

最頂尖的考試資料DP-600題庫資料確保您能如願考過Microsoft DP-600考試

此外，這些NewDumps DP-600考試題庫的部分內容現在是免費的：https://drive.google.com/open?id=1UE_4QECSGnoZQ4wu0nGDqqzKiRnzCRll

獲得DP-600認證是IT職業發展有利保證，而NewDumps公司提供最新最準確的DP-600題庫資料，幾乎包含真實考試的所有知識點，借助我們的學習資料，您不必浪費時間去閱讀過多的參考書籍，只需要花費一定的時間去學習我們的Microsoft DP-600題庫資料。本站提供PDF版本和軟件本版的DP-600題庫，PDF版本的方便打印，而對於軟件版本的Microsoft DP-600題庫可以模擬真實的考試環境，方便考生選擇。

Microsoft DP-600 Exam Overview:

Certification Vendor:	Microsoft
Exam Name:	Implementing Analytics Solutions Using Microsoft Fabric
Exam Number:	DP-600
Exam Duration:	120 minutes
Real Exam Qty:	40-60
Exam Price:	\$165 USD
Passing Score:	700/1000
Exam Format:	Multiple-choice, Drag-and-drop, Case studies
Certificate Validity Period:	1 year
Available Languages:	English, Japanese, Chinese (Simplified), Korean
Related Certifications:	Microsoft Certified: Fabric Analytics Engineer Associate
Sample Questions:	Microsoft DP-600 Sample Questions
Exam Way:	Online proctored or in-person testing center
Pre Condition:	Candidates should have foundational knowledge of data concepts, experience with Microsoft Fabric, and proficiency in data transformation and modeling. Familiarity with Power BI is recommended but not required.
Official Syllabus URL:	https://learn.microsoft.com/en-us/certifications/exams/dp-600

最新DP-600題庫，最新DP-600考古題

面對競爭激勵的世界，唯有考取和別人不一樣的證照，才可以充實自己，知識就是力量。購買 Microsoft DP-600 題庫，可以免費享受一年的更新題庫的售後服務，在購買前享有免費試用部分考題DEMO。我們提供PDF和軟體格式的考題，其中PDF版本可以列印，軟體版的題庫可以模擬真實的 Microsoft 的 DP-600 考試。正確率100%，考生可以參照最新的 DP-600 認證部分考題。

Microsoft DP-600 考試大綱：

主題	簡介
主題 1	• Maintain a data analytics solution: This section of the exam measures the skills of administrators and covers tasks related to enforcing security and managing the Power BI environment. It involves setting up access controls at both workspace and item levels, ensuring appropriate permissions for users and groups. Row-level, column-level, object-level, and file-level access controls are also included, alongside the application of sensitivity labels to classify data securely. This section also tests the ability to endorse Power BI items for organizational use and oversee the complete development lifecycle of analytics assets by configuring version control, managing Power BI Desktop projects, setting up deployment pipelines, assessing downstream impacts from various data assets, and handling semantic model deployments using XMLA endpoint. Reusable asset management is also a part of this domain.
主題 2	• Prepare data: This section of the exam measures the skills of engineers and covers essential data preparation tasks. It includes establishing data connections and discovering sources through tools like the OneLake data hub and the real-time hub. Candidates must demonstrate knowledge of selecting the appropriate storage type—lakehouse, warehouse, or eventhouse—depending on the use case. It also includes implementing OneLake integrations with Eventhouse and semantic models. The transformation part involves creating views, stored procedures, and functions, as well as enriching, merging, denormalizing, and aggregating data. Engineers are also expected to handle data quality issues like duplicates, missing values, and nulls, along with converting data types and filtering. Furthermore, querying and analyzing data using tools like SQL, KQL, and the Visual Query Editor is tested in this domain.
主題 3	• Implement and manage semantic models: This section of the exam measures the skills of architects and focuses on designing and optimizing semantic models to support enterprise-scale analytics. It evaluates understanding of storage modes and implementing star schemas and complex relationships, such as bridge tables and many-to-many joins. Architects must write DAX-based calculations using variables, iterators, and filtering techniques. The use of calculation groups, dynamic format strings, and field parameters is included. The section also includes configuring large semantic models and designing composite models. For optimization, candidates are expected to improve report visual and DAX performance, configure Direct Lake behaviors, and implement incremental refresh strategies effectively.

最新的 Microsoft Certified DP-600 免費考試真題 (Q50-Q55):

問題 #50

You need to recommend which type of fabric capacity SKU meets the data analytics requirements for the Research division. What should you recommend?

- A. F
- B. A
- C. EM
- D. P

答案：A

問題 #51

You have a Microsoft Power BI semantic model that contains a single table named Orders. Orders contains the following columns:

- * Product Name
- * Order Date
- * Quantity

You have a Power BI report that contains a page named Inventory. Inventory contains a slicer for the Product Name column and a clustered column chart that shows Quantity by Order Date.

You need to ensure that users can select whether to display Quantity by Product Name or Quantity by Order Date in the chart. The solution must minimize development effort.

What should you create?

- A. a measure
- B. a calculation group
- C. a dynamic format string
- D. a field parameter

答案: D

問題 #52

Hotspot Question

You have a Fabric tenant.

You plan to create a Fabric notebook that will use Spark DataFrames to generate Microsoft Power BI visuals.

You run the following code.

```
from powerbiclient import QuickVisualize, get_dataset_config, Report
PBI_visualize = QuickVisualize(get_dataset_config(df))
PBI_visualize
```

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
The code embeds an existing Power BI report.	☐	☐
The code creates a Power BI report.	☐	☐
The code displays a summary of the DataFrame.	☐	☐

答案:

解題說明:

Answer Area

Statements	Yes	No
The code embeds an existing Power BI report.	☐	☒
The code creates a Power BI report.	☒	☐
The code displays a summary of the DataFrame.	☐	☒

問題 #53

You have a Fabric workspace named Workspace1 and an Azure Data Lake Storage Gen2 account named storage1. Workspace1 contains a lakehouse named Lakehouse1.

You need to create a shortcut to storage1 in Lakehouse1.

Which connection and endpoint should you specify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Microsoft

newdumpsdf.com

Connection:

Endpoint:

答案:

解題說明:

Answer Area

Microsoft

newdumpsdf.com

Connection:

Endpoint:

問題 #54

You have a Fabric tenant that contains a machine learning model registered in a Fabric workspace. You need to use the model to generate predictions by using the predict function in a fabric notebook. Which two languages can you use to perform model scoring?

Each correct answer presents a complete solution. NOTE: Each correct answer is worth one point.

- A. PySpark
- B. DAX EC.
- C. T-SQL
- D. Spark SQL

答案: A,D

解題說明:

The two languages you can use to perform model scoring in a Fabric notebook using the predict function are Spark SQL (option C) and PySpark (option D). These are both part of the Apache Spark ecosystem and are supported for machine learning tasks in a Fabric environment. Reference = You can find more information about model scoring and supported languages in the context of Fabric notebooks in the official documentation on Azure Synapse Analytics.
