

Exam Plat-Dev-210 Overviews, Valid Plat-Dev-210 Practice Questions

What's more, part of that Itbraindumps Plat-Dev-210 dumps now are free: <https://drive.google.com/open?id=1LdFVwWmpNSL8BDEXYnA-pcVmOPycIIdn>

Similarly, Itbraindumps offers up to 1 year of free Salesforce Plat-Dev-210 exam questions updates if in any case, the content of Salesforce Certified Omnistudio Developer (Plat-Dev-210) certification test changes. Itbraindumps provides its product in three main formats i.e., Salesforce Plat-Dev-210 Dumps PDF, Web-Based Salesforce Certified Omnistudio Developer (Plat-Dev-210) Practice Test, and Desktop Plat-Dev-210 Practice Exam Software.

Salesforce Plat-Dev-210 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • Expression Sets & Decision Matrices: This section measures the skills of a Logic Designer and covers the configuration and application of Expression Sets and Decision Matrices within Omnistudio tools. It requires demonstrating an understanding of how Expression Sets evaluate conditions and how Decision Matrices use rule-based logic to determine outcomes. This knowledge is essential for automating decisions and streamlining complex business processes.
Topic 2	<ul style="list-style-type: none"> • Flexcards: This section of the exam measures the skills of a Solution Architect and covers the ability to design and configure FlexCards based on specific business requirements. It evaluates the candidate's knowledge in selecting appropriate card styles, defining data sources and fields, and implementing user actions across different card states. Additionally, this domain tests the understanding of constructing the underlying JSON data structure that powers the FlexCards framework, ensuring that the configured cards meet both functional and technical specifications.
Topic 3	<ul style="list-style-type: none"> • Integration Procedures: This section measures the skills of an Integration Architect and involves designing and configuring Integration Procedures to automate processes and integrate systems. It requires comparing and contrasting different elements and configurations within Integration Procedures to meet specific use cases. Candidates are also tested on selecting the correct elements and properties to satisfy functional requirements, ensuring seamless data flow and process automation.

Valid Plat-Dev-210 Practice Questions - Valid Plat-Dev-210 Exam Pass4sure

The clients only need 20-30 hours to learn the Plat-Dev-210 exam questions and prepare for the test. Many people may complain that we have to prepare for the Plat-Dev-210 test but on the other side they have to spend most of their time on their most important things such as their jobs, learning and families. But if you buy our Plat-Dev-210 Study Guide you can both do your most important thing well and pass the Plat-Dev-210 test easily because the preparation for the test costs you little time and energy.

Salesforce Certified Omnistudio Developer Sample Questions (Q54-Q59):

NEW QUESTION # 54

An integration Procedure uses an HTTP action to make a REST API call. The response from the REST API must be converted into a specific XML structure before sending it as an input to another external web service.

How should the developer configure the Integration Procedure to meet this requirement?

- **A. Use a DataRaptor Transform to convert JSON to XML**
- B. Use a Remote Action that calls the XMLStreamReader class
- C. Use a DataRaptor Extract and check the XML checkbox on the Output JSON Path.
- D. Use a Remote Action that calls the XMLStreamWriter class

Answer: A

Explanation:

According to the OmniStudio Developer Guide, "DataRaptor Transform actions can convert JSON to XML and vice versa." Therefore, the correct answer is C.

NEW QUESTION # 55

A developer creates an Integration Procedure with a Set values and a DataRaptor Extract Action that requires AccountId as a key. When the developer previews the Integration Procedure, the developer enters the AccountId correctly and executes the preview.

The developer sees the data extracted by the DataRaptor in the Debug Log, but the response is empty.

What is the likely cause of this issue?

- **A. The DataRaptor Action did not have the Add Response To Response JSON property set to true.**
- B. The Response cannot be previewed directly.
- C. The AccountId used for the preview is invalid.
- D. A Response Action was not added to the Integration Procedure.

Answer: A

Explanation:

The Add Response To Response JSON property on the DataRaptor Action indicates that the output of the DataRaptor should be added to the response JSON of the Integration Procedure. If this property is not set to true, the response will be empty even if the DataRaptor extracts data successfully.

NEW QUESTION # 56

Which two of these options can a developer use to retrieve data from a Salesforce object?

Choose 2 answers

- **A. A DataRaptor Load Action**
- **B. A Lookup Input Element**
- C. A DataRaptor Extract Action
- D. A DataRaptor Post Action

Answer: A,B

Explanation:

A DataRaptor Load Action can be used to retrieve data from a Salesforce object by specifying the object name, fields, and filter criteria. A Lookup Input Element can be used to retrieve data from a Salesforce object by allowing the user to search for a record using a lookup field

NEW QUESTION # 57

An integration procedure contains a Remote Action element that calls a method of an APEX class. The method requires two fields are input: Account id and Product Id. The integration Procedure data JSON contains the following nodes:
How should the Remote Action element be configured to pass the data correctly to the method?

- A. Add the following to Send JSON Path: accountId: %Accountd% ProductId% Details Products%
- **B. Check the Send Only Additional Input checkbox, and the following/ value pairs to Additional input:**
- C. Set Return Only Additional Output to true, and add the following Key/Value pairs to additional input.
- D. Check the DataRaptor Transform checkbox, and add the following Key/Value pairs to Output JSON Path:

Answer: B

Explanation:

Checking the Send Only Additional Input checkbox allows the Remote Action element to send only the key /value pairs specified in Additional input to the Apex method. The Additional input should have the same keys as the method parameters, and the values should be set to `{{InputData.node}}` for each node. For example, AccountId: `{{InputData.AccountId}}` and ProductId: `{{InputData.Details.Products}}`.

NEW QUESTION # 58

Which two fields in an Integration Procedure can use a function like CONCAT or DATEDIFF?
Choose 2 answers

- A. In a Remote Action, in a Remote Options value field.
- **B. In a Response Action, in an Additional input value field.**
- C. In Procedure Configuration, in a Tracking Custom Data value field.
- **D. In a Remote Action, in an Additional Output value field.**

Answer: B,D

Explanation:

According to the Integration Procedure Actions page, a Remote Action can use a function in an Additional Output value field or in a Remote Options value field. According to the Response Actions page, a Response Action can use a function in an Additional Input value field.

NEW QUESTION # 59

.....

Maybe you can find the data on the website that our Plat-Dev-210 training materials have a very high hit rate, and as it should be, our pass rate of the Plat-Dev-210 exam questions is also very high. Maybe you will not consciously think that it is not necessary to look at the data for a long time to achieve such a high pass rate? While Plat-Dev-210 practice quiz give you a 99% pass rate, you really only need to spend very little time.
