BTW, DOWNLOAD part of CertkingdomPDF Fire-Inspector-II dumps from Cloud Storage: [https://drive.google.com/open?id=1CMFTvT3xyRwlc58CATQxEcQXavPO\\_TZ](https://drive.google.com/open?id=1CMFTvT3xyRwlc58CATQxEcQXavPO_TZ)

CertkingdomPDF has built customizable International Code Council Fire-Inspector-II practice exams (desktop software & web-based) for our customers. Users can customize the time and Fire-Inspector-II questions of International Code Council Fire-Inspector-II Practice Tests according to their needs. You can give more than one test and track the progress of your previous attempts to improve your marks on the next try.

There are a lot of excellent experts and professors in our company. The high quality of the Fire-Inspector-II reference guide from our company resulted from their constant practice. After a long period of research and development, our Fire-Inspector-II test questions have been the leader study materials in the field. We have taken our customers' suggestions of the Fire-Inspector-II Exam Prep seriously, we have tried our best to perfect the Fire-Inspector-II reference guide from our company just in order to meet the need of these customers well. So stop hesitation and buy our Fire-Inspector-II study materials.

## Fire-Inspector-II Sample Questions Pdf, Fire-Inspector-II Accurate Study Material

Differ as a result the Fire-Inspector-II questions torrent geared to the needs of the user level, cultural level is uneven, have a plenty of college students in school, have a plenty of work for workers, and even some low education level of people laid off, so in order to adapt to different level differences in users, the Fire-Inspector-II exam questions at the time of writing teaching materials with a special focus on the text information expression, as little as possible the use of crude esoteric jargon, as much as possible by everyone can understand popular words to express some seem esoteric knowledge, so that more users through the Fire-Inspector-II Prep Guide to know that the main content of qualification examination, stimulate the learning enthusiasm of the user, arouse their interest in learning.

## International Code Council 67 - Fire Inspector II Exam Sample Questions (Q58-Q63):

### NEW QUESTION # 58

Which of the following situations requires securing of an operational permit from the code official prior to commencing the related activity?

- A. Inside storage of 100 cu. ft. of baled cotton.
- B. Fruit ripening operations using carbon dioxide gas.
- C. Storing 85,000 bd. ft. of lumber.
- D. Organic coating production facility producing 2 gallons per day.

Answer: C

Explanation:

IFC Section 105.6 lists activities requiring operational permits. For A, lumber storage exceeding 100,000 board feet (bd. ft.) indoors or outdoors requires a permit (Section 105.6.28, Lumber Yards), but local thresholds may be lower-85,000 bd. ft. is close to this limit and likely exceeds typical exempt amounts, triggering a permit in many jurisdictions. For B, IFC Table 3206.2 allows small quantities of combustible commodities like baled cotton (100 cu. ft. is minimal) without a permit unless part of a larger high-piled storage operation. For C, fruit ripening with CO<sub>2</sub> (Section 105.6.13) requires a permit only for specific flammable gases, not CO<sub>2</sub> alone, which is nonflammable. For D, organic coating production (Section 105.6.33) requires a permit only above 1 gallon per day, but 2 gallons is still small-scale and context-dependent-lumber storage is the clearer permit trigger here. Thus, A is the best answer.

Reference: IFC 2021, Section 105.6 (Required Operational Permits), Section 3206.2 (High-Piled Storage).

### NEW QUESTION # 59

Given: A health club contains a 1,000-sq. ft. exercise room.

Based on the square footage, what is the calculated occupant load allowed for this exercise room?

- A. 0
- B. 1
- C. 2
- D. 3

**Answer: C**

Explanation:

The occupant load of a space is determined using the 2021 International Building Code (IBC), Table 1004.5 - Maximum Floor Area Per Occupant.

IBC Table 1004.5 - Occupant Load Factor for Exercise Rooms:

The occupant load factor for an exercise room is 1 person per 20 square feet.

Given that the exercise room is 1,000 sq. ft.:

$1,000 \text{ sq. ft.} \div 20 \text{ sq. ft. per person} = 50 \text{ occupants}$

Why Other Options Are Incorrect?

A: 10 - Would require a 100 sq. ft. per person load factor, which is not applicable for exercise rooms.

B: 20 - Incorrect calculation; using the correct load factor, the actual number is 50.

C: 30 - Also incorrect based on the proper load factor.

### NEW QUESTION # 60

Clearance between tops of piles of combustible fibers and sprinkler heads shall not be less than \_\_\_ ft.

- A. 0
- B. 1
- C. 2
- D. 3

**Answer: A**

Explanation:

Reference to Fire Code Requirements for Clearance Between Combustible Fibers and Sprinklers:

The International Fire Code (IFC 2021), Section 3206.6, states that the minimum clearance between the tops of piles of combustible fibers and sprinkler deflectors shall be no less than 3 feet.

This requirement ensures that the sprinkler system operates efficiently and that water distribution is not obstructed in case of a fire.

Fire Safety Concerns:

Combustible fibers pose a high fire risk due to their flammability and tendency to generate large amounts of heat and smoke.

Adequate clearance prevents heat accumulation near the sprinkler heads, ensuring they activate at the correct temperature.

Clarification of Incorrect Answer Choices:

A: 2 ft. # Incorrect

Too low and could obstruct sprinkler operation, reducing water distribution effectiveness.

C: 4 ft. # Incorrect

Exceeds the required minimum per the IFC 3206.6 standard, though more clearance is beneficial.

D: 5 ft. # Incorrect

More than the code requirement, but the mandatory clearance is 3 feet.

Conclusion:

The correct and verified answer is B (3 feet) based on IFC 3206.6, ensuring proper sprinkler performance and fire safety for combustible fiber storage.

#### NEW QUESTION # 61

Two tents which each have an area of 20,000 sq. ft. shall be separated from each other by a distance of not less than:

- A. 25 ft.
- B. 0 ft. (no separation is required).
- C. 10 ft.
- **D. 20 ft.**

**Answer: D**

Explanation:

IFC Section 3103.8.2 (Separation of Temporary Tents) requires tents larger than 15,000 sq. ft. to be separated by at least 20 feet to prevent fire spread, unless connected by a corridor meeting specific requirements (not indicated here). Each tent at 20,000 sq. ft. exceeds this threshold, necessitating 20 feet of separation. Option A (0 ft.) applies only to smaller tents, B (10 ft.) is insufficient, and D (25 ft.) exceeds the minimum. Thus, C is correct.

#### NEW QUESTION # 62

Refrigeration units or systems having a refrigerant circuit containing Group A1 refrigerant shall be provided with approved emergency signs, charts, and labels in accordance with NFPA 704 when the quantity exceeds \_\_\_ lb.

- A. 0
- B. 1
- **C. 2**
- D. 3

**Answer: C**

Explanation:

Refrigeration systems and units are regulated under IFC 2021, Section 605 - Refrigeration Equipment, and the requirement for emergency signs, charts, and labels is tied to the NFPA 704 Hazardous Materials Identification System.

IFC 2021, Section 605.12.3 - Signage for Refrigeration Systems:

States that approved emergency signs, charts, and labels must be provided when the refrigerant quantity exceeds 220 pounds for Group A1 refrigerants.

Definition of Group A1 Refrigerants (Low Toxicity, Low Flammability):

Examples include R-134a, R-410A, and R-22, which are commonly used in commercial and industrial HVAC systems.

Why Other Options Are Incorrect?

A: 30 lb. - Too low; labeling requirements do not apply at this threshold.

B: 100 lb. - Incorrect; the IFC requirement specifies 220 lb.

C: 200 lb. - Close, but still below the 220 lb. threshold.

#### NEW QUESTION # 63

.....

Originating the Fire-Inspector-II exam questions of our company from tenets of offering the most reliable backup for customers, and outstanding results have captured exam candidates' heart for their functions. Our Fire-Inspector-II practice materials can be subdivided into three versions. All those versions of usage has been well-accepted by them. There is not much disparity among these versions of Fire-Inspector-II simulating practice, but they do helpful to beef up your capacity and speed up you review process to master more knowledge about the exam, so the review process will be unencumbered.
