## C\_BCFIN\_2502 Certification Exam Cost | C\_BCFIN\_2502 Pdf Torrent

No matter who you are, I believe you can do your best to achieve your goals through our C\_BCFIN\_2502 Preparation questions! For we have three different versions of C\_BCFIN\_2502 exam materials to satisfy all your needs. The PDF version of C\_BCFIN\_2502 practice guide can be printed so that you can take it wherever you go. And the Software version can simulate the real exam environment and support offline practice. Besides, the APP online can be applied to all kind of electronic devices.

## SAP Certified Associate - Positioning SAP Business Suite via SAP Financial Management Solutions Sample Questions (Q50-Q55):

### NEW QUESTION # 50

To which core function of the record to report process is SAP S/4HANA Cloud for group reporting most relevant?

- A. Report
- B. Account
- C. Record
- D. Close

**Answer: D**

Explanation:

Comprehensive and Detailed 150 to 250 words of Explanation From Positioning SAP Business Suite via SAP Financial Management Solutions documents:

The Record-to-Report (R2R) process encompasses everything from capturing a business transaction to the final disclosure of financial results. Within this cycle, SAP S/4HANA Cloud for group reporting is specifically designed to address the Close function, specifically the corporate consolidation phase. In large organizations with multiple legal entities, the "closing" process involves not just local entity closes, but also the aggregation of data, intercompany eliminations, and currency translations required for group-level reporting.

SAP S/4HANA Cloud for group reporting is uniquely positioned because it is integrated directly into the SAP S/4HANA core. This allows for "continuous accounting" where local data is available for consolidation without the traditional, time-consuming Extract-Transform-Load (ETL) processes required by legacy consolidation tools. By focusing on the Close phase, it ensures that the consolidated financial statements are produced quickly and accurately, meeting the stringent deadlines of regulatory bodies. It bridges the gap between local accounting (the "Record" and "Account" phases) and the final dissemination of results (the "Report" phase), making it the engine that powers the complex financial close of a multi-entity enterprise.

#### NEW QUESTION # 51

Which SAP solution is used for managing fixed assets?

- A. SAP SuccessFactors
- B. SAP Ariba
- C. SAP Asset Management
- D. SAP Business One

**Answer: C**

#### NEW QUESTION # 52

What are examples of internal barriers to achieving the goals of the finance department?

Note: There are 3 correct answers to this question.

- A. Data silos and poor data quality
- B. Constant regulatory shifts
- C. Multiple legacy systems
- D. High cost of capital
- E. Manual, error-prone processes

**Answer: A,C,E**

Explanation:

Comprehensive and Detailed 150 to 250 words of Explanation From Positioning SAP Business Suite via SAP Financial Management Solutions documents:

To position SAP Financial Management Solutions effectively, one must understand the internal friction points that prevent a finance department from becoming a strategic partner to the business. Internal barriers are factors within the organization's control that impede efficiency. The most prevalent barriers include manual, error-prone processes, which consume valuable time and increase the risk of financial misstatement. When employees spend the majority of their time on data entry and spreadsheet manipulation, they cannot focus on value-added analysis.

Furthermore, data silos and poor data quality act as major roadblocks. When financial data is trapped in departmental silos, getting a holistic view of the company's performance is impossible, leading to "multiple versions of the truth." This is often exacerbated by the existence of multiple legacy systems that do not communicate with each other. These legacy systems require expensive maintenance and complex reconciliations. While "High cost of capital" (Option A) and "Constant regulatory shifts" (Option D) are certainly challenges for a CFO, they are considered external market or regulatory forces. SAP's value proposition is centered on removing these internal technical and process-oriented barriers by providing a unified, automated, and modern digital platform.

#### NEW QUESTION # 53

What is the core function of the SAP Identity Access Governance solution?

- A. Identifying, analyzing and neutralizing cyberattacks.
- B. Managing user authorizations and permissions.
- C. Supporting adherence to regulatory requirements.
- D. Performing risk assessments and strategic planning.

**Answer: B**

Explanation:

Comprehensive and Detailed 150 to 250 words of Explanation From Positioning SAP Business Suite via SAP Financial Management Solutions documents:

SAP Identity Access Governance (IAG) is a cloud-based service that focuses specifically on the management of user authorizations and permissions across an organization's hybrid landscape. In a modern finance environment, where data privacy and security are paramount, IAG provides a centralized way to control "who can do what" within the SAP system. This is critical for maintaining internal controls and protecting sensitive financial information.

The solution automates the provisioning process and ensures that "Segregation of Duties" (SoD) is strictly maintained. For example, it can prevent a user from having both the permission to create a purchase order and the permission to approve it, which is a fundamental requirement to prevent internal fraud. By automating these checks, IAG reduces the workload on IT and Audit teams while significantly lowering the risk of unauthorized access. While it helps meet regulatory requirements (Option C) and contributes to overall security, its primary operational function is the precise governance of user identities and the enforcement of access policies to ensure that every user has exactly the permissions they need-and no more.

#### NEW QUESTION # 54

Which of the following is a key advantage of SAP Business Suite on SAP HANA for financial management?

- A. Batch-based reporting
- **B. Real-time analytics**
- C. Manual reconciliation
- D. Limited scalability

**Answer: B**

#### NEW QUESTION # 55

.....
