

Real MikroTik MTCNA Questions - Tips And Tricks To Pass Exam

DOWNLOAD the newest PassCollection MTCNA PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=1kDhgx_JRbSIUBe7j4MG0TCM2qqff51wu

If you are a college student, you can learn and use online resources through the student learning platform over the MTCNA study materials. On the other hand, the MTCNA study engine are for an office worker, free profession personnel have different learning arrangement, such extensive audience greatly improved the core competitiveness of our products, to provide users with better suited to their specific circumstances of high quality learning resources, according to their aptitude, on-demand, maximum play to the role of the MTCNA Exam Question.

MikroTik is a Latvian company that produces networking equipment and software for data communication. The company's products are used by various organizations around the world, including internet service providers, enterprises, and home users. MikroTik's technology is known for its reliability, affordability, and flexibility. To ensure that its users have the necessary knowledge and skills to utilize its technology to the fullest, MikroTik offers a certification program.

New Guide MTCNA Files - MTCNA Braindumps Downloads

The passing rate of our MTCNA study materials is the issue the client mostly care about and we can promise to the client that the passing rate of our product is 99% and the hit rate is also high. Our MTCNA practice braindumps are selected strictly based on the Real MTCNA Exam and refer to the exam papers in the past years. Our expert team devotes a lot of efforts on them and guarantees that each answer and question is useful and valuable.

MikroTik MTCNA certification exam is an entry-level certification exam that is ideal for network administrators, IT professionals, and individuals who are interested in pursuing a career in computer networking. MikroTik Certified Network Associate Exam certification exam provides candidates with the knowledge and skills required to configure and manage MikroTik routers and wireless devices. Additionally, the certification exam covers various networking concepts such as network addressing, routing, and switching, making it a comprehensive certification program. Upon passing the certification exam, candidates will receive the MikroTik MTCNA Certification, which is a valuable credential that can help them advance their career in the field of computer networking.

MikroTik Certified Network Associate Exam Sample Questions (Q183-Q188):

NEW QUESTION # 183

What does a VLAN do?

- A. Provides multiple broadcast domains within a single collision domain.

- B. Acts as the fastest port to all servers.
- C. Provides multiple collision domains on one switch port.
- D. Breaks up broadcast domains in a layer 2 switch internetwork.

Answer: D

NEW QUESTION # 184

How many collision domains are created when you segment a network with a 12-port switch?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: C

Explanation:

Each port on a switch creates its own collision domain. Unlike hubs (which extend a single collision domain), switches segment each interface, allowing full-duplex communication and eliminating collisions.

MTCNA Course Material - Ethernet Switching Concepts:

"Each switch port is a separate collision domain. A 24-port switch creates 24 separate collision domains." Rene Meneses MTCNA Study Guide - Collision and Broadcast Domains:

"Switches break up collision domains per port, unlike hubs."

Therefore, a 12-port switch creates 12 individual collision domains.

NEW QUESTION # 185

Which firewall chain should you use to filter SSH access to the router itself?

- A. output
- B. input
- C. forward
- D. prerouting

Answer: B

Explanation:

SSH access to the router targets the router itself. Therefore, any packets destined for the router (for example, to TCP port 22) are evaluated in the input chain of the firewall.

Evaluation:

* A. output ##For packets originating from the router, not to it.

* B.#input # Correct - handles traffic destined for the router (like SSH, Winbox, etc.)

* C.#prerouting # Used for NAT and mangle operations, not filtering

* D.#forward # Used for traffic routed through the router (not for router itself) MTCNA Firewall Section - Chain Functions:

"SSH access to the router is incoming traffic. Use input chain to filter or allow it." Rene Meneses Guide - Access Protection:

"input chain is responsible for traffic to the router's IP - block/allow SSH, Winbox, etc." Terry Combs Notes - Firewall Management:

"Always use input chain for filtering incoming management protocols like SSH."

NEW QUESTION # 186

The basic unit of a physical network (OSI Layer 1) is the:

- A. Header
- B. Byte
- C. Bit
- D. Frame

Answer: C

Explanation:

The OSI Layer 1, also known as the Physical Layer, is responsible for the transmission and reception of raw binary data over a physical medium. The most fundamental unit at this layer is the bit.

- * Bit = Binary Digit (0 or 1)
- * It is transmitted over physical media (cables, radio signals, etc.)
- * Frames (A) exist at Layer 2 (Data Link Layer), not Layer 1.
- * Bytes (C) are groups of 8 bits, but bits are still the smallest indivisible transmission unit.
- * Headers (D) are metadata used at Layers 2-7; not relevant to Layer 1.

MTCNA Official Training Manual - OSI Model Chapter:

"Layer 1 transmits raw bits over a transmission medium. These bits form the foundation for higher-layer data structures." Rene Meneses MTCNA Guide - OSI Model Breakdown:

"Physical Layer (Layer 1) carries bits, not frames or bytes. It's concerned with voltages, cables, connectors, and signal encoding."

Terry Combs Notes - OSI Layers:

"Layer 1 = Bits. Nothing more. Frames come into play in Layer 2."

answer: B

NEW QUESTION # 187

In which situations Netinstall can not be used to install RouterOS on a RouterBOARD?

- A. The router is connected only to a secondary Ethernet port
- B. The password of the router is not known
- C. The router does not have an operating system
- **D. The router is connected only to a wireless network**

Answer: D

NEW QUESTION # 188
