

# Associate 800-150 Level Exam, Reliable 800-150 Exam Tips

## Practice Exam

6. What is a key difference between Cisco IOS XE's Install Mode and Bundle Mode?

A. Install Mode requires more RAM during boot than Bundle Mode.  
B. Bundle Mode extracts packages during boot, increasing boot time.  
C. Install Mode does not support software sub-package patching.  
D. Bundle Mode is the recommended method by Cisco for IOS XE devices.

Answer: B

We believe that the best brands of 800-150 study materials are those that go beyond expectations. They don't just do the job – they go deeper and become the fabric of our lives. Therefore, our company as the famous brand, even though we have been very successful in providing 800-150 practice guide we have never satisfied with the status quo, and always be willing to constantly update the contents of our 800-150 Exam Torrent in order to keeps latest information about 800-150 exam. With our 800-150 exam questions, you can pass the 800-150 exam and get the dreaming certification.

By purchasing our TestInsides Cisco 800-150 dumps, you will finish the exam preparation. And then, you will get high quality tests questions and test answers. TestInsides Cisco 800-150 test is your friend which is worth trusting forever. Our TestInsides Cisco 800-150 Dumps Torrent provide certification training materials to the IT people in the world. It includes test questions and test answers. Quality product rate is 100% and customer rate also 100%.

## Reliable Cisco 800-150 Exam Tips | 800-150 Test Dump

If someone who can pass the exam, they can earn a high salary in a short time. If you decide to beat the exam, you must try our 800-150 exam torrent, then, you will find that it is so easy to pass the exam. You only need little time and energy to review and prepare for the exam if you use our Supporting Cisco Devices for Field Technicians prep torrent as the studying materials. So it is worthy for them to buy our product. We provide the introduction of the features and advantages of our 800-150 Test Prep as follow so as to let you have a good understanding of our product before your purchase.

## Cisco 800-150 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Cisco Infrastructure and Collaboration Infrastructure: This section of the exam measures the skills of a Collaboration Engineer and focuses on Cisco infrastructure devices, endpoints, and collaboration technologies. It introduces network devices, collaboration endpoints like IP phones and video systems, and explains on-premises collaboration deployments using tools like Cisco Unified Communications Manager. It also covers how video systems integrate into collaboration environments and highlights Cisco's cloud services for enterprise communication, including Webex Meetings, Webex Teams, and hosted collaboration solutions.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>Common Service Tasks and Tools: This section of the exam measures the skills of a Technical Support Engineer and focuses on tasks commonly needed to manage Cisco devices. It explains how devices boot up, introduces common Cisco IOS commands, and identifies tools for file management. It shows how to confirm physical connections, remotely access devices, and connect to the console port. It also covers how to capture the status of a device, recover passwords, and replace devices by using proper tools. Students are also taught how to find serial numbers on Cisco equipment to assist with support and maintenance activities.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Cisco Hardware Replacement: This section of the exam measures the skills of a Technical Support Engineer and teaches how to safely and correctly replace Cisco hardware. It explains safety procedures such as creating safe work zones and handling electrostatic discharge. Students learn the step-by-step processes to replace a wide range of Cisco devices, from switches and routers to firewalls, UCS servers, and collaboration endpoints. It also covers configuring Cisco NX-OS software, including understanding operating modes, boot procedures, and password recovery, and introduces Cisco collaboration endpoint solutions like IP phones and video systems.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Cisco Software: This section of the exam measures the skills of a Network Engineer and discusses Cisco's software systems and licensing. It explains the difference between IOS install and bundle modes and gives an overview of different licensing models. Students learn how to manage Cisco software images, including backing up, transferring, and installing images via FTP, TFTP, or USB. It also covers how to handle configuration files to keep devices running properly and ensure smooth upgrades or replacements.</li> </ul>

## Cisco Supporting Cisco Devices for Field Technicians Sample Questions (Q24-Q29):

### NEW QUESTION # 24

Which two cloud computing services are vendor-managed in an Infrastructure as a Service (IaaS) delivery model? (Choose two.)

- A. Applications
- B. Operating System
- C. Storage**
- D. Networking**
- E. Data

**Answer: C,D**

Explanation:

In the Infrastructure as a Service (IaaS) model, the cloud provider is responsible for managing and maintaining the underlying infrastructure components, including:

Networking: The cloud provider handles all aspects of network configuration, hardware, and virtual networking.

Storage: The cloud provider supplies and manages the physical and virtual storage infrastructure required to support the consumer's data needs.

The customer is responsible for managing:

Operating Systems

Applications

Data

This model offers flexibility while shifting infrastructure maintenance responsibilities to the service provider.

### NEW QUESTION # 25

What is the purpose of the pre-service checklist in the endpoint replacement process?

- A. To gather information about the replacement unit
- B. To ensure all necessary tools and personnel are available**
- C. To verify the current configuration settings of the endpoint
- D. To test the functionality of the existing endpoint

**Answer: B**

Explanation:

A pre-service checklist is a procedural step followed before replacing an endpoint. Its primary purpose is to confirm that all resources, tools, documentation, and personnel are in place to execute the replacement efficiently and without delays. It helps avoid service interruptions and ensures a smooth replacement by ensuring that every necessary component and action is accounted for ahead of time.

**NEW QUESTION # 26**

Refer to the exhibit. Drag and drop the steps in the TCP/IP encapsulation process from the left onto the corresponding layer on the right.

**Answer:**

Explanation:

Explanation:

The FLDTEC training describes the TCP/IP encapsulation as a step-by-step process where data is passed down through the layers of the TCP/IP model:

Application Layer: User data is created (email, file, request) and the application layer adds the application header, creating a data payload.

Transport Layer: The data is segmented. Each segment receives a transport-layer header (TCP/UDP), enabling proper sequencing and error handling at the destination.

Internet Layer: Segments are encapsulated into packets (IP datagrams), with an IP header added to facilitate routing between networks.

Link Layer: Finally, packets are framed with Layer 2 headers and trailers (including the Frame Check Sequence for error detection), creating a frame ready to be transmitted on the physical medium.

This layered encapsulation ensures interoperability and troubleshooting clarity, which is why it is emphasized in FLDTEC's IOS Software Basics module.

**NEW QUESTION # 27**

Refer to the exhibit.

Refer to the exhibit. Which component is highlighted on the Cisco I/O module image?

- A. fixed port
- B. fan module LED
- C. captive screw
- D. chassis connections LED

**Answer: D**

Explanation:

The highlighted component on the Cisco I/O module is the chassis connections LED, which indicates the status of connectivity between the I/O module and the chassis.

In the exhibit, the orange arrow points to a small rectangular LED indicator located to the left side of the I/O module (Cisco UCS-IOM-2304). This specific LED is not aligned with the ports, fans, or screws, which helps identify it correctly.

Chassis connections LED (B) is responsible for indicating the status of uplink/downlink communication between the I/O module and the chassis.

Green usually indicates a healthy link.

Amber or off may indicate a problem or no connection.

Why the other answers are incorrect:

A . Captive screw → These are at the far corners, not where the arrow points.

C . Fan module LED → This IOM doesn't have user-visible fan LEDs at the front face.

D . Fixed port → These are the large rectangular SFP ports clearly visible in the middle, not near the arrow.

This identification is important when troubleshooting chassis-to-IOM connectivity or verifying module status LEDs during field maintenance.

**NEW QUESTION # 28**

What is the function of an access layer device?

- A. Connects remote offices to the main corporate network
- B. Provides high-speed data transport between buildings or different parts of the campus
- C. Serves as the entry point for end-user devices to connect to the network
- D. Provides secure external access to internal network components

**Answer: C**

### Explanation:

In the hierarchical network design model, the access layer is the first layer and serves as the entry point for end-user devices to connect to the network. This layer connects user devices such as PCs, IP phones, wireless access points, printers, and scanners to the network. It facilitates the initial connection between end-user devices and the network infrastructure. The access layer also enforces security policies and provides services such as VLAN membership, port security, and Quality of Service (QoS). Options A, C, and D refer to functions typically associated with the core or distribution layers, or with WAN connectivity, rather than the access layer.

## NEW QUESTION # 29

There are rare products which can rival with our products and enjoy the high recognition and trust by the clients like our products. Our products provide the 800-150 test guide to clients and help them pass the test 800-150 certification which is highly authorized and valuable. Our company is a famous company which bears the world-wide influences and our 800-150 Test Prep is recognized as the most representative and advanced study materials among the same kinds of products. Whether the qualities and functions or the service of our product, are leading and we boast the most professional expert team domestically.
