Salesforce Certified Experience Cloud Consultant Sample Questions (Q77-Q82):

NEW QUESTION # 77

Which step does the system administrator have to take to create a partner user?

- **A. Select Enable Partner User from the Contact Detail page.**
- B. Add the user to the All Partner Portal Users public group.
- C. Create a partner queue, and add users to it.
- D. Assign the Gold Partner permission to the user.

Answer: A

Explanation:

This step allows the system administrator to create a partner user from an existing contact that is associated with a partner account. The partner user inherits the role, profile, and permission sets from the contact. The system administrator can also specify a username, email address, and nickname for the partner user.

NEW QUESTION # 78

DreamHouse Realty (DR) plans to invite individuals from several new companies to its Broker Portal and would like to differentiate the user experience for each company.

Which three options should the DR system administrator use to personalize the look and feel of the portal for each new brokerage?

Choose 3 answers

- **A. Branding Sets**
- **B. Audience Targeting**
- **C. Page Variations**
- D. Audience Sets
- E. Partner User Roles

Answer: A,B,C

Explanation:

Branding sets allow the administrator to define the colors, fonts, logos, and images for different parts of the site, such as the header, footer, and body. Page variations allow the administrator to create different versions of a page with different layouts, components, and content. Audience targeting allows the administrator to create audiences based on user attributes, such as profile or company name, and display different branding sets or page variations to different audiences within the same site.

NEW QUESTION # 79

Ursa Major Solar (UMS) has business and person accounts in its Salesforce org. UMS has partner portals created for its Silver partners, DreamHouse Realty (DR) and Cloud Kicks (CK).

UMS's Experience team is creating users for its partners. DR and CK users do not require access to opportunities, leads, and campaigns.

What are the two considerations for creating partner users and granting access?

Choose 2 answers

- **A. Assign Partner Community license to partner users.**
- B. Only person accounts can be created as partner users.
- C. Only business accounts can be created as partner users
- **D. Assign Customer Community Plus license to partner users.**

Answer: A,D

Explanation:

Two considerations for creating partner users and granting access are B and C. Partner users are external users who access your

Experience Cloud site through a partner account. A partner account is an account that has the Is Partner checkbox enabled. To create partner users and grant access, you need to assign them a license type and a profile. Two license types that are suitable for partner users are Partner Community and Customer Community Plus. These license types allow partner users to access standard CRM objects, such as accounts, contacts, leads, opportunities, and cases, as well as custom objects and tabs. They also allow partner users to use roles and sharing rules to share records with other users.

NEW QUESTION # 80

Northern Trail Outfitters (NTO) is evaluating Experience Cloud for creating an onboarding app for new hires. Which two things should NTO consider when creating the onboarding app? Calculator Choose 2 answers

- A. Experience Cloud cannot be used for employee apps.
- B. Employee apps are only available in Unlimited Edition.
- C. Not all Chatter posts inside Chatter groups within the employee app will be available in the main org.
- D. Chatter posts related to a record will be available in the employee app as well as the main org.

Answer: C,D

Explanation:

Experience Cloud can be used for employee apps, such as an onboarding app for new hires. However, there are some considerations when creating an employee app, such as:

* Not all Chatter posts inside Chatter groups within the employee app will be available in the main org.

Only posts in public groups or groups that are shared with the main org will be visible in both places.

* Chatter posts related to a record will be available in the employee app as well as the main org.

However, users need to have access to the record in both places to see the posts.

NEW QUESTION # 81

Dreamscape Flowers recently launched three Experience Cloud sites for North America, Europe, and Asia Pacific regions. The Community managers have installed the Salesforce Communities Management package and are getting useful insights on adoption and engagement.

During the Community managers' weekly meeting, the Community manager for Europe mentioned that the preconfigured Insights reports cannot be used for their Experience Cloud site.

What is the reason for this issue?

- A. The preconfigured Insights reports need to be modified to meet GDPR requirements.
- B. The Experience Cloud site for Europe has more than a million users.
- C. The Experience Cloud site for Europe is not using Chatter which is needed to use the preconfigured Insights reports.
- D. The Community manager for Europe does not have System Administrator privileges.

Answer: A

Explanation:

The reason for this issue is that the preconfigured Insights reports need to be modified to meet GDPR requirements. Insights is a feature that allows you to measure and analyze the adoption and engagement of your Experience Cloud sites using preconfigured reports and dashboards. However, some of these reports may not comply with GDPR, which is a regulation that protects the privacy and data rights of individuals in the European Union. To use Insights for the Experience Cloud site for Europe, the Community manager needs to modify the preconfigured reports to meet GDPR requirements, such as anonymizing user data, obtaining user consent, and deleting user data upon request.

NEW QUESTION # 82

.....
