

New CTS Test Pass4sure, Reliable CTS Source

P.S. Free & New CTS dumps are available on Google Drive shared by SureTorrent: https://drive.google.com/open?id=1qu7WSfh2XHB3VsarOm_AXSv77HJutez

As long as you study with our CTS exam braindumps for 20 to 30 hours that we can claim that you will pass the exam for sure. We really need this efficiency. Perhaps you have doubts about this "shortest time." I believe that after you understand the professional configuration of CTS Training Questions, you will agree with what I said. What our CTS study materials contain are all the real questions and answers that will come out in the real exam.

AVIXA CTS Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Implementing AV Solutions: This section of the exam measures the skills of AV system integrators and focuses on the implementation of AV solutions. It involves integrating AV systems, verifying their functionality, and managing the integration process, including training, documentation, and ensuring operational readiness.
Topic 2	<ul style="list-style-type: none">Supporting AV System Operation: This section of the exam measures the skills of AV support specialists and covers the ongoing support of AV systems. It includes troubleshooting issues, providing remote assistance, supporting live events, and offering in-room operation training to ensure smooth system operation.
Topic 3	<ul style="list-style-type: none">Creating AV Solutions: This section of the exam measures the skills of AV system designers and covers the process of creating audiovisual solutions. It includes conducting customer needs analysis, performing site surveys to assess environmental factors like lighting and acoustics, developing project scopes, and designing AV solutions with detailed drawings and materials lists.
Topic 4	<ul style="list-style-type: none">Servicing AV Solutions: This section of the exam measures the skills of AV maintenance managers and focuses on the maintenance and repair of AV solutions. It involves supervising AV operations, conducting preventative maintenance, performing firmware and equipment upgrades, and troubleshooting and repairing AV systems to ensure they remain functional and efficient.

AVIXA CTS Exam Certification Details:

Passing Score	350 / 500
Exam Code	CTS
MemberExam Price	\$375(USD)
Number of Questions	110
Duration	150 mins
Non-Member Exam Price	\$475(USD)
Exam Name	AVIXA Certified Technology Specialist (CTS)
Books / Training	Candidate Handbook

Top New CTS Test Pass4sure | Useful Reliable CTS Source and Unparalleled Certified Technology Specialist Questions Exam

With the high employment pressure, more and more people want to ease the employment tension and get a better job. The best way for them to solve the problem is to get the CTS certification. Because the certification is the main symbol of their working ability, if they can own the CTS certification, they will gain a competitive advantage when they are looking for a job. An increasing number of people have become aware of that it is very important for us to gain the CTS Exam Questions in a short time. And our CTS exam questions can help you get the dreaming certification.

AVIXA Certified Technology Specialist Sample Questions (Q117-Q122):

NEW QUESTION # 117

When calibrating a loudspeaker system, which weight setting on the SPi. meter is used for its mdus>on of low frequency sound levels in the measurement?

- A. Weighted
- **B. Weighted**
- C. Weighted
- D. Weighted

Answer: B

Explanation:

When calibrating a loudspeaker system, the C-weighted setting on an SPL (Sound Pressure Level) meter is typically used because it provides a relatively flat frequency response, including low-frequency sound levels.

This makes it more suitable for accurately measuring the overall sound pressure level, especially in environments where low-frequency performance is critical, such as in audio and home theater systems. The C-weighted setting captures the full range of audible frequencies, ensuring a comprehensive and precise calibration.

NEW QUESTION # 118

At what time of day is it BEST to conduct a site survey?

- A. After normal business hours
- **B. During normal operations**
- C. Early mornings
- D. Only at specially scheduled appointments

Answer: B

Explanation:

To understand how a space is truly used, surveys should be done during normal operations. This reveals patterns like ambient noise, occupancy, workflow, lighting, and use of AV systems-all essential for effective design.

"Observing the space under normal conditions reveals user behavior, usage patterns, and environmental factors."

- CTS Exam Guide, Needs Analysis and Site Assessment

NEW QUESTION # 119

The architect states that the project is in the pre-design phase. This would indicate that

- A. the control system is ready for implementation.
- B. construction is about to commence.
- C. the reflected ceiling plan has been approved.
- D. a needs analysis should be requested.

Answer: D

Explanation:

In the pre-design phase of a project, the focus is on gathering information to define requirements, goals, and constraints. A needs analysis is appropriate at this stage to identify what the client needs from the AV system, which will inform the subsequent design and planning phases.

CTS Technology Specialist Reference According to CTS guidelines, conducting a needs analysis during the pre-design phase is essential to understand client requirements and project scope before moving into design and construction phases.

NEW QUESTION # 120

What should be identified during a project's needs analysis?

- A. the overall budget
- B. the timeline for completion
- C. key activities to be performed
- D. stakeholders involved

Answer: D

Explanation:

A needs analysis should identify all stakeholders involved, as they influence project requirements, decision-making, and the approval process. Understanding stakeholders ensures that all perspectives are considered, leading to a more comprehensive solution.

CTS Technology Specialist Reference

CTS guidelines stress identifying stakeholders early to ensure project alignment with all key parties and address specific needs or preferences.

NEW QUESTION # 121

The functionality of an audio system is often reduced to what three easily understood concepts?

- A. Intelligibility, bass, stability
- B. Intelligibility, loudness, warmth
- C. Intelligibility, loudness, stability
- D. Reverberation, depth, stability

Answer: C

Explanation:

The three core performance attributes of any audio system are intelligibility (clarity of speech), loudness (sufficient sound pressure level), and stability (resistance to feedback). These parameters ensure a usable and effective sound reinforcement system.

"For speech reinforcement systems, performance must be measured by intelligibility, loudness, and system stability. Without all three, usability is compromised."

NEW QUESTION # 122

.....

You can also accelerate your career with the AVIXA CTS certification if you study with our CTS actual exam questions. We are certain that with these AVIXA CTS real exam questions you will easily prepare and clear the AVIXA CTS test in a short time. The only goal of SureTorrent is to help you boost the AVIXA CTS test preparation in a short time. To meet this objective, we offer updated and actual Certified Technology Specialist Expert CTS Exam Questions in three easy-to-use formats. These formats are AVIXA PDF Questions file, desktop AVIXA CTS practice test software, and AVIXA CTS web-based practice exam. All these three formats of our updated AVIXA CTS exam product have valid, actual, updated, and error-free CTS test questions. You can quickly get fully prepared for the test in a short time by using our CTS pdf questions.
