當你在為準備1z0-1046-25考試而努力學習並且感到很累的時候，你知道別人都在幹什麼嗎？看一下你周圍跟你一樣要參加IT認證考試的人。為什麼當你因為考試惴惴不安的時候，他們卻都一副自信滿滿、悠然自得的樣子呢？是你的能力不如他們高嗎？當然不是。那麼想知道為什麼別人很輕鬆就可以通過1z0-1046-25考試嗎？那就是使用PDFExamDumps的1z0-1046-25考古題。只用學習這個考古題就可以輕鬆通過考試。不相信嗎？覺得不可思議嗎？那就快點來試一下吧。你可以先體驗一下考古題的demo,這樣你就可以確認這個資料的品質了。快点击PDFExamDumps的網站吧。

PDFExamDumps是促使IT人士成功的最好的催化劑。很多人通過了IT相關認證考試的人就是使用了我們的PDFExamDumps的培訓工具。我們的PDFExamDumps的專家團隊利用自己的經驗為參加Oracle 1z0-1046-25 認證考試的很多人研究出了最新的有效的培訓工具，包括Oracle 1z0-1046-25 認證考試測試，考前試題，試題答案。我們的PDFExamDumps提供的試題及答案和真正的試題有95%的相似性。使用PDFExamDumps的培訓工具，您的Oracle 1z0-1046-25 認證考試是可以很輕鬆的通過的。

>> 1z0-1046-25在線題庫 <<

最好的1z0-1046-25在線題庫，令人稱贊的考試指南幫助你輕松通過1z0-1046-25考試

我們PDFExamDumps配置提供給你最優質的Oracle的1z0-1046-25考試考古題及答案，將你一步一步帶向成功，我們PDFExamDumps Oracle的1z0-1046-25考試認證資料絕對提供給你一個真實的考前準備，我們針對性很強，就如同為你量身定做一般，你一定會成為一個有實力的IT專家，我們PDFExamDumps Oracle的1z0-1046-25考試認證資料將是最適合你也是你最需要的培訓資料，趕緊註冊我們PDFExamDumps網站，相信你會有意外的收穫。

最新的 Oracle Global Human Resources Cloud 1z0-1046-25 免費考試真題 (Q48-Q53):

問題 #48

A 'Business Visa Introduction Letter' is an example of a document that may be required on a regular basis for certain people who travel and work internationally. To speed up the process of obtaining the letter, the system can store a copy, which the user downloads whenever it is required. Where are the document templates configured, before they are associated with the appropriate Document Type?

- A. BI Publisher (BIP)
- B. Page Composer
- C. Design Studio
- D. Oracle Transnational Business Intelligence (OTBI)

答案: A

解題說明:

In Oracle Global Human Resources Cloud, document templates, such as a "Business Visa Introduction Letter," are created and managed in BI Publisher (BIP). The "Implementing Global Human Resources" guide under "Document Management" explains that BIP is used to design and store report templates, including reusable documents tied to Document Types. These templates are then associated with a Document Type (e.g., "Visa Letter") for user access and download. Option B (Page Composer) is for UI customization, not document templates. Option C (Design Studio) configures transactions, not documents. Option D (OTBI) is for analytics, not template creation. Thus, Option A is correct.

Reference: Oracle Global Human Resources Cloud - Implementing Global Human Resources, "Configuring Document Templates with BI Publisher" topic.

問題 #49

You hired an employee on January 1, 2023. This employee got married on June 12, 2023. You received a request from the employee on July 11, 2023, to change their last name from the date of marriage. You changed the last name of the employee by using the Person Quick Action as requested on the same day. What are the effective dates for the Person and Assignment records?

- A. January 1, 2023 for Assignment and July 11, 2023 for Person
- B. August 15, 2023 for Person and June 12, 2023 for Assignment
- C. June 12, 2023 for Person and January 1, 2023 for Assignment
- D. June 12, 2023 for Person and Assignment

答案: D

解題說明:

In Oracle HCM Cloud, the Person Quick Action (e.g., Change Name) updates the global person record, which is separate from assignment records. When an HR specialist changes an employee's last name via Person Quick Action and specifies an effective date (e.g., the marriage date, June 12, 2023), this date applies to the person record. The documentation states that name changes can be backdated to reflect life events, and if the

"Synchronize to Assignments" option is enabled (default behavior unless overridden), the updated name also propagates to all active assignments with the same effective date—here, June 12, 2023. The assignment's original start date (January 1, 2023) remains unchanged unless explicitly modified via a separate transaction (e.g., Manage Employment).

Option A introduces an arbitrary August 15 date, which has no basis. Option B uses July 11 (request date) for Person, ignoring the backdated request, and January 1 for Assignment, which doesn't reflect synchronization.

Option D keeps Assignment at January 1, contradicting the synchronization default. Option C correctly sets both Person and Assignment to June 12, 2023, per Oracle's name change and synchronization behavior.

References: Oracle Docs - "Using Global Human Resources" (docs.oracle.com, published 2023-10-03), Person Management section.

問題 #50

As an implementation consultant, you need to configure different rules for the Transfer transaction. Which fields can be used as criteria or parameters to determine when and for whom a rule is applied?

- A. Role, Legal Entity, Country, Division, Action, and Worker Type
- B. Business Unit, Location, Position, Action, and Worker Type
- C. Legal Entity, Country, Business Unit, Division, Action, and Worker Type
- D. Role, Legal Entity, Country, Business Unit, Action, and Worker Type

答案: B

解題說明:

In Transaction Design Studio (TDS) for the Transfer transaction, rules can be tailored using specific criteria, as outlined in the "Implementing Global Human Resources" guide. Supported fields include Business Unit, Location, Position, Action (e.g., Transfer), and Worker Type (e.g., Employee, Contingent). These allow precise rule application (e.g., different approval flows by location). Options B, C, and D include fields like Role, Legal Entity, Country, or Division, which are not standard TDS criteria for Transfer rules. Option A matches the documented supported fields.

Reference: Oracle Global Human Resources Cloud - Implementing Global Human Resources, "Transaction Design Studio Criteria" section.

問題 #51

Challenge 5

Manage Business Unit Set Assignment

Scenario

The new reference set needs to be mapped to the business unit that was created for departments, jobs, locations, and grades.

Task

Map your X Tech Business Unit Business Unit to the XTECH reference set for departments, jobs, locations, and grades.

答案：

解題說明：

See the solution in Explanation below.

Explanation:

To create a legal address for a legal entity in Oracle Global Human Resources Cloud, you need to use the Manage Legal Addresses task within the Setup and Maintenance work area. The task involves entering the provided address details (900 Main St, Dearborn Heights, Wayne, Michigan 48127) and ensuring the address is validated and associated with the legal entity. Below is a step-by-step solution, including detailed explanations and references to Oracle documentation, to accomplish this task.

Step-by-Step Solution

Step 1: Log in to Oracle Fusion Applications

* Action: Log in to Oracle Fusion Applications with a user account that has the necessary privileges, such as the HCM Application Administrator or Setup User role. These roles typically include permissions to access the Setup and Maintenance work area.

* Explanation: The Setup and Maintenance work area is where configuration tasks, including managing legal addresses, are performed. Proper access ensures you can navigate to the required tasks without restrictions.

Oracle Global Human Resources Cloud: Implementing Global Human Resources, Section: Security for Setup Tasks.

Step 2: Navigate to Setup and Maintenance

Action: From the Oracle Fusion Applications home page, click the Navigator icon (hamburger menu) and select Setup and Maintenance under the Tools section.

Explanation: The Setup and Maintenance work area provides access to all implementation tasks, organized by functional areas. This is the starting point for configuring legal addresses.

Reference: Oracle Global Human Resources Cloud: Implementing Global Human Resources, Section: Setup and Maintenance Overview.

Step 3: Select the Functional Area and Task

Action:

In the Setup and Maintenance work area, select the Workforce Structures functional area from the Functional Area dropdown list. Search for the task Manage Legal Addresses by typing "Manage Legal Addresses" in the search bar or navigating to the task list under Workforce Structures.

Click the Go to Task icon next to Manage Legal Addresses to open the task.

Explanation: The Manage Legal Addresses task is used to create, edit, or delete addresses for legal entities.

It is located under the Workforce Structures functional area, which includes tasks related to legal entities, locations, and addresses.

Filtering by the functional area and task name ensures you access the correct configuration page.

Reference: Oracle Global Human Resources Cloud: Using Global Human Resources, Section: Manage Legal Addresses.

Step 4: Create a New Legal Address

Action:

On the Manage Legal Addresses page, click the Create icon (usually a plus sign or "Create" button) to start creating a new address. The Create Legal Address page opens, where you will enter the address details.

Explanation: The Manage Legal Addresses page displays a list of existing addresses, and the Create action initiates the process of adding a new address. This page is designed to capture all required address components, including validation for country-specific formats.

Reference: Oracle Global Human Resources Cloud: Implementing Global Human Resources, Section: Creating Legal Addresses.

Step 5: Enter Address Details

Action: Enter the following details based on the provided scenario (900 Main St, Dearborn Heights, Wayne, Michigan 48127):

Country: Select United States from the dropdown list.

Address Line 1: Enter 900 Main St.

Address Line 2: Leave blank (not provided in the scenario).

Address Line 3: Leave blank (not provided in the scenario).

City: Enter Dearborn Heights.

County: Enter Wayne (select from the dropdown if prompted, as Wayne is a county in Michigan).

State: Select Michigan from the dropdown list.

Postal Code: Enter 48127.

Address Purpose: Select Legal (or ensure the address is marked for use as a legal address, depending on the configuration).

Effective Start Date: Enter the current date or the date the address becomes effective (e.g., 04/15/2025, based on the current date).

If the acquisition date is specified, use that date.

Validate Address: Click the Validate button (if available) to ensure the address is recognized by Oracle's address validation service.

Explanation:

The address fields must match the format expected for the United States, including mandatory fields like Address Line 1, City, State, and Postal Code. The County field (Wayne) is optional but should be included for accuracy, as it is part of the provided address.

The Address Purpose field determines how the address is used (e.g., legal, mailing). Since the task is to create a legal address, ensure the purpose is set to Legal.

Address validation checks the address against a third-party service (if enabled) to confirm its accuracy. Oracle uses services like Loqate or internal validation rules to verify US addresses.

The Effective Start Date ensures the address is active from the specified date. Historical or future-dated addresses can be created, but for a new acquisition, the current or acquisition date is appropriate.

Reference: Oracle Global Human Resources Cloud: Using Global Human Resources, Section: Address Fields and Validation.

Step 6: Save the Address

Action:

After entering and validating the address, click Save or Save and Close to store the address.

If prompted, confirm the creation of the address.

Explanation: Saving the address creates a record in the system that can be associated with a legal entity. The address is now available for use in other tasks, such as assigning it to a legal entity or location.

Reference: Oracle Global Human Resources Cloud: Implementing Global Human Resources, Section: Saving Legal Addresses.

Step 7: Associate the Address with a Legal Entity (Optional)

Action:

If the scenario requires linking the address to a specific legal entity (not explicitly stated but implied by "legal address for the legal entity"), navigate to the Manage Legal Entity task in the Setup and Maintenance work area.

Search for the legal entity representing the acquired company (or create a new one if it does not exist).

In the legal entity's details, go to the Address section and select the newly created address (900 Main St, Dearborn Heights, Wayne, Michigan 48127).

Save the changes to the legal entity.

Explanation: A legal address must be associated with a legal entity to be used for reporting, compliance, or operational purposes.

The Manage Legal Entity task allows you to link the address to the entity. If the legal entity is not yet created, you may need to create it first using the Manage Legal Entity task, specifying details like the entity name and jurisdiction. Since the scenario does not provide the legal entity's name, this step is noted as optional but recommended to complete the task fully.

Reference: Oracle Global Human Resources Cloud: Using Global Human Resources, Section: Associating Addresses with Legal Entities.

Step 8: Verify the Address Creation

Action:

Return to the Manage Legal Addresses page.

Search for the address by entering 900 Main St or Dearborn Heights in the search criteria.

Confirm that the address appears in the list with the correct details and effective date.

Explanation: Verifying the address ensures that it was created correctly and is available for use. This step confirms the task's success and checks for any errors in data entry or validation.

Reference: Oracle Global Human Resources Cloud: Using Global Human Resources, Section: Searching Legal Addresses.

Detailed Explanation

Context of Legal Addresses: In Oracle HCM Cloud, a legal address is a critical component for a legal entity, used for tax reporting, compliance, and operational purposes. The address must be precise and validated to ensure it meets regulatory requirements, especially for a newly acquired company.

Address Validation: Oracle supports address validation through integration with third-party services or internal rules. For US addresses, fields like City, State, and Postal Code are cross-checked to ensure accuracy.

The provided address (900 Main St, Dearborn Heights, Wayne, Michigan 48127) is a valid US address format, with Wayne being the county, which should be included for completeness.

Effective Dating: Legal addresses are effective-dated, meaning they can have start and end dates to reflect changes over time. For a new acquisition, the effective start date should align with the acquisition date or the current date if not specified.

Association with Legal Entity: While the scenario focuses on creating the address, Oracle's best practice requires linking it to a legal entity. This step ensures the address serves its intended purpose for the acquired company manufacturing spring hinges in Michigan.

Potential Challenges:

If address validation is enabled and the address is not recognized, you may need to manually confirm its accuracy or correct minor discrepancies.

If the legal entity does not exist, you must create it first, which requires additional details like the entity's name and jurisdiction (e.g., Michigan, USA).

User access issues could prevent task execution, requiring role adjustments by an administrator.

Key Considerations

Accuracy: Ensure all address components are entered exactly as provided to avoid validation errors.

Permissions: Verify that the user has the Manage Legal Address privilege, typically granted through roles like HCM Data Loader or Application Implementation Consultant.

Redwood Experience: If using the Redwood interface (available in 24C and later), the Manage Legal Addresses page may have an enhanced UI with improved search and validation features, but the core steps remain the same.

Audit Trail: Creating a legal address generates an audit trail, which can be reviewed in the Audit Reports section if needed for compliance.

問題 #52

An IT company's consulting department based in Bangalore goes for two team outing events every year.

However, the support department, also based in Bangalore, goes for four team outing events every year. All employees in these departments go for the respective team outing events. How should you define the calendar events?

- A. Use Geographic Hierarchy as the Hierarchy type for the calendar event.
- B. Use Absence Approval Hierarchy as the Hierarchy type for the calendar event.
- C. Use Line Manager Hierarchy as the Hierarchy type for the calendar event.
- D. Use Organization Hierarchy as the Hierarchy type for the calendar event.**
- E. Use Project Manager Hierarchy as the Hierarchy type for the calendar event.

答案: D

解題說明:

In Oracle Global Human Resources Cloud, calendar events (e.g., team outings) are defined via the "Manage Calendar Events" task and assigned using a hierarchy to determine applicability. The scenario requires events specific to departments (consulting vs. support) in the same location (Bangalore).

Option A: Project Manager Hierarchy is for project-based structures, not department-specific events.

Option B: Geographic Hierarchy applies to location-based events (e.g., Bangalore vs. Mumbai), but both departments are in Bangalore, so it's too broad.

Option C: Line Manager Hierarchy targets individuals under specific managers, not entire departments uniformly.

Option D: Absence Approval Hierarchy is for absence approvals, not calendar events like outings.

Option E: Correct. Organization Hierarchy (e.g., via Manage Organization Trees) allows events to be tied to specific departments (consulting and support), ensuring the consulting department gets two outings and the support department gets four, regardless of location or manager.

The correct answer is E, per "Using Global Human Resources" on calendar event setup.
