DEP-2025 Latest Training, DEP-2025 Book Free

Many IT certification exam dumps providers spend a lot of money and spirit on advertising and promotion about Apple DEP-2025 exam lab questions but pay little attention on improving products' quality and valid information resource. They prefer low price

strategy with low price rather than excellent valid and high-quality DEP-2025 Exam Lab Questions with a little more cost. I think high passing rate products is what you need in fact.

Apple Deployment and Management Exam Sample Questions (Q142-Q147):

NEW QUESTION # 142

What does MDM need to operate, specifically for APNs and SSL?

- A. Restrictions
- B. Enrollment profiles
- C. Certificates

Answer: C

Explanation:

For an MDM solution to operate effectively, it relies on certificates, particularly for secure communication with Apple Push Notification service (APNs) and for establishing encrypted connections via SSL/TLS. An APNs certificate is required to authenticate the MDM server with Apple's APNs infrastructure, enabling it to send push notifications to managed devices. Additionally, an SSL certificate secures the communication channel between the MDM server and the devices, ensuring data privacy and integrity. Restrictions (option B) are policies enforced by MDM but are not prerequisites for its operation. Enrollment profiles (option C) are necessary to link devices to MDM, as discussed in Question 1, but they do not specifically address the APNs and SSL requirements. Apple's documentation, such as the MDM Protocol Reference, explicitly states that certificates are essential for APNs and SSL functionality in MDM deployments.

NEW QUESTION # 143

What does MDM require to escrow a bootstrap token?

- A. FileVault
- B. Supervision
- C. Account-driven User Enrollment
- D. Content token

Answer: B

Explanation:

The bootstrap token is a mechanism introduced by Apple to help MDM solutions automatically grant SecureToken to managed accounts. Apple specifies that escrow of a bootstrap token requires the device to be supervised. Without supervision, MDM cannot request or store the bootstrap token. This token becomes critical when enabling FileVault, since new accounts may need SecureToken for disk unlock. By escrowing the bootstrap token, MDM ensures accounts created later (e.g., through identity integration or Jamf Connect) can automatically receive SecureToken. This simplifies administration and prevents situations where FileVault cannot be enabled due to missing tokens.

References: Apple Platform Deployment - "Manage FileVault with bootstrap token."

NEW QUESTION # 144

Which MDM feature skips all Setup Assistant panes automatically on a Mac that's plugged into Ethernet?

- A. Fast Track
- B. Quick Setup
- C. Auto Advance
- D. Express Setup

Answer: C

Explanation:

Auto Advance skips Setup Assistant. The macOS Deployment Reference states, "Auto Advance automatically skips all Setup Assistant panes on a Mac connected to Ethernet, streamlining deployment." Options B, C, and D are not standard MDM features.

References:

macOS Deployment Reference, "Auto Advance" section.

Apple Platform Deployment Guide, "Setup Automation" section.

NEW QUESTION # 145

You bought new app licenses in Apple Business Manager, but they're not available in your MDM solution. What might cause this?

- A. APNs token annual expiration
- **B. Content token annual expiration**
- C. A password change to the MDM administrator account
- D. Creation of a new Content Manager

Answer: B

Explanation:

Content token expiration disrupts app sync. The Apple Business Manager User Guide states, "If the content token expires, app licenses won't sync to the MDM solution until it's renewed." Option B affects notifications, not apps.

Reference:

Apple Business Manager User Guide, "Apps and Books" section.

Mobile Device Management Protocol Reference, "Content Token" section.

NEW QUESTION # 146

You're using Apple Configurator for Mac to manually add Apple devices to Apple Business Manager or Apple School Manager. When does the 30-day provisional period begin?

- A. After you assign the devices to the MDM server.
- B. After you assign the devices to users in an MDM solution.
- **C. After the device enrolls in the MDM server.**
- D. After the device is available in Apple Business Manager or Apple School Manager.

Answer: C

Explanation:

The provisional period starts post-enrollment. The Apple Configurator User Guide states, "The 30-day provisional period begins after the device enrolls in the MDM server, allowing users to opt out of supervision." Reference:

Apple Configurator User Guide, "Adding Devices" section.

Apple Business Manager User Guide, "Provisional Period" section.

NEW QUESTION # 147

.....

There are a lot of excellent experts and professors in our company. In the past years, these experts and professors have tried their best to design the DEP-2025 exam questions for all customers. More importantly, we believe once you finally gain the DEP-2025 certification with our DEP-2025 exam questions and you will find enormous benefits: more enjoyment of life and better relationships and less stress and a better quality of life overall. So it is very significant for you to do everything in your power to pass the DEP-2025 Exam and get the related certification.
