## Salesforce Certified CRM Analytics and Einstein Discovery Consultant Sample Questions (Q59-Q64):

### NEW QUESTION # 59

A CRM Analytics consultant has been asked to add a custom object to existing recipe. When trying to locate the object, the consultant can see only Direct Data and NOT the SFDC Local data sync.

How should the consultant resolve this?

- A. Create a new data sync connection, run the sync, and add to recipe.
- B. Clone the recipe, add the new object to the recipe, and run the recipe.
- C. Turn on data syne for the object, run the sync, and then add to recipe.

**Answer: C**

### NEW QUESTION # 60

A customer has a dataset consisting of over 300 unique product names. They request a prediction model with the product names included.

Which action should the CRM Analytics consultant take?

- A. Run the model using the default variables in the Product object.
- B. Use SKU numbers rather than product names to increase clarity.
- C. Split the analysis into multiple models with each having fewer products.

**Answer: C**

### NEW QUESTION # 61

The CRM Analytics project team at Universal Containers is creating an app with dashboards, datasets, and lenses. The app has been shared with multiple users with Viewer, Editor, and/or Manager access.

One end user is unable to view the dashboard watchlist that was previously set up. They are receiving a "Resource not found" error while trying to access the dashboard. The team confirms that the end user has Viewer access to the app but the project team is able to view the dashboard.

What is the reason for this error?

- A. The dashboard has been hidden by a user with Manager access to the App.
- B. The dashboard is deleted by a user with Manager access to the App.
- C. The dashboard or App permission needs to be updated to Editor.

**Answer: A**

### NEW QUESTION # 62

A project team member uploads a CSV file to CRM Analytics, and they notice a few records failed during the upload. The manager wants to view the error log generated so this can be fixed and uploaded again. The manager has the CRM Analytics administrator permission but is unable to download the error log details.

Why is the manager unable to download the log details?

- A. They do not have the Upload External Data to CRM Analytics permission enabled.
- B. They do not have the Download CRM Analytics Data permission enabled.
- C. Only the user who uploaded the external data file can download the error log.

**Answer: C**

Explanation:

In CRM Analytics, when a CSV file is uploaded and errors occur during the upload process, an error log is generated. However, only the user who uploaded the external data file can download the error log, even if other users have administrative permissions. This restriction ensures that only the user responsible for the data upload can access the details to resolve the issues.

### NEW QUESTION # 63

CRM Analytics users at Cloud Kicks are granted access to an app with specific dashboards. When trying to download a specific widget, they are unable to do so.

What is causing the issue?

- A. The dashboard has been created for internal use and the users have a view only license.
- B. The users have access to the dashboard but not the dataset.
- C. The permission set for the users is missing the download data permission.

**Answer: C**

Explanation:

As in the previous question, the issue is related to permissions. Users can be granted access to dashboards and apps, but if their permission set does not explicitly allow the "Download Data" action, they will not be able to download the widget data. This is a

common issue encountered when users have restricted permissions, especially in environments where security and data access are tightly controlled.
