

Salesforce Analytics-Con-301 Fragen und Antworten, Salesforce Certified Tableau Consultant Prüfungsfragen

Der Vorhang der Lebensbühne wird jederzeit geöffnet werden. Die Hauptsache ist, ob Sie spielen wollen oder einfach weglaufen. Diejenigen, die die Chancen ergreifen können, können Erfolg erlangen. Deshalb müssen Sie PrüfungFrage wählen. Sie können jederzeit Ihre Fertigkeiten zeigen. Die Prüfungsmaterialien zur Salesforce Analytics-Con-301 Zertifizierungsprüfung von PrüfungFrage ist die effiziente Methode, die Analytics-Con-301 Prüfung zu bestehen. Mit Analytics-Con-301 Zertifikat können Sie Ihren Traum verwirklichen und Erfolg erlangen.

Die Schulungsunterlagen zur Analytics-Con-301 Zertifizierungsprüfung von PrüfungFrage sind in der Form von PDF und Software angeboten. Sie umfassen die Fragen und Antworten zur Analytics-Con-301 Zertifizierungsprüfung. Sie können vielleicht auch den realen Prüfungsaufgaben hier begegnen. Alle diesen Fragen sind perfekt und wirksam. Sie können alle Salesforce Analytics-Con-301 Zertifizierungsprüfungen bestehen. Die Salesforce Analytics-Con-301 Zertifizierungsprüfungen von PrüfungFrage umfassen alle Planprogramme und sowie komplizierte Fragen. Die Fragen und Antworten zur Salesforce Analytics-Con-301 Zertifizierungsprüfung von PrüfungFrage sind die realen Herausforderungen. Sie müssen Ihre Fähigkeiten und Denkweisen entfalten.

Analytics-Con-301 Musterprüfungsfragen - Analytics-Con-301Zertifizierung & Analytics-Con-301Testfragen

Vielleicht mit zahlreichen Übungen fehlt Ihnen noch die Sicherheit für Salesforce Analytics-Con-301 Prüfung. Falls Sie nach dem Kauf unserer Prüfungsunterlagen leider nicht Salesforce Analytics-Con-301 bestehen, bieten wir Ihnen eine volle Rückerstattung. Aber wir glauben, dass unsere Prüfungssoftware, die unseren Kunden eine Bestehensrate von fast 100% angeboten hat, wird Ihre Erwartungen nicht enttäuschen!

Salesforce Analytics-Con-301 Prüfungsplan:

Thema	Einzelheiten

Thema 1	• Data Management: This part focuses on establishing governance and support for published content. Tableau Consultants are expected to manage data security, publish and maintain data sources and workbooks, and oversee content access. It includes applying governance best practices, using metadata APIs, and supporting administration functions to maintain data integrity and accessibility.
Thema 2	• Data Analysis: This domain targets Tableau Consultants to plan and prepare data connections effectively. It includes recommending data transformation strategies, designing row-level security (RLS) data structures, and implementing advanced data connections such as Web Data Connectors and Tableau Bridge. Skills in specifying granularity and aggregation strategies for data sources across Tableau products are emphasized.
Thema 3	• Business Consulting: For Tableau Consultants, this section involves designing and troubleshooting calculations and workbooks to meet advanced analytical use cases. It covers selecting appropriate chart types, applying Tableau's order of operations in calculations, building interactivity into dashboards, and optimizing workbook performance by resolving resource-intensive queries and other design-related issues.
Thema 4	• Data Visualization: This section evaluates the Tableau Consultant's ability to design effective visual analytics solutions. It involves creating dashboards and visual reports that enhance user understanding, employing techniques like dynamic actions and advanced chart types, and ensuring performance optimization for an interactive user experience.

Salesforce Certified Tableau Consultant Analytics-Con-301 Prüfungsfragen mit Lösungen (Q42-Q47):

42. Frage

A new Tableau user created a simple dashboard on Tableau Server using supply chain data. Now, the user wants to know if they created the dashboard in accordance with specific performance best practices.

Which approach should the consultant recommend for the client to make this determination?

- A. Use Performance Recording in Tableau Desktop.
- B. Use Performance Recording on Tableau Server.
- C. Use inbuilt dashboards in Tableau Server to troubleshoot the performance.
- **D. Run Workbook Optimizer.**

Antwort: D

Begründung:

The Workbook Optimizer is a tool specifically designed to evaluate a workbook against performance best practices. It provides feedback on key design characteristics and offers concrete guidance on how to improve workbook performance. This tool is beneficial for both new and experienced Tableau users to ensure their dashboards are optimized for performance¹.

References: The Workbook Optimizer's functionality is detailed in Tableau's official documentation, which explains how it assesses workbooks against a set of rules derived from best practices¹. Additionally, the Performance Recording feature in Tableau Desktop and Server can be used to identify performance issues, but the Workbook Optimizer gives a more comprehensive analysis of the workbook's adherence to best practices²³.

43. Frage

A client has a large data set that contains more than 10 million rows.

A consultant wants to calculate a profitability threshold as efficiently as possible. The calculation must classify the profits by using the following specifications:

- . Classify profit margins above 50% as Highly Profitable.
- . Classify profit margins between 0% and 50% as Profitable.
- . Classify profit margins below 0% as Unprofitable.

Which calculation meets these requirements?

- **A. IF [ProfitMargin]>=0.50 Then 'Highly Profitable'
ELSEIF [ProfitMargin]>=0 Then 'Profitable'
ELSE 'Unprofitable'
END**

- B. IF [ProfitMargin]>0.50 Then 'Highly Profitable'
ELSEIF [ProfitMargin]>=0 Then 'Profitable'
ELSEIF [ProfitMargin] <0 Then 'Unprofitable'END
- C. IF [ProfitMargin]>0.50 Then 'Highly Profitable'
ELSEIF [ProfitMargin]>=0 Then 'Profitable'
ELSE 'Unprofitable'
END
- D. IF([ProfitMargin]>=0.50,'Highly Profitable', 'Profitable')ELSE 'Unprofitable'END

Antwort: A

Begründung:

The correct calculation for classifying profit margins into categories based on specified thresholds involves the use of conditional statements that check ranges in a logical order:

* Highly Profitable Classification: The first condition checks if the profit margin is 50% or more. This must use the ">=" operator to include exactly 50% as "Highly Profitable".

* Profitable Classification: The next condition checks if the profit margin is between 0% and 50%.

Since any value falling at or above 50% is already classified, this condition only needs to check for values greater than or equal to 0%.

* Unprofitable Classification: The final condition captures any remaining scenarios, which would only be values less than 0%.

References:

Logical Order in Conditional Statements: It is crucial in programming and data calculation to ensure that conditions in IF statements are structured in a logical and non-overlapping manner to accurately categorize all possible values.

44. Frage

A client wants to provide sales users with the ability to perform the following tasks:

- * Access published visualizations and published data sources outside the company network.
- * Edit existing visualizations.
- * Create new visualizations based on published data sources.
- . Minimize licensing costs.

Which site role should the client assign to the sales users?

- A. Creator
- B. Viewer
- C. Site Administrator
- **D. Explorer (can publish)**

Antwort: D

Begründung:

The Explorer (can publish) site role in Tableau is designed for users who need to access, edit, and create visualizations based on published data sources, even when they are outside the company network. This role allows users to perform web editing and save their work, making it suitable for sales users who need these capabilities. It is also a cost-effective option as it does not require the full capabilities and associated costs of the Creator license.

References: The information about the Explorer (can publish) role and its capabilities can be found in the official Tableau documentation on site roles and permissions¹². This role is appropriate for users who need to interact with published content and create new visualizations without the need for full site administration or advanced content creation tools that come with the Creator role³.

45. Frage

A client is migrating their data warehouse. They visualize the data in workbooks hosted on Tableau Server with Tableau Data Management enabled and want to see how many workbooks will be impacted.

What should the consultant do to quickly identify how many workbooks will be impacted?

- A. Leverage the Tableau Developer API to query the workbooks' metadata.
- B. Open each workbook and identify the data source.
- **C. In Tableau Server, select the database from External Assets, then select the Lineage tab.**
- D. Complete the migration and let users report errors as they are noticed.

Antwort: C

Begründung:

Comprehensive and Detailed Explanation From Exact Extract:

When Tableau Data Management is enabled, Tableau Catalog provides Lineage capabilities that map connections between:

- * External databases
- * Tables
- * Data sources
- * Workbooks
- * Fields

Tableau documentation states that the Lineage tab for any external asset (such as a database or table):

- * Shows all connected workbooks
- * Shows dependencies and impact analysis
- * Allows admins to instantly assess how many analytics assets will be affected by a data warehouse migration Option A directly uses Tableau Catalog to perform exactly this task.

Option B is unnecessary because the Catalog lineage tool already provides this information without development effort.

Option C is completely inappropriate because it offers no analysis or planning.

Option D is too time-consuming and unnecessary, especially when Tableau Catalog provides an automated dependency map.

Therefore, the correct method is to use the Lineage tab in External Assets.

- * Tableau Catalog lineage documentation showing how to view impacted workbooks.
- * External Assets and data source dependency features in Tableau Data Management.
- * Impact analysis best practices for data warehouse migration using Tableau Catalog.

46. Frage

A client is working in Tableau Prep and has a field named OrderId that is compiled by country, year, and an order number as shown in the following table.

OrderId
CA-2017-152156
FR-2017-152157
US-2017-152158
CA-2017-152159

They want to transform the table to appear as shown.

OrderId	Country	OrderNumber
CA-2017-152156	CA	152156
FR-2017-152157	FR	152157
US-2017-152158	US	152158
CA-2017-152159	CA	152159

What should the consultant use to transform the table in the most efficient manner?

- A. The Aliases option
- **B. The Split option**
- C. A calculated field that uses the LEFT function
- D. A calculated field that uses the TRIM function

Antwort: B

Begründung:

To transform the OrderId field in Tableau Prep, the Split option is the most efficient and straightforward method. Here's how you can apply it:

In Tableau Prep, drag your dataset into the flow.

Click on the OrderId field in the workspace to select it.

Look for the option in the toolbar that says "Split" and select it.

Choose "Automatic Split" if the delimiters (such as hyphens) are consistent; Tableau Prep should automatically detect the hyphen as the delimiter and split the OrderId into multiple new fields.

The dataset should now show new columns: one for the country code (CA, FR, US), one for the year (2017), and one for the order number (152156, 152157, etc.).

The Split option works effectively here because it automatically identifies and uses the hyphen as the delimiter to divide the original OrderId into the desired components without manual specification of conditions or writing any formulas.

References

This procedure is based on the standard functionalities provided in Tableau Prep for splitting a field into multiple columns based on a delimiter, as described in the Tableau Prep user guide.

47. Frage

.....

PrüfungFrage wird nicht nur Ihren Wunsch erfüllen, sondern Ihnen einen einjährigen kostenlosen Update-Service und Kundendienst bieten. Die Prüfungsfragen von PrüfungFrage sind alle richtig, die Ihnen beim Bestehen der Salesforce Analytics-Con-301 Zertifizierungsprüfung helfen. Im PrüfungFrage können Sie kostenlos einen Teil der Fragen und Antworten zur Salesforce Analytics-Con-301 Zertifizierungsprüfung als Probe herunterladen.
