The payment of the PRINCE2-Foundation exam is also safe for our customers, we apply online payment with credit card, it can ensure the account safety of our customers.

PRINCE2 7 Foundation written Exam Sample Questions (Q231-Q236):

NEW QUESTION # 231
According to the guidance for effective quality management, when should the requirements for a product be captured?

- A. When the project team needs to know how the product will be delivered
- B. When the project team needs to test the product
- C. When the project team realizes that the product is needed
- D. When the project team needs to know whether the product has been approved

Answer: C

Explanation:
In PRINCE2, the requirements for a product should be captured early in the process, specifically when the project team realizes the need for that product. This approach ensures that the project delivers what is actually required and expected. Capturing requirements early helps in detailed planning and allows for effective quality management throughout the product's development and delivery phases.References: (PRINCE27 Foundation Handbook, AXELOS)

NEW QUESTION # 232
According to the 'manage by exception' principle, which statement about tolerances is CORRECT?

- A. Whenever authority is delegated to the project manager, the project board should set tolerances for the stage
- B. Whenever authority is delegated to the team manager, the focus should be on delivering within time and cost tolerances
- C. Whenever there is a forecast to exceed a tolerance, it should be escalated to the project board
- D. Whenever there is a forecast to exceed a tolerance, it should be resolved at the next monthly project board meeting

Answer: C

Explanation:
According to the 'manage by exception' principle in PRINCE2, when any forecast indicates that tolerances are likely to be exceeded, this issue must be escalated to the project board for decision-making. This principle supports efficient use of management time by only involving them when necessary, such as when predefined thresholds are anticipated to be breached.References: PRINCE2 7 Foundation handbook and documentation on the 'manage by exception' principle.

NEW QUESTION # 233
Which is a minimum requirement for applying the organization theme?

- A. The project's approach to engaging with its stakeholders must be defined
- B. The project team must change at each end stage of the project life cycle
- C. During a procurement the senior supplier must be appointed from the customer organization
- D. Roles must be combined to reduce the number of individuals needed on the project

Answer: A

NEW QUESTION # 234

Which is a benefit of using PRINCE2?

- A. Avoids the need to involve corporate or programme management
- B. Enables the management of projects as well as of 'business as usual' activities
- C. Can be tailored by leaving out elements of the method for some projects
- D. Can be applied to any type of project

Answer: D

Explanation:
Section: Volume A

NEW QUESTION # 235
Which statement defines a risk?

- A. An uncertain event, or set of events that, should it or they occur, will have an effect on the achievement of objectives
- B. A certain event occurring in the future that will have a negative impact on the project's objectives
- C. An event that has already occurred that the Project Manager must deal with immediately
- D. An uncertain event, or set of events that, should it or they occur, will be automatically escalated to the Project Board for a response

Answer: A

Explanation:
In PRINCE2, a risk is defined as any uncertain event or set of events that, if it occurs, will have an impact on the achievement of project objectives. This definition emphasizes the uncertainty and potential effect on objectives, rather than the certainty or immediate occurrence of an event. References: PRINCE2 Foundation Training Manual; PRINCE2 2017 Foundation handbook.
