Many unfortunate candidates don't get the Certified ISO/IEC 27001:2022 Foundation (I27001F) certification because they prepare for its Certified ISO/IEC 27001:2022 Foundation (I27001F) exam questions from an CertiProf I27001F exam that dumps outdated material. It results in a waste of time and money. You can develop your skills and join the list of experts by earning this Certified ISO/IEC 27001:2022 Foundation (I27001F) certification exam.

CertiProf Certified ISO/IEC 27001:2022 Foundation Sample Questions (Q28-Q33):

NEW QUESTION # 28

What details must be included in a Statement of Applicability?

- A. The information security policy
- B. Evidence of top management authorization of the controls
- C. The necessary controls with justification for inclusion and exclusion
- D. A list of the risks applicable to the organization

Answer: C

Explanation:

The Statement of Applicability is a documented result of the risk treatment process. It must include the necessary controls and justification for their inclusion, whether the controls are implemented, and justification for excluding controls from Annex A when they are not applicable. It does not need to be a list of risks, proof of management authorization, or the policy itself. Therefore, option C is correct.

NEW QUESTION # 29

What does ISO/IEC 27001:2022 require for the control of documented information?

- A. Have an internal auditor validate that documented information control is performed externally
- B. Control documented information so that it is available and suitable for use, where and when it is needed
- C. Hire a consultancy to determine how documented information should be controlled in order to achieve certification
- D. Acquire a technological tool to control documented information effectively

Answer: B

Explanation:

ISO/IEC 27001:2022 requires documented information to be controlled so that it is available and suitable for use where and when needed, and adequately protected. The standard does not require purchasing software, hiring consultants, or assigning external validation as mandatory conditions for compliance. Those may be organizational choices, but they are not requirements of the standard. Therefore, option A is the correct answer.

NEW QUESTION # 30

According to ISO/IEC 27001:2022, is it necessary to ensure that the Information Security Management System can achieve its intended results?

- A. It is only an observation to keep in mind when auditing the management system
- B. None of the above
- C. It is a requirement to be fulfilled
- D. It is a recommendation, but not a requirement

Answer: C

Explanation:

ISO/IEC 27001:2022 requires the organization to plan actions to address risks and opportunities so that the ISMS can achieve its intended outcomes, prevent or reduce undesired effects, and achieve continual improvement. This is a direct requirement of the standard and not optional guidance. Therefore, option B is the correct answer.

NEW QUESTION # 31

Which statement describes a critical success factor for an Information Security Management System ISMS?

- A. Implementing an effective information security awareness, education, and training program
- B. Purchasing a good antivirus system
- C. Hiring a consulting firm that is also the same firm that will perform the third-party audit
- D. Hiring a certified ISMS implementation consultant with at least five successful cases

Answer: A

Explanation:

A successful ISMS depends heavily on awareness, competence, and engagement across the organization. ISO/IEC 27001:2022 emphasizes competence, awareness, communication, leadership, and operational discipline.

An effective awareness, education, and training program helps ensure that people understand their information security responsibilities and contribute to the effectiveness of the ISMS. Hiring consultants or buying specific tools may help in some cases, but they are not critical success factors defined by the standard itself. Therefore, option B is the correct answer.

NEW QUESTION # 32

What are the three main aspects of information security?

- A. Confidentiality, recoverability, integrity
- B. Confidentiality, integrity, availability
- C. Non-repudiation, authenticity, accountability
- D. Durability, auditability, confidentiality

Answer: B

Explanation:

The three fundamental properties of information security are confidentiality, integrity, and availability, often referred to as the CIA triad. Confidentiality means information is accessible only to authorized persons or entities. Integrity means safeguarding the accuracy and completeness of information. Availability means information and associated assets are accessible and usable when required. These principles are foundational within ISO/IEC 27001 and ISO/IEC 27002. Therefore, option B is correct.

NEW QUESTION # 33

.....

Attending training institution or having CertiProf online training classes may be a good choice for candidates. But for people who have no time and energy to prepare for I27001F practice exam, training calss will make them tired and exhausted.
