With this purpose, our H19-619_V1.0 learning materials simplify the questions and answers in easy-to-understand language so that each candidate can understand the test information and master it at the first time, and they can pass the test at their first attempt. Our experts aim to deliver the most effective information in the simplest language. Each candidate takes only a few days can attend to the H19-619_V1.0 Exam. In addition, our H19-619_V1.0 H19-619_V1.0 provides end users with real questions and answers. We have been working hard to update the latest H19-619_V1.0 learning materials and provide all users with the correct H19-619_V1.0 answers. Therefore, our H19-619_V1.0 learning materials always meet your academic requirements.

Huawei HCSP-Presales-Government Public Services V1.0 Sample Questions

(Q359-Q364):

NEW QUESTION # 359

Data models are classified into three types: conceptual models, logical models, and physical models.

- A. False
- B. True

Answer: B

Explanation:

In standard database and data-architecture theory, data models are commonly divided into conceptual, logical, and physical layers, reflecting business abstraction, logical structure, and implementation details.

NEW QUESTION # 360

The architecture of an urban sensing system usually includes which layers?

- A. Network layer
- B. Platform layer
- C. Perception layer
- D. Application layer

Answer: A,B,C,D

Explanation:

Standard IoT/smart-city architectures are four-layered: perception (sensors), network (transmission), platform (processing & storage), and application (business use cases).

NEW QUESTION # 361

For the county-level command-center solution, Huawei adopts a county-level all-in-one deployment. Which characteristics are included in this solution?

- A. Integrated command-business system
- B. Integrated converged-communication system
- C. Full-cabinet delivery, rapid service go-live
- D. Integrated video-conference/consultation system
- E. Integrated design, pre-deployed

Answer: A,B,C,D,E

Explanation:

The "county all-in-one" solution integrates command services, converged communication, and video conferencing into a pre-integrated cabinet, enabling quick deployment and go-live.

NEW QUESTION # 362

In the Smart Urban-Management solution, which core technology supports non-contact law enforcement?

- A. Big Data
- B. Internet of Things
- C. Cloud Computing
- D. Video Intelligent Analysis

Answer: D

Explanation:

Video intelligent analysis identifies and records violations from footage, forming an electronic evidence chain for non-contact law enforcement.
