They can easily cover the exam topics with more practice due to the unique set of Arch-303 exam dumps. The Arch-303 certification learning is getting popular with the passage of time.

## Salesforce Certified B2C Commerce Architect Sample Questions (Q64-Q69):

### NEW QUESTION # 64

A Retailer has a single storefront site and a Product Management System (PIM). The Pin is Generating the master catalog and storefront categorization catalog every day and it uploading them to SFTP how should the Architect configure the import job flows following the best practices?

- A. 1st flow is global to download the files from SFTP. 2nd flow is global to import the storefront catalog  
3rd flow K global to Import the master catalog.
- B. 1st flow is assigned to the site to download the files from SFTP. 2nd flow is assigned to the site to Import the master catalog. 3rd flow K global to Import the storefront catalog.
- C. 1st flow is assigned to the site to download the files from SFTP. 2nd flow is assigned to the site to Import the storefront

catalog 3rd flow is global to import the master catalog.

- D. 1st flow is global to download the files from SFTP. 2nd flow is global to import the master catalog. 3rd flow is global to import the storefront catalog.

**Answer: A**

Explanation:

For optimal job flow concerning data import from a PIM system, the sequence should begin with downloading files globally from an SFTP site, followed by importing data into the B2C Commerce platform:

\* First flow: Download files, ensuring all required files are available and ready for import.

\* Second flow: Import the storefront catalog which likely has dependencies on the master catalog but is generally smaller and can be updated more rapidly.

\* Third flow: Import the master catalog, as it typically contains the foundational data needed for various site functionalities.

This sequence respects data dependency and integrity, ensuring that the storefront reflects the most current and accurate information after all relevant data is imported.

### NEW QUESTION # 65

There is an issue with the site when the domain is opened from Google search results. After researching the problem, it turns out that the site returns a 404 page error when accessed with a parameter in the URL.

What should the Architect recommend to fix that issue?

- A. Add this snippet to the aliases configuration for the domain:
- **B. Add dynamic catch-all rule to redirect to home page.**
- C. Add dynamic redirect if the URL contains parameter to Home Show. Add this snippet to the aliases configuration for the domain
- D. Add this snippet to the aliases configuration for the domain

**Answer: B**

Explanation:

To address the issue of the site returning a 404 error when accessed with a parameter from Google search results, a dynamic catch-all rule to redirect such requests to the homepage is an effective solution (Answer A).

This approach ensures that users landing from external links with appended parameters, which might not match any configured route or alias, are redirected to a valid page instead of seeing an error page. This improves the user experience and minimizes potential bounce rates caused by broken links or outdated URLs.

### NEW QUESTION # 66

The Client has just acquired a new brand and wants to integrate the new brand's current e-commerce site into a current realm as a new site. The acquisition has its own Enterprise Resource Planning (ERP) system for product data and inventory. The new site will use the existing realm's Order Management System (OMS) and Customer Relationship Management (CRM) system.

What two requirements does the Architect need to keep in mind when creating the technical specification document?

Choose 2 answers

- **A. A new product import job must be created to manage products.**
- B. A new order export job must be created to export orders.
- C. A new customer export job must be created to export customers.
- **D. A new inventory import job must be created to manage inventory.**

**Answer: A,D**

Explanation:

When integrating a new brand's e-commerce site into an existing realm, the architect needs to ensure that product data and inventory from the new brand's Enterprise Resource Planning (ERP) system are correctly managed within the realm. Therefore, creating new import jobs for products (Answer B) and inventory (Answer C) is essential. These import jobs will facilitate the synchronization of the new brand's product catalog and inventory levels with the existing Order Management System (OMS) and Customer Relationship Management (CRM) systems of the realm. Such integration is crucial for maintaining up-to-date product and inventory information across the systems, ensuring seamless operations and data consistency.

### NEW QUESTION # 67

A developer is checking for Cross Site Scripting (XSS) and found that the quick search is not escaped (allows inclusion of Javascript) in the following script:

```
<script>
var searchPhrase = {searchPhrase}
</script>
```

How would the developer resolve this issue?

- A. Use `<isprint value='{searchPhrase}' encoding='jsblock' />`
- B. Use `<isprint value='{searchPhrase}' * encoding='jshtml' />`
- C. Replace ' with double Quote\*
- D. Use `<toprint value="{searchPhrase}" />`

**Answer: B**

Explanation:

To resolve the issue of Cross Site Scripting (XSS) where the quick search is not escaped, the developer should use the `<isprint>` tag with the 'jshtml' encoding option (Answer B). This method ensures that any JavaScript included in the search phrase is properly escaped, preventing the execution of potentially malicious scripts.

The 'jshtml' encoding is specifically designed to encode text for HTML contexts where JavaScript is embedded, providing a secure way to handle user input in Salesforce B2C Commerce.

### NEW QUESTION # 68

A new version of the Page Show controller is required for implementation of Page Designer specific look. It requires implementation of a specific, cache period for Page Designer pages, which is not currently available in the base Storefront Reference Architecture (SFRA) cache.js module. What two steps should the Architect instruct the developer to implement?

Choose 2 answers

- A. Create new Page.js controller in client's cartridge. Copy code from base and modify the Page-Show route to include the new cache middleware function.
- B. Create new cache.js in client's cartridge. Extend cache.js from app\_storefront\_base and add a function for the Page Designer caching.
- C. Create new cache.js in client's cartridge. Copy cache.js from app\_storefront\_base and add a function for the Page Designer caching.
- D. Create new Page.js controller in client's cartridge. Extend the code from base and prepend the new cache middleware function to Page-Show route.

**Answer: A,B**

Explanation:

To implement a specific cache period for Page Designer pages in SFRA:

\* Option A involves creating a new Page.js controller in the client's cartridge, where the existing Page-Show route can be modified to include a custom caching logic. This ensures that the specific caching requirements for Page Designer pages are met without altering the base functionality for other pages.

\* Option D calls for extending the existing cache.js module in the client's cartridge to include a function specifically for Page Designer caching. This allows for reusing the existing caching logic while adding enhancements specific to the Page Designer pages, thus maintaining efficiency and clarity in the codebase.

Both options provide a clean, maintainable approach to customizing caching for specific requirements in SFRA, avoiding disruptions in other areas of the site functionality.

### NEW QUESTION # 69

.....

Allowing for your problems about passing the exam, our experts made all necessary points into our Arch-303 training materials, making it the most efficient way to achieve success. They can alleviate your pressure, relieve you of tremendous knowledge and master the key points with the least time. As customer-oriented company, we believe in satisfying the customers at any costs. Instead of focusing on profits, we determined to help every customer harvest desirable outcomes by our Arch-303 Training Materials. So

our staff and after-sales sections are regularly interacting with customers for their further requirements and to know satisfaction levels of them.
