# NCP-DB-6.10 Exam Pass4sure - Latest NCP-DB-6.10 Exam Tips

We are determined to give hand to the candidates who want to pass their NCP-DB-6.10 exam smoothly and with ease by their first try. Our professional experts have compiled the most visual version of our NCP-DB-6.10 practice materials: the PDF version, which owns the advantage of convenient to be printed on the paper. Besides, you can take notes on it whenever you think of something important. The PDF version of our NCP-DB-6.10 study quiz will provide you the most flexible study experience to success.

ExamsLabs is a very wonderful and effective platform to give chances to our worthy clients who want to achieve their expected scores and gain their NCP-DB-6.10 certifications. With our professional experts' tireless efforts, our NCP-DB-6.10 exam guide is equipped with a simulated examination system with timing function, allowing you to examine your learning results at any time, keep checking for defects, and improve your strength. And you can be satisfied with our NCP-DB-6.10 learning guide.

Latest NCP-DB-6.10 Exam Tips - Latest NCP-DB-6.10 Exam Answers

If you don't have well-knit special basic knowledge and be block by NCP-DB-6.10 exam so that you can't obtain the Nutanix certification. However your company needs this certification, your supervisor requests you to obtain as soon as possible, please don't worry, NCP-DB-6.10 valid exam questions vce can help you pass exam soon. If you don't know about our company and don't trust this kind of products in website, you may be out. Now purchasing NCP-DB-6.10 Valid Exam Questions vce is a popular thing in this field since it is high pass rate at the first attempt.

Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 Sample Questions (Q229-Q234):

NEW QUESTION # 229
Which file format is available when downloading a list of alerts?

- A. pdf
- B. xlsx
- C. xml
- D. csv

Answer: D

Explanation:
When downloading a list of alerts from NDB, the available file format is csv (Comma-Separated Values). NDB provides this format to export alert data (e.g., alert ID, timestamp, severity, description) in a structured, machine-readable way that can be easily

imported into spreadsheet applications like Microsoft Excel or analyzed programmatically. This aligns with NDB's focus on operational efficiency and data portability.

NEW QUESTION # 230
What is the first step to add Time Machine (TM) data access to a Nutanix cluster?

- A. Register the required Nutanix clusters in ND8.
- B. Disable multi-cluster in ND8.
- C. Delete the TM data from the source database.
- D. Enable multi-cluster in NDB.

Answer: A

Explanation:
To add Time Machine data access to a Nutanix cluster, the first step is to register the cluster in NDB. This will allow NDB to discover and manage the databases and snapshots on the cluster.
You can register multiple Nutanix clusters in NDB using the Add Cluster option in the NDB settings page. You can also specify the cluster role, such as source, target, or both, depending on the data access and replication needs. Enabling or disabling multi-cluster in NDB is not the first step, as this is a global setting that affects the entire NDB instance. Deleting the TM data from the source database is not the first step, as this will remove the data protection and availability of the database.

NEW QUESTION # 231
Which command can be used to assign a static IP address to the Era VM on ESXi?
set
era-server > era
era-server >
An administrator is trying to register an Oracle Database Server VM to Era.
Which dependency must be met?

- A. SUDO NOPASS access is required
- B. set path = /sbin:/bin:/usr/sbin:/usr/bin
- C. Enable reQUIREetty setting on the source database
- D. /TEMP folder must have read-only permissions

Answer: A

Explanation:
To register an Oracle Database Server VM to Era in Nutanix Database Automation (NCP-DB), certain dependencies must be met. One of these is that SUDO NOPASS access is required. This allows the Era service to perform necessary operations on the Oracle Database Server VM. As for assigning a static IP address to the Era VM on ESXi, you can use the vSphere Client to configure static IP settings. However, this is not directly related to the registration of an Oracle Database Server VM to Era. Please note that these answers are based on the information available as of my last update in 2021 and may need to be verified with the most recent Nutanix Database Automation (NCP-DB) documentation or resources.

NEW QUESTION # 232
How should an administrator create a database clone using the Era IJI?

- A. Select Database Server VMs, select a database server VM and then choose Create Clone.
- B. Select Databases, Clones, Create Clone.
- C. Select Databases, Sources, select a source database and then choose Create Clone.
- D. Select Time Machines, select e source database end then choose Create Clone.

Answer: D

Explanation:
In Nutanix Database Automation (NCP-DB), the Time Machine feature is used for protecting databases and creating database clones. To create a database clone using the Era Interface, an administrator should select Time Machines, select a source database, and then choose Create Clone. This process allows the administrator to create a copy of the source database at a specific point in

time.

NEW QUESTION # 233

A request is received to refresh a database clone from a new manual snapshot. When the administrator attempts to create the new snapshot from the Time Machine, it is in a Frozen state.

What causes a Time Machine to enter the Frozen state and what are the administrator's options to complete the request?

- A. Cause: The Time Machine enters a Frozen state when the database is de-registered without removing the Time Machine.
  Resolution: To complete the request the database must be re-registered in NDB, create a new Time Machine and create a new clone.
- B. Cause: The Time Machine enters a Frozen state after too many snapshot or log catchup failures.
  Resolution: Remediate the snapshot or log catchup failures, this thaws the Time Machine, allowing normal operations to continue and the request can be completed.
- C. Cause: The Time Machine enters a Frozen state when the database is de-registered without removing the Time Machine.
  Resolution: To complete the request the database must be re-registered in NDB, this thaws the Time Machine and it resumes operation so the clone can be refreshed.
- D. Cause: The Time Machine enters a Frozen state when the database is de-registered without removing the Time Machine.
  Resolution: The Time Machine must be paused, then the database re-registered with a new Time Machine and a new clone created.

Answer: C

Explanation:
A Time Machine is a core construct of the copy data management service in NDB that captures and manages the data of a database to deliver a recovery point objective (RPO) SLA. A Time Machine can enter a Frozen state for various reasons, such as database de-registration, snapshot or log catchup failures, or manual intervention. When a Time Machine is in a Frozen state, it stops taking new snapshots and log backups, and cannot perform any clone, refresh, or restore operations. To resume the normal operation of a Time Machine, it must be thawed by resolving the root cause of the freeze. One of the common causes of a Time Machine freeze is when the database is de-registered from NDB without removing the Time Machine. This can happen when the administrator wants to move the database to a different NDB instance or cluster, or when the database is accidentally de- registered. In this case, the Time Machine becomes orphaned and frozen, and cannot be used for any operations. To complete the request to refresh a database clone from a new manual snapshot, the administrator must first re-register the database in NDB using the same database name and ID as before. This will automatically thaw the Time Machine and resume its operation. The administrator can then create a new manual snapshot from the Time Machine and use it to refresh the database clone. The other options are not correct, as they either require unnecessary steps or do not address the root cause of the freeze.

NEW QUESTION # 234

......

Great concentrative progress has been made by our company, who aims at further cooperation with our candidates in the way of using our NCP-DB-6.10 exam engine as their study tool. Owing to the devotion of our professional research team and responsible working staff, our training materials have received wide recognition and now, with more people joining in the NCP-DB-6.10 Exam army, we has become the top-raking NCP-DB-6.10 training materials provider in the international market. Believe in our NCP-DB-6.10 study guide, you will succeed in your exam!

Latest NCP-DB-6.10 Exam Tips: https://www.examslabs.com/Nutanix/Nutanix-Certified-Professional-NCP/best-NCP-DB-6.10-exam-dumps.html

We hereby guarantee that all candidates purchase our NCP-DB-6.10 reliable study questions will pass certification exams 100% for sure, Not to mention that ExamsLabs Nutanix NCP-DB-6.10 exam training materials are many candidates proved in practice, You will be provided with an examination environment and you will be presented with actual Nutanix NCP-DB-6.10 exam questions, ExamsLabs Latest NCP-DB-6.10 Exam Tips has the most professional and efficient customer support team.

Shannon dabbles in sports photography and likes to solve puzzles, I like to NCP-DB-6.10 do things visually, and the various programming languages I have to deal with on a daily basis aren't exactly the most exciting aspect of my workload.

Useful NCP-DB-6.10 Exam Pass4sure - Only in ExamsLabs

We hereby guarantee that all candidates purchase our NCP-DB-6.10 Reliable Study Questions will pass certification exams 100%

for sure, Not to mention that ExamsLabs Nutanix NCP-DB-6.10 exam training materials are many candidates proved in practice.

You will be provided with an examination environment and you will be presented with actual Nutanix NCP-DB-6.10 exam questions, ExamsLabs has the most professional and efficient customer support team.

You need a useful plan to prepare the Nutanix NCP-DB-6.10 exam of this distinguished certification.
