## Salesforce Communications Cloud Accredited Professional Sample Questions (Q66-Q71):

### NEW QUESTION # 66

Universal Connect (UC) offers a router to its customer which is included as part of the business internet offer. However, the router has no commercial significance to the selling process. UC is currently using industries Order Management (OM). How should a consultant model with respect to the business internet offer?

- A. Model the router as separate standalone offer and add the router once the business internet offer is added via an auto add rule
- B. Model the router as a default child product of business internet offer but hide it from the quote document before sending it to the customer for review
- C. Model the router as an attribute of the business internet offer with a default value of 'included'
- D. Model the router technical product and decompose it from the business internet offer.

**Answer: D**

**NEW QUESTION # 67**

A B2B Communication company is using industries CPQ solution and need to implement attribute- based pricing for its offerings. The company wants to display the total amount or monthly recurring charge of the product as well as sales tax imposed on that product depending on the zip code of the service account as total price in the cpq cart. How shall the consultant achieve this while minimizing the impact to performance?

- A. Write a custom hook class to include the logic to calculate tax and add to the total price using a price calculation matrix
- B. Add a pricing plan step with a custom Apex class to calculate the tax using the price calculation matrix
- **C. Add the delivery zip code customer field as a header in the pricing calculation matrix**
- D. Configure the tax rate in the price plan and it will be added automatically when added to the cart.

**Answer: C**

Explanation:

If requirement is to have static calculation, then use Hook implementation If requirement is to have dynamic calculation based on custom fields then use ATB mechanism along with changes in hook to pass custom fields into ATB input map. In this case there is no need to have custom calculations.

**NEW QUESTION # 68**

Universal communication is a digital cable leader across the United States. They have started using communication cloud for the B2B use case. One of their new requirements is One time charge (OTCs) that depend on multiple factors. Some of the factors are account related while other factors are product related. They already use matrix based pricing for their recurring price that depends on different sets of properties on product and account. What approach should consultant take to implement OTC within the existing matrix- based recurring pricing model?

- A. Create OTCs as additional products with Prices and add those products to the cart using a separate button that uses postCartItems
- B. Create Apex class and hook code to calculate the price and add as a step within the pricing plan
- **C. Add more Columns within the existing matrix for recurring charges and calculate the OTCs using that matrix**
- D. Create another matrix for OTC's and add all the attributes from Account and product as input and price as Output.

**Answer: C**

**NEW QUESTION # 69**

ABC cloud currently using communication cloud's order management (OM) to orchestrate orders, they also want to start using it for billing activation. ABC cloud's architecture principle is to use an Apigee (Middleware) layer between industries OM and any underlying systems. The billing system interface requires a series of callouts in order to place an order. Which solution should a consultant propose?

- **A. Configure single synchronous callout task and push the entire payload for Apigee to split into series of calls. The asynchronous callout will accept synchronous response from apigee and asynchronous responses from Apigee about the result of the order submission.**
- B. Configure an Autotask and integration procedure that orchestrate a series of calles to the billing system via Apigee.
- C. Configure single synchronous callout task and push the entire payload for Apigee to split into series of calls. Accept synchronous response from Apigee. Configure a Push Event for asynchronous response from Apigee about the result of the order submission.
- D. Configure a synchronous call out task for each request to the billing system as well as dependencies between those to orchestrate correct sequence

**Answer: A**

**NEW QUESTION # 70**

ABC telecom offer advanced B2B connectivity products to companies with multiple service quotes in different regions based quotes and 1000 line items per quote.

Which application suits supports this scenario?

- **A. Enterprise sales management**
- B. Subscriber lifecycle management
- C. Multiple subscription management
- D. Advertising sales management

**Answer: A**

## NEW QUESTION # 71

.....
