Skills Tested in Microsoft MB-240 Exam

According to the blueprint of this test, candidates will need to demonstrate the following skills if they want to pass MB-240 exam:

- **Work order management**

Within this scope, the candidates will need to demonstrate their expertise in describing the lifecycle of a work order. Therefore, they should know how to configure work orders or booking status depending on the business context. Also, they should know how to manage and create work orders and be prepared for incident management. Managing and creating agreements is an additional topic included in this section. Overall, here, applicants will get to know more about functional locations, inspections, dashboards for field service metrics, incident kinds, automatic generation, invoices, and SLAs.

- **Field service mobility management**

This part includes topics dedicated to mobile app installation. Candidates will go through all configuration stages meaning that they will learn how to identify the requirements for the supported platforms. Also, they should be prepared to work offline and use the Field Service Mobile app for Dynamics 365 Remote Assistant and Connected Field Service. Another subtopic included in this section is dedicated to mobile app configuration. So, the candidates should know how to configure the steps and actions for Field Service Mobile management and application. Also, they should know how to configure sync filters and offline data, as well as customizing Mobile Offline capabilities.

- **Work order dispatch and scheduling**

Within this topic, the candidates' knowledge of managing scheduling options will be tested. Therefore, they should learn how to use Schedule Assistant and Board systems as well as configuring Quick Book features. Another subtopic included in this section focuses on implementing schedule boards. Thus, candidates should become skilled in identifying Booking Requirements features and use or know how to manually schedule work orders. Schedule Assistant implementation together with resource scheduling optimization is also tested in this chapter. The candidates should also demonstrate that they know how to configure Universal Resource scheduling. This means that they should become proficient in describing use cases for this system and restrict booking status values depending on the entity requirements.

MB-240 Reliable Test Prep - MB-240 Valid Test Sample

Many candidates find the Microsoft MB-240 exam preparation difficult. They often buy expensive study courses to start their Microsoft MB-240 certification exam preparation. However, spending a huge amount on such resources is difficult for many Microsoft MB-240 Exam applicants.

Microsoft MB-240 exam is a challenging test that requires a thorough understanding of Dynamics 365 Field Service concepts and principles. Candidates are expected to have practical experience in implementing and managing Dynamics 365 Field Service solutions, as well as knowledge of industry best practices and trends. Candidates who pass the MB-240 Exam can demonstrate their competence and expertise in Dynamics 365 Field Service and increase their chances of career advancement and professional development.

Microsoft Dynamics 365 Field Service Functional Consultant Sample Questions (Q131-Q136):

NEW QUESTION # 131

You are implementing Dynamics 365 for Field Service.

Your customer needs to understand how they can schedule the closest possible resource to a work order. The requirement further specifies it could be start of day from the company's site or during the middle of the day from an existing work order.

You need to provide them with the settings they need to properly configure so the closest resource is found when using the schedule assistant.

What should you suggest?

- A. Update the Resources Synchronization Timeout (in sec) setting within the Schedule Board Settings.
- B. Update the Load Default Filters on the Schedule Assistant.
- C. Update the Starting Location to Organization Unit within Schedule Board Settings.
- **D. Update the filter on the Scheduler core tool tips view.**

Answer: D
