## New SAP C\_S4TM\_2023 Exam Simulator, Detail C\_S4TM\_2023 Explanation

Our supporter of C\_S4TM\_2023 study guide has exceeded tens of thousands around the world, which directly reflects the quality of them. Because the exam may put a heavy burden on your shoulder while our C\_S4TM\_2023 practice materials can relieve you of those troubles with time passing by. Just spent some time regularly on our C\_S4TM\_2023 Exam simulation, your possibility of getting it will be improved greatly.

## SAP Certified Associate - SAP S/4HANA Cloud Private Edition - Transportation Management Sample Questions (Q50-Q55):

### NEW QUESTION # 50

What functionality is achieved by using a handover location from SAP ERP document in SAP TM? Note: There are 2 correct

answers to this question.

- A. To determine planning relevance of stages in a freight unit
- B. To split freight unit stages in a delivery-based transportation requirement
- C. To split freight unit stages in an order-based transportation requirement
- D. To override incoterm location from SAP ERP document

**Answer: C,D**

#### **NEW QUESTION # 51**

Which of the following can you use to determine a stage sequence in a forwarding order? Note: There are 2 correct answers to this question.

- A. Stage type
- B. Movement type
- C. Stage profile
- D. Shipping type

**Answer: B,C**

Explanation:

Transportation Management for Logistics Service Provider (LSP)

#### **NEW QUESTION # 52**

Assuming an agreement determination condition is NOT used, which of the following involved parties determine the correct freight agreement for charge calculation in a freight order? Note: There are 2 correct answers to this question.

- A. Executing carrier
- B. Carrier
- C. Ordering party
- D. Purchasing organization

**Answer: B,D**

Explanation:

In SAP S/4HANA Transportation Management, when no agreement determination condition is used, the system relies on the carrier and purchasing organization to determine the correct freight agreement for charge calculation in a freight order. According to the SAP documentation, the carrier (the party providing transportation services) and the purchasing organization (the organizational unit responsible for procurement) are key involved parties in the freight agreement. The freight agreement is selected based on the carrier assigned to the freight order and the purchasing organization defined in the document, ensuring that the correct rates and conditions are applied.

The other options are incorrect:

\* Ordering party (B) is typically the customer or shipper requesting transportation but is not directly used to determine the freight agreement unless specified via conditions.

\* Executing carrier (D) is redundant with the carrier (A), as the carrier assigned to the freight order is considered the executing carrier.

#### **NEW QUESTION # 53**

You add an assessorial charge to a freight order after the freight settlement document (FSD) has been posted and accruals have been booked in materials management. The background report to create FSDs determines change strategy "Reverse and Repost with new FSD" for this freight order.

What will you see in transportation management and materials management? Note: There are 2 correct answers to this question.

- A. 3 service entry sheets in materials management

- B. 3 FSDs in transportation management
- C. 1 purchase order in materials management
- D. 2 FSDs and 1 credit memo in transportation management

**Answer: B,D**

Explanation:

Transportation Planning

#### NEW QUESTION # 54

What is the maximum number of freight settlement documents that can be created from a freight order with two deliveries during its lifecycle, given that all the charge elements in the calculation sheet have a value greater than zero?

- A. 0
- B. 1
- C. No limit
- D. 2

**Answer: C**

Explanation:

In SAP S/4HANA Transportation Management, freight settlement documents (FSDs) are created based on freight orders to settle charges with carriers. According to the SAP documentation, there is no limit to the number of FSDs that can be created from a freight order during its lifecycle, as additional FSDs can be generated for changes, such as additional charges, corrections, or disputes, provided the charge elements have non-zero values. For a freight order with two deliveries, multiple FSDs can be created to account for initial settlements, amendments, or additional charges (e.g., detention or assessorial charges) throughout the lifecycle.

The other options are incorrect:

\* A (3), B (1), and C (2) assume a fixed number of FSDs, which is not accurate since the system allows multiple FSDs based on changes or additional requirements.
