P.S. Free & New MB-335 dumps are available on Google Drive shared by PassSureExam: <https://drive.google.com/open?id=11oEIAWav9xgE2BQZT1CNvrDc3Kt-YmqS>

After the client pay successfully they could receive the mails about MB-335 guide questions our system sends by which you can download our test bank and use our MB-335 study materials in 5-10 minutes. The mail provides the links and after the client click on them the client can log in and gain the MB-335 Study Materials to learn. The procedures are simple and save clients' time. For the client the time is limited and very important and our MB-335 learning guide satisfies the client's needs to download and use our MB-335 practice engine immediately.

Microsoft MB-335 Exam consists of multiple-choice questions designed to assess your knowledge across five content categories. The categories include Implementation Planning, Solution Configuration, Data Management and Migration, Testing, and Support and Maintenance. The test is run and administered by Pearson Vue and can be taken at Pearson Vue centers or online testing centers.

Earning the Microsoft MB-335 certification can help professionals advance their careers in supply chain management. It demonstrates to employers and clients that they have the skills and knowledge needed to help organizations optimize their supply chain operations. Additionally, this certification can improve job prospects and earning potential, as it is recognized globally by employers and industry leaders.

It is essential to have industry experience and specialized skills before writing the exam. Candidates must also hold a strong command over the Dynamics 365 Supply Chain Management functionalities. These skills will enable the consultant to cater to the client's customized requirements and assist in the successful implementation of the ERP software. Candidates must also stay updated with the latest updates and features in the Dynamics 365 Supply Chain Management modules.

## MB-335 Practice Exams Free | Valid MB-335 Exam Guide

We promise you that if you fail to pass the exam after using MB-335 training materials of us, we will give you full refund. We are pass guarantee and money back guarantee if you fail to pass the exam. Besides, MB-335 exam dumps are high-quality, you can pass the exam just one time if you choose us. We offer you free update for one year for MB-335 Training Materials, and our system will send the update version to your email automatically. We have online and offline service, the staff possess the professional knowledge for MB-335 exam dumps, if you have any questions, don't hesitate to contact us.

## Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert Sample Questions (Q24-Q29):

### NEW QUESTION # 24

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A manufacturing company has a new speaker that is available with standard and premium carbon fiber options.

For the premium option, speakers are made to order. Customers can choose from seven product attributes at different prices.

You need to create and configure the product and pricing for the new speaker.

Solution: Create a constraint-based product with configurations. Use a price model to calculate the different configurable option costs.

Does the solution meet the goal?

- A. No
- B. Yes

**Answer: A**

Explanation:

The solution meets the goal. Here is the explanation:

\* To create and configure the product and pricing for the new speaker, you should use the following steps1:

\* Create a product master for the speaker and release it to the relevant legal entities. On the Product dimension groups page, select Constraint-based configuration as the configuration technology, and select the configuration dimension. On the Released product details page, select Configurable on the Engineer tab.

\* Create a constraint-based product configuration model for the speaker and add it as a version to the product master. On the Constraint-based product configuration model details page, add attributes, constraints, subcomponents, BOM lines, and route operations to define the features and structure of the speaker. For example, you can add an attribute for carbon fiber options and specify Standard and Premium as the values. You can also add constraints to limit the combinations of attribute values that are allowed.

\* Create a price model for the speaker and link it to the product configuration model. On the Price models page, add price components and specify how they are calculated based on attributes, subcomponents, BOM lines, or route operations. For example, you can add a price component for carbon fiber options and specify different prices for Standard and Premium values. You can also add price components for other attributes that affect the price of the speaker.

\* Configure products on sales orders, sales quotations, purchase orders, or production orders by using the Product configuration models page. You can select values for attributes and see how they affect the price of the speaker. You can also view the price details and see how each price component contributes to the total price.

1: Product configuration overview : Create constraint-based configuration : Price models

### NEW QUESTION # 25

You are a process engineer evaluating lean vs. Discrete processing. You want to convert a Kanban item. This item has the following Lean setup:

\* The setup uses a lean schedule group with a throughput ratio = 2.

\* The process activity tied to production flow has the following runtime activity times: time = 3 min. per quantity = 1.

\* The work cell capacity has a model type of Throughput and an average throughput quantity of 60 per a capacity period of standard workday (8-hour day).

\* The throughput is 10 per hour.

You need to set up a Discrete operation to mirror the item's production flow activity.

What should you do?

- A. Create a route with a runtime = 10, a process quantity = 6, and the operation's hours/time = 1.
- B. Create a route with a runtime = 1, a process quantity = 10, and the operation's hours/time = 1.
- C. Create a route with a runtime = 1, a process quantity = 1, and the operation's hours/time = 1.
- D. Create a route with a runtime - 6, a process quantity- 1, and the operation's hours/time - 1.

**Answer: D**

**NEW QUESTION # 26**

You are the production supervisor in charge of setting effective cost prices for the labor force in a manufacturing company. It is the end of the year and the labor rates have been recalculated based on new salary data. You need to update the effective labor costs for all labor groups. Which element must be updated?

- A. cost category
- B. production orders
- C. cost groups
- D. shared category
- E. resource group

**Answer: A**

Explanation:

A cost category is a classification of costs that are related to an operations resource or a routing operation<sup>1</sup>. A cost category can have one or more cost elements, such as labor, machine, subcontractor, or material<sup>1</sup>. A cost element represents a specific type of cost that is incurred for an operations resource or a routing operation<sup>2</sup>.

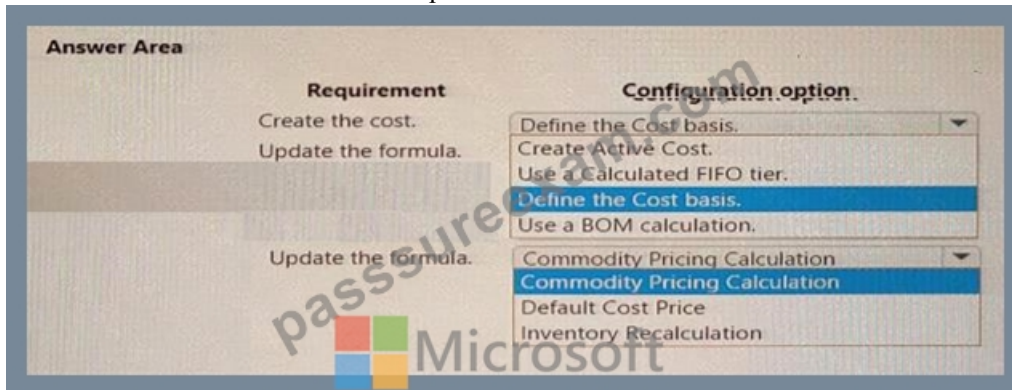

To update the effective labor costs for all labor groups, you must update the cost category that is assigned to the labor groups. You can use the Cost categories page to modify the cost elements and rates for the cost category<sup>3</sup>. You can also use the Costing versions page to create a new costing version with updated cost categories and activate it for future production orders.

**NEW QUESTION # 27**

You need to resolve the issue for UserE.

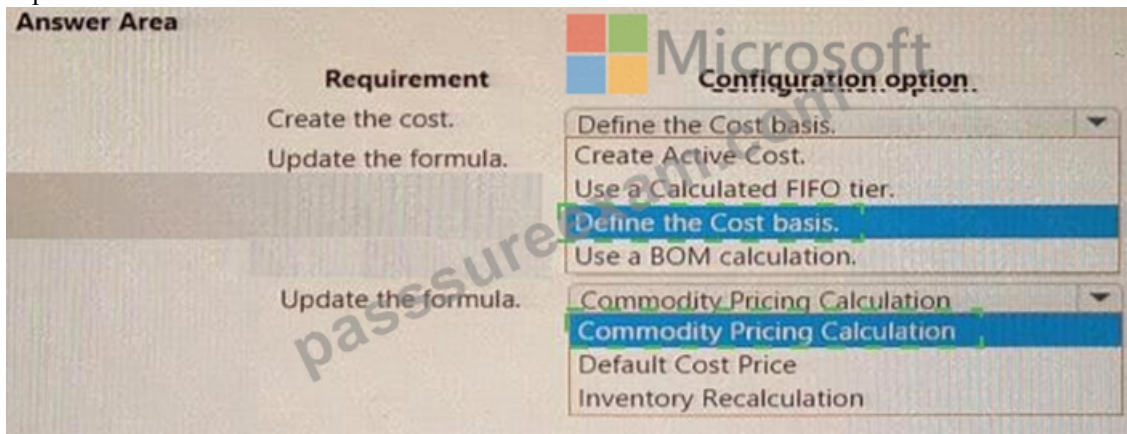

Which configuration options should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation:
