the data must be loaded manually later.**
- B. Neither the templates nor the data is migrated using the tool
- C. Both the templates and their data are fully migrated by the tool.
- D. Only the data of the flex master data templates is migrated; templates must be created manually.

答案： A

問題 #39

.....

成千上萬的IT考生通過使用我們的產品成功通過考試，SAP C_ACDET_2506考古題質量被廣大考試測試其是高品質的。我們從來不相信第二次機會，因此給您帶來的最好的SAP C_ACDET_2506考古題幫助您首次就通過考試，并取得不錯的成績。Testpdf網站幫助考生通過C_ACDET_2506考試獲得認證，不僅可以節約很多時間，還能得到輕鬆通過C_ACDET_2506考試的保證，這是IT認證考試中最重要的一項考試之一。
