Topic 3	<ul style="list-style-type: none">HUAWEI IdeaHub Product Technology Training: Covers the technology, features, and use cases of the HUAWEI IdeaHub all-in-one collaboration board.

Huawei HCSA-Field-Intelligent Collaboration V1.0 Sample Questions (Q34-Q39):

NEW QUESTION # 34

Which audio codec protocol is not supported by Huawei CloudMCU?

- A. G.722
- B. G.711
- **C. G.721**
- D. G.729

Answer: C

Explanation:

The Huawei CloudMCU is a converged media platform that supports a wide range of industry-standard audio codecs to ensure interoperability and high-quality voice. According to official technical specifications, the supported audio protocols include:

* Narrowband: G.711a/u, G.729, G.729A, and iLBC.

* Wideband/High-Fidelity: G.722, G.722.1, G.722.1C (Siren7/14), OPUS, and AAC-LD.

G.721 is an obsolete 32 kbit/s ADPCM standard that was officially superseded by and incorporated into the G.

726 standard. Because it is a legacy protocol not used in modern high-definition video conferencing, it is not supported by the CloudMCU.

NEW QUESTION # 35

Which function does the Huawei MCU web portal NOT support?

- A. Hardware status
- B. One-click information collection
- C. Logs collection
- **D. Power on**

Answer: D

Explanation:

The MCU (Multipoint Control Unit) web portal is a software management interface accessible via a browser once the device is already running.

* One-click information collection (A): This is a standard O & M feature used to gather system data for troubleshooting.

* Hardware status (B): The portal displays real-time data such as CPU usage, memory, and temperature.

* Logs collection (C): Administrators can download operation and system logs directly from the web UI.

* Power on (D): This is not supported because the web portal is a service provided by the MCU's operating system. If the device is powered off, the web service is not running and cannot be accessed.

To power on the device remotely, an out-of-band management tool like the Huawei iBMC (Intelligent Baseboard Management Controller) must be used.

NEW QUESTION # 36

Huawei CloudLink Box 310/610 ultra-HD videoconferencing endpoints' embedded operating system is HarmonyOS.

- **A. FALSE**
- B. TRUE

Answer: A

Explanation:

This is a common point of confusion. While Huawei's IdeaHub series (IdeaHub S2, Board 2, etc.) runs on HarmonyOS, the CloudLink Box 310/610 series ultra-HD terminals use a dedicated, proprietary secure embedded operating system (often based on a hardened Linux kernel). This OS is specifically optimized for real-time media processing and high-security communication. While the "look and feel" of the UI (User Interface) has been updated to align with Huawei's modern design language, the underlying OS architecture for these specific hardware codecs is not HarmonyOS.

NEW QUESTION # 37

What is the minimum Windows OS version supported by the IdeaShare Key 2.0? (Select all that apply)

- A. Windows 9
- B. Windows 11
- C. Windows 7
- D. Windows 10

Answer: B,C,D

Explanation:

The IdeaShare Key 2.0 (Type-C) is a plug-and-play projection tool. Its compatibility covers the majority of active enterprise environments:

* Supported Versions: It officially supports Windows 7, Windows 8, Windows 8.1, Windows 10, and Windows 11 (both 32-bit and 64-bit versions).

* Minimum Version: Among the options provided, Windows 7 is the minimum supported version.

* Invalid Option: Windows 9 does not exist as a commercial operating system and therefore is not supported.

Since the prompt asks to "Select all that apply" from the supported list, A, B, and C are all correct as they are all supported versions.

NEW QUESTION # 38

When you want to erase content in the whiteboard, how many erasing modes does Huawei IdeaHub B2 whiteboard support?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: B

Explanation:

The Huawei IdeaHub B2 (and the S2) provides a natural and intuitive writing experience with three distinct erasing modes:

* Gesture/Palm Erase: Users can simply use the palm of their hand or the side of their fist to erase large areas, mimicking a traditional blackboard experience.

* Selective Erase (Circle Erase): Users can draw a circle around a specific piece of text or a drawing to select and delete only that portion.

* One-Tap Clear (Clear All): A dedicated button on the whiteboard toolbar that allows the user to clear the entire canvas instantly. This combination provides a balance between high-precision editing and rapid cleaning of the board.

NEW QUESTION # 39

.....

There is no denying the fact that everyone in the world wants to find a better job to improve the quality of life. Generally speaking, these jobs are offered only by some well-known companies. In order to enter these famous companies, we must try our best to get some certificates as proof of our ability such as the H19-341_V1.0 Certification. And our H19-341_V1.0 exam questions are the exactly tool to help you get the H19-341_V1.0 certification. Just buy our H19-341_V1.0 study materials, then you will win it.
