

# Unlock Your Potential with IAPP AIGP Exam Questions

Useful Study Guide &  
Exam Questions to Pass  
the IAPP AIGP Exam

Solve IAPP AIGP Practice Tests to Score High!

www.CertifyExam.com  
Here are all the necessary details to pass the AIGP exam on your first attempt. Get rid of all your worries now and find the details regarding the syllabus, study guide, practice tests, books, and study materials in one place. Through the AIGP certification preparation, you can learn more on the IAPP Certified Artificial Intelligence Governance Professional, and getting the IAPP Certified Artificial Intelligence Governance Professional (AIGP) certification gets easy.

P.S. Free 2026 IAPP AIGP dumps are available on Google Drive shared by ITExamDownload: <https://drive.google.com/open?id=1KCcbOxLrzp2O3aAXfZI9Frc4FVlrbpGJ>

PDF design has versatile and printable material for IAPP AIGP certification, so you all can breeze through the IAPP AIGP exam without any problem. You can get to the PDF concentrate on material from workstations, tablets, and cell phones for the readiness of IAPP Certified Artificial Intelligence Governance Professional (AIGP) exam.

## IAPP AIGP Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Understanding How to Govern AI Deployment and Use: This section of the exam measures skills of technology deployment leads and covers the responsibilities associated with selecting, deploying, and using AI models in a responsible manner. It includes evaluating key factors and risks before deployment, understanding different model types and deployment options, and ensuring ongoing monitoring and maintenance. The domain applies to both proprietary and third-party AI models, emphasizing the importance of transparency, ethical considerations, and continuous oversight throughout the model's operational life.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>• <b>Understanding How to Govern AI Development:</b> This section of the exam measures the skills of AI project managers and covers the governance responsibilities involved in designing, building, training, testing, and maintaining AI models. It emphasizes defining the business context, performing impact assessments, applying relevant laws and best practices, and managing risks during model development. The domain also includes establishing data governance for training and testing, ensuring data quality and provenance, and documenting processes for compliance. Additionally, it focuses on preparing models for release, continuous monitoring, maintenance, incident management, and transparent disclosures to stakeholders.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• <b>Understanding How Laws, Standards, and Frameworks Apply to AI:</b> This section of the exam measures skills of compliance officers and covers the application of existing and emerging legal requirements to AI systems. It explores how data privacy laws, intellectual property, non-discrimination, consumer protection, and product liability laws impact AI. The domain also examines the main elements of the EU AI Act, such as risk classification and requirements for different AI risk levels, as well as enforcement mechanisms. Furthermore, it addresses the key industry standards and frameworks, including OECD principles, NIST AI Risk Management Framework, and ISO AI standards, guiding organizations in trustworthy and compliant AI implementation.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Understanding the Foundations of AI Governance:</b> This section of the exam measures skills of AI governance professionals and covers the core concepts of AI governance, including what AI is, why governance is needed, and the risks and unique characteristics associated with AI. It also addresses the establishment and communication of organizational expectations for AI governance, such as defining roles, fostering cross-functional collaboration, and delivering training on AI strategies. Additionally, it focuses on developing policies and procedures that ensure oversight and accountability throughout the AI lifecycle, including managing third-party risks and updating privacy and security practices.</li> </ul>

## IAPP AIGP Three formats

You may be taken up with all kind of affairs, and sometimes you have to put down something and deal with the other matters for the latter is more urgent and need to be done immediately. With the help of our AIGP training guide, your dream won't be delayed anymore. Because, we have the merits of intelligent application and high-effectiveness to help our clients study more leisurely. If you prepare with our AIGP Actual Exam for 20 to 30 hours, the AIGP exam will become a piece of cake in front of you.

## IAPP Certified Artificial Intelligence Governance Professional Sample Questions (Q100-Q105):

### NEW QUESTION # 100

What is the primary purpose of an AI impact assessment?

- **A. To anticipate and manage the potential risks and harms of an AI system**
- B. To determine whether a conformity assessment is needed
- C. To identify and measure the benefits of an AI system
- D. To escalate the findings to the appropriate owner(s)

**Answer: A**

Explanation:

The correct answer is D. AI Impact Assessments are primarily used to identify and manage risks and harms associated with AI systems.

From the AIGP Body of Knowledge:

"The goal of an AI impact assessment is to ensure that risks are identified, evaluated, and mitigated prior to or during development and deployment." As further confirmed in the AI Governance in Practice Report 2024 (Part III):

"Risk-based tools like DPIAs and Algorithmic Impact Assessments help identify potential risks to individuals and society, enabling organizations to implement mitigation plans and safeguards." While benefits may be noted in such assessments, the core objective is to manage risks and promote responsible AI.

### NEW QUESTION # 101

A company has developed a proprietary AI model that analyzes consumer online behavior and predicts what prices consumers would be willing to pay for certain products, so that retailers may modify pricing accordingly. To test the model, the company has:

- Performed an impact assessment.
- Conducted repeatability tests.
- Exposed the model to edge cases and potential malicious input.
- Conducted adversarial testing to ID security threats.
- Assessed and mitigated discrimination risks.

Which additional responsible AI principle has the company failed to assess?

- A. Data Integrity.
- **B. Transparency.**
- C. Robustness.
- D. Fairness.

**Answer: B**

Explanation:

While the company addressed security, fairness, and robustness through testing and risk assessment, transparency, ensuring stakeholders understand how the model makes decisions, has not been explicitly assessed.

### NEW QUESTION # 102

Scenario:

A U.S.-based AI governance professional is evaluating resources from the National Institute of Standards and Technology (NIST) to guide the organization's AI risk assessment strategy. They are particularly interested in programs focused on assessing AI-specific impacts.

The main purpose of NIST's Assessing Risks and Impacts of AI (ARIA) program is to:

- **A. Provide a suite of resources to manage risks**
- B. Pilot new standards for AI red-teaming
- C. Offer a regulatory sandbox for risk reporting
- D. Promote interoperability across AI systems

**Answer: A**

Explanation:

The correct answer is A. The ARIA program by NIST is explicitly designed to support stakeholders in understanding and managing the risks and impacts of AI systems.

From the AIGP ILT Guide - U.S. Risk Frameworks Module:

"NIST's ARIA program develops and pilots assessment tools for AI risks and impacts, aimed at improving organizational capacity for responsible AI use." Also cited in the AI Governance in Practice Report 2025 (Frameworks Section):

"ARIA supports and aligns with the AI Risk Management Framework by helping organizations assess AI harms, safety concerns, and societal implications." ARIA is not a red-teaming or sandbox program-it's an assessment and governance resource.

### NEW QUESTION # 103

A company developed AI technology that can analyze text, video, images and sound to tag content, including the names of animals, humans and objects. What type of AI is this technology classified as?

- A. Transformative AI.
- B. Expert system.
- **C. Multi-modal model.**
- D. Deductive inference.

**Answer: C**

Explanation:

This AI processes multiple types of data (text, video, images, sound) simultaneously, which classifies it as a multi-modal model.

### NEW QUESTION # 104

What is the main purpose of accountability structures under the Govern function of the NIST AI Risk Management Framework?

- A. To enable and encourage participation by external stakeholders.
- B. To establish diverse, equitable and inclusive processes.
- C. To determine responsibility for allocating budgetary resources.
- **D. To empower and train appropriate cross-functional teams.**

**Answer: D**

Explanation:

Accountability structures under the NIST AI Risk Management Framework's Govern function focus on empowering and training cross-functional teams to manage AI risks effectively.

### NEW QUESTION # 105
