We all know that C_ACDET_2506 learning guide can help us solve learning problems. But if it is too complex, not only can't we get good results, but also the burden of students' learning process will increase largely. Unlike those complex and esoteric materials, our C_ACDET_2506 Preparation prep is not only of high quality, but also easy to learn. For our professional experts simplified the content of the C_ACDET_2506 exam questions for all our customers to be understood.

SAP C_ACDET_2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.
Topic 2	<ul style="list-style-type: none">• Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.

Topic 3	<ul style="list-style-type: none"> • Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.

100% Pass Quiz Valid C_ACDET_2506 - Detailed SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Answers

Most of the materials on the market do not have a free trial function. Even some of the physical books are sealed up and cannot be read before purchase. As a result, many students have bought materials that are not suitable for them and have wasted a lot of money. Especially for those students who are headaches when reading a book, C_ACDET_2506 study tool is their gospel. Because doing exercises will make it easier for one person to concentrate, and at the same time, in the process of conducting a mock examination to test yourself, seeing the improvement of yourself will makes you feel very fulfilled and have a stronger interest in learning. C_ACDET_2506 Guide Torrent makes your learning process not boring at all.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q15-Q20):

NEW QUESTION # 15

What does ? represent in the ariba expression below? HierarchicalType=="SubAgreement" ? false: true

- A. then
- B. if
- C. else
- D. replace

Answer: A

NEW QUESTION # 16

Which Activate phase is tied to performing configurations in your SAP Ariba Strategic Sourcing suite solution?

- A. Deploy
- B. Configure
- C. Setup
- D. Realize

Answer: D

Explanation:

The Realize phase is where the core configuration activities happen. During Realize, the project team sets up system parameters, creates templates, defines master data fields, and configures business processes in the SAP Ariba Strategic Sourcing suite. This phase includes building, unit testing, and preparing the system for user acceptance testing. Deploy is focused on cutover and go-live, while Configure and Setup are not formal SAP Activate phases for Ariba.

NEW QUESTION # 17

A standard field is not available in reporting. A Greenfield customer needs to be able to report on the data captured in that standard field. How can this be achieved?

- A. Under Field Configurations, search for the field in the appropriate class, mark the field reportable, save and publish.

- B. Create a custom field that can be marked reportable, default the custom field to the standard field value, publish, and then pull the field into reporting
- C. The system makes all fields reportable after a system refresh.
- D. All standard fields are reportable by default.

Answer: B

Explanation:

Some standard fields in SAP Ariba are not reportable by design and cannot be made reportable through configuration changes. The recommended workaround is to create a custom field that is marked as reportable, then set its default value to the standard field's value using an expression. Once published, this custom field can be included in reports, effectively surfacing the data previously inaccessible for reporting. System refreshes do not convert non-reportable standard fields to reportable. Marking the original standard field as reportable is not possible if the option is disabled by design.

NEW QUESTION # 18

What is the key role of the SAP Deployment Lead assigned to the project?

- A. To act as the liaison between the customer and SAP Support in resolving technical issues and manage customer escalations
- B. To test and validate the solution prior to go-live
- C. To advise the customer and partner in solution configurations
- D. To perform configuration changes required to the SAP Ariba Strategic Sourcing suite solutions

Answer: A

Explanation:

The SAP Deployment Lead acts as the primary liaison between the customer and SAP Support, managing technical issues, escalations, and coordination during the deployment lifecycle. They oversee environment readiness, migration activities, and issue resolution. Advising on configurations is typically the Functional Lead's role, configuration changes are done by consultants, and testing is led by the customer or testing teams. The Deployment Lead focuses on technical project management and communication.

NEW QUESTION # 19

While working on editing a field for a customer, you notice that "Editable in full Contract Amendment" is not an option available in the advanced tab of field configuration. What is likely the cause for this behavior?
(Select 2 correct answers)

- A. A customization is in flight and needs to be cleared and reset prior to making this change.
- B. The field you are customizing is standard and therefore cannot be changed.
- C. The contract must be in an amendment state for this option to be visible in customizing.
- D. The field you are customizing is not in the contract workspace or request classes.

Answer: C,D

Explanation:

The "Editable in full Contract Amendment" option in SAP Ariba is available only when the contract is in an amendment status, meaning this option appears contextually when the contract supports amendment workflows. If the contract is not in amendment state, the option remains hidden (A).

Additionally, this option is only relevant for fields that belong to the Contract Workspace or Request field classes; fields outside these classes will not show amendment-specific editability options (C).

The presence or absence of this option is not related to ongoing customizations needing reset (B), nor is it restricted solely to custom or standard fields (D), as standard fields can also have this option if class-applicable.

NEW QUESTION # 20

.....

The more you can clear your doubts, the more easily you can pass the SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite (C_ACDET_2506) exam. TestKingIT C_ACDET_2506 practice test works amazingly to help you understand the C_ACDET_2506 exam pattern and how you can attempt the real SAP Exam Questions. It is just like the final C_ACDET_2506
