- A. Manual route summarization is done on the ABRs. By default, automatic summarization is done; however, it may not be optimal for all networks.
- B. Manual route summarization can only be done on autonomous system border routers.
- C. Manual route summarization must be done on all the backbone routers to be effective. Manual route summarization is optional on the routers in non-backbone areas.
- **D. Manual route summarization is done on the ABRs. By default, no route summarization is done and all routes are advertised to all areas.**

**Answer: D**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

From Nokia 7750 SR OS OSPF Guide - Route Summarization Section:

"Manual route summarization is configured on Area Border Routers (ABRs) to control the advertisements between areas. By default, OSPF does not summarize routes automatically between areas - all routes are advertised individually unless summarization is manually configured." Summarization is always optional.

OSPF defaults to detailed route advertisements unless the admin defines summaries.

- D. OSPF uses UDP, so the protocol number is 17.

**Answer: C**
