CMMC-CCA Exam Reference | Online CMMC-CCA Version

Just imagine that if you get the CMMC-CCA certification, then getting high salary and promotion will completely have no problem. At the same time, you will have more income to lead a better life and develop your life quality. Who will refuse such a wonderful dream? So you must struggle for a better future. Life is a long journey. It is never too late to learn new things. Our CMMC-CCA Study Materials will never disappoint you. And you will get all you desire with our CMMC-CCA exam questions.

Cyber AB Certified CMMC Assessor (CCA) Exam Sample Questions (Q20-Q25):

NEW QUESTION # 20

A CMMC assessment for an OSC finds it has fully implemented 87 out of 110 practices. Unfortunately, the Assessment Team determines that the POA&M Closeout Assessment option cannot be used. Consequently, the OSC will not be recommended for certification. However, the OSC Assessment Official humbly requests the Lead Assessor to adjust the findings to allow for POA&M closeout and mark a five-point practice as implemented. How should the Lead Assessor respond?

- A. Negotiate with the OSC to implement additional practices and reassess the POA&M Closeout Assessment option.
- B. Agree to the request and tweak the findings.
- C. Politely decline the request and cite ethical reasons of violating the CoPC.

- D. Report the request to the Cyber AB and recommend disciplinary action against the OSC Assessment Official.

Answer: C

Explanation:

Comprehensive and Detailed in Depth Explanation:

Adjusting findings violates CoPC Objectivity and Integrity (Option A). Options B, C, and D are inappropriate responses.

Extract from Official Document (CoPC):

* Paragraph 2.2 - Objectivity (pg. 5): "Do not alter findings to influence certification outcomes." References:

CMMC Code of Professional Conduct, Paragraph 2.2.

NEW QUESTION # 21

As a CCA, you were the Lead Assessor for a C3PAO Assessment Team that has just completed a CMMC assessment for an OSC. However, an individual has requested under the FOIA that your C3PAO release the assessment results. As the Lead Assessor, your C3PAO wants to hear your views on this request. What should your recommendation be?

- A. Release a redacted version of the assessment results.
- B. Refer the FOIA request to the CMMC Accreditation Body for guidance and a decision on whether to release the assessment results.
- **C. Deny the request and do not release any assessment information.**
- D. Release the full assessment results.

Answer: C

Explanation:

Comprehensive and Detailed in Depth Explanation:

The CoPC protects OSC data unless legally obligated (e.g., court order), and an individual FOIA request does not override this (Option D). Options A, B, and C risk unauthorized disclosure.

Extract from Official Document (CoPC):

* Paragraph 3.2(2) - Confidentiality (pg. 6): "Do not disclose confidential assessment results without customer permission or legal obligation." References:

CMMC Code of Professional Conduct, Paragraph 3.2(2).

NEW QUESTION # 22

John, a Certified CMMC Assessor, has been conducting CMMC assessments for several years. During a recent assessment at a defense contractor, he encountered several issues similar to challenges he had faced in previous assessments. Influenced by his past experiences, John's interpretation of the contractor's practices was shaped by his preconceptions. Which of the following is TRUE about John's interpretation?

- A. John's bias has no impact on the integrity of the assessment
- B. John's preconceptions help streamline the assessment process and ensure consistency
- **C. John's bias can affect the integrity of the CMMC assessment**
- D. John's experience ensures that all assessments will be unbiased and accurate

Answer: C

Explanation:

Comprehensive and Detailed in Depth Explanation:

The CMMC Assessment Process (CAP) emphasizes that assessor bias, whether stemming from past experiences or other factors, can compromise the objectivity and integrity of an assessment. John's preconceptions, based on prior encounters, may lead him to misinterpret evidence, either overly critically or leniently, rather than evaluating the OSC's practices in their current context. This aligns with CAP's requirement for assessors to remain impartial and focus on objective evidence specific to each assessment. Option A (no impact) contradicts CAP's guidance on bias management. Option C (experience ensures unbiased accuracy) overstates experience's role, ignoring bias risks. Option D (streamlining via preconceptions) misrepresents bias as beneficial, whereas it risks inconsistency. Option B correctly identifies the potential impact on assessment integrity, making it the correct answer.

Reference Extract:

* CMMC Assessment Process (CAP) v1.0, Section 2.3: "Assessor experiences can affect outcomes... Bias must be managed to maintain assessment integrity." Resources: <https://cyberab.org/Portals/0/Documents>

NEW QUESTION # 23

A CCA is prohibited from doing which of the following?

- A. Verifying key internal system boundaries
- **B. Determining if physically separated assets contain CUI**
- C. Ensuring the external system boundary is fully defined
- D. Examining whether communications are monitored at the external system boundary

Answer: B

Explanation:

The OSC is responsible for identifying and declaring where CUI is processed, stored, or transmitted. A Certified CMMC Assessor (CCA) may verify boundaries, examine evidence, and confirm monitoring or control practices, but cannot independently determine if a physically separated asset contains CUI. That determination is the responsibility of the OSC, not the assessor.

Exact extracts:

- * "The OSC is responsible for identifying CUI assets."
- * "Assessors verify and validate the OSC's identification, but do not independently declare or determine the presence of CUI."
- * "Assessors are permitted to examine boundary protections, monitoring mechanisms, and internal boundary controls." Why the other options are allowed:
 - * A: Assessors are required to verify internal system boundaries.
 - * C: Assessors must confirm that external system boundaries are clearly defined.
 - * D: Assessors must examine evidence of communication monitoring.

References (CCA documents / Study Guide):

- * CMMC Assessment Guide - Level 2, Assessor Roles and Responsibilities.
- * CMMC Code of Professional Conduct (OSC retains CUI ownership; assessors validate but cannot declare CUI).

NEW QUESTION # 24

During the Planning Phase of the Assessment Plan, the assessor determines that the Client will likely include sensitive and proprietary CUI. What should the assessor consider as part of their virtual data collection techniques for this information?

- **A. The client and assessor should record the risks and mitigations to protect the CUI categories handled.**
- B. The Client is responsible for safeguarding the data during collection, not the assessor.
- C. The assessor should record the risks and mitigations to protect the CUI categories handled.
- D. The assessor is responsible for safeguarding the data during collection, not the client.

Answer: A

Explanation:

* Applicable Requirement (CAP - Planning Phase): Both the OSC (Client) and the CCA are responsible for protecting sensitive evidence and CUI during assessment. This includes documenting risks and mitigations for how such information is handled, especially during virtual collection.

* Why D is Correct: CAP requires assessors and OSCs to jointly establish processes ensuring safeguarding of CUI evidence. Both parties must record and agree to risks and mitigations as part of the assessment plan.

Why Other Options Are Insufficient:

- * A & B: Responsibility is shared, not one-sided.
- * C: Recording by the assessor alone does not fulfill CAP's joint responsibility requirement.

References (CCA Official Sources):

- * CMMC Assessment Process (CAP) v1.0 - Planning Phase (Handling CUI and Sensitive Evidence)
- * Code of Professional Conduct - Assessor responsibility for safeguarding CUI

NEW QUESTION # 25

.....

Work hard and practice with our Cyber AB CMMC-CCA dumps till you are confident to pass the Cyber AB CMMC-CCA exam. And that too with flying colors and achieving the Cyber AB CMMC-CCA Certification on the first attempt. You will identify

both your strengths and shortcomings when you utilize CMMC-CCA practice exam software (desktop and web-based).
