IT인증자격증을 취득하는 것은 IT업계에서 자신의 경쟁력을 높이는 유력한 수단입니다. 경쟁에서 밀리지 않으려면 자격증을 많이 취득하는 편이 안전합니다. 하지만 IT자격증취득은 생각보다 많이 어려운 일입니다. SAP인증 C-TS470-2412시험은 인기자격증을 취득하는데 필요한 시험과목입니다. Itexamdump는 여러분이 자격증을 취득하는 길에서의 없어서는 안될 동반자입니다. Itexamdump의SAP인증 C-TS470-2412덤프로 자격증을 편하게 취득하는게 어떨까요?

SAP C-TS470-2412 시험요강:

주제	소개
주제 1	Service Order Management: This section of the exam measures the skills of SAP Service Operations Consultants and covers the end-to-end management of service orders within SAP. It includes the creation, processing, tracking, and fulfillment of service requests, ensuring seamless coordination between departments. Proper service order management enables organizations to enhance customer satisfaction, streamline operations, and improve response times through integrated workflows.

주제 2	Service Master Data: This section of the exam measures the skills of SAP Master Data Specialists and covers the management and configuration of service-related master data within SAP environments. It includes defining service objects, managing attributes, and ensuring accurate data flow across modules. Effective service master data management helps improve service delivery, optimize resource utilization, and maintain consistency across business processes.
주제 3	Organizational Data: This section of the exam measures the skills of Enterprise Data Managers and covers the structuring and management of organizational data within SAP systems. It focuses on defining key organizational elements, configuring data hierarchies, and ensuring proper integration across business units. Mastery of this domain is essential for maintaining accurate reporting structures, workflow efficiency, and compliance with enterprise-wide data governance policies.
주제 4	Managing Clean Core: This section of the exam measures the skills of SAP Solution Architects and covers the principles of maintaining a clean core within SAP systems. It focuses on strategies for minimizing customizations, leveraging standard SAP functionalities, and ensuring system integrity while allowing for necessary extensions. The goal is to enhance system performance, ease upgrades, and maintain long-term sustainability.

C-TS470-2412 유효한 공부자료 & C-TS470-2412 시험패스 인증 공부

IT 업계 중 많은 분들이 인증시험에 관심이 많은 인사들이 많습니다. IT 산업 중 더 큰 발전을 위하여 많은 분들이 SAP C-TS470-2412를 선택하였습니다. 인증시험은 패스를 하여야 자격증 취득이 가능합니다. 그리고 무엇보다도 통행증을 받을 수 있습니다. SAP C-TS470-2412은 그만큼 아주 어려운 시험입니다. 그래도 SAP C-TS470-2412 인증을 신청하여야 좋은 선택입니다. 우리는 매일매일 자신을 업그레이드 하여야만 이 경쟁이 치열한 사회에서 살아남을 수 있기 때문입니다.

최신 SAP Certified Associate C-TS470-2412 무료 샘플문제 (Q53-Q58):

질문 # 53

Which of the following is a prerequisite to install a piece of equipment in a functional location?

- A. Set the installation flag for a piece of equipment
- B. Set the installation flag for a functional location category
- C. Allow the combination of equipment category and object type to be installed in a functional location
- D. Allow the equipment category to be installed in a functional location

정답: D

설명:

To install equipment in a functional location in SAP S/4HANA:

* Allow the equipment category to be installed in a functional location: The equipment category (e.g., M for machines) must be configured to permit installation (set in transaction OIEQ), ensuring compatibility with functional locations.

* Combination of equipment category and object type: Object types are for classification, not installation prerequisites.

* Installation flag for equipment/functional location: No such flags exist; installation is controlled by category settings. This is part of equipment management setup. "The equipment category must allow installation in a functional location as a prerequisite." (SAP Help Portal, Equipment Installation).

질문 # 54

What can you display in the app Find Technical Object? Note: There are 3 correct answers to this question.

- A. Installation information of the technical objects
- B. Measurement documents and measuring points of the technical objects
- C. Service costs of the technical objects
- D. Planned and call dates for recurring service activities

- E. System and user statuses of the technical objects

정답: A,B,E

설명:

The Find Technical Object app in SAP S/4HANA Cloud Private Edition, Service provides details about technical objects (e.g., equipment, functional locations). The correct answers are A, B, C. Let's explore.

App Functionality:

This Fiori app allows users to search and view technical object data.

- * Installation information (A): Shows where the object is installed (e.g., functional location hierarchy).
- * Measurement documents and measuring points (B): Displays recorded measurements (e.g., temperature) and their points.
- * System and user statuses (C): Lists statuses (e.g., "INST" for installed, user status "In Repair").

Why Not the Others?

- * D: Service costs are in financial apps (e.g., Service Actuals), not this app.
- * E: Planned/call dates are in maintenance plan apps, not here.

Example:

Search equipment "E001" # See installation (FL-001), measuring point (Temp), status (INST).

"The Find Technical Object app displays installation information, measurement documents and points, and system/user statuses."

질문 # 55

Which of the following API types does SAP recommend to use to achieve clean core integrations? Note:
There are 2 correct answers to this question.

- A. RFC
- B. OData
- C. Doc
- D. SOAP

정답: B,D

설명:

SAP's clean core strategy emphasizes standardized, extensible integrations to minimize customizations and ensure upgrade stability. The recommended API types are:

- * SOAP: A widely supported, robust protocol for structured data exchange, recommended for integrating SAP S/4HANA with external systems in a clean core approach.
- * OData: SAP's preferred REST-based protocol for real-time, lightweight integrations, heavily utilized in SAP Fiori apps and clean core scenarios.
- * Doc: Not a recognized API type in SAP's integration framework.
- * RFC: While still supported, RFC (Remote Function Call) is considered legacy and less aligned with clean core principles due to its tight coupling. These recommendations are part of SAP's integration strategy for S/4HANA Cloud editions. "SOAP and OData are recommended for clean core integrations to ensure standardized and scalable connectivity." (SAP S/4HANA Cloud Integration Guide).

질문 # 56

What is the purpose of a strategy plan in SAP S/4HANA Cloud Private Edition, Service?

- A. To support a service scenario where an activity is required every X months and Y kilometers
- B. To support the planning and scheduling of activities with different intervals
- C. To automatically generate Customer Service orders
- D. To document your company's direction in terms of service scenarios to be implemented

정답: B

설명:

A strategy plan in SAP S/4HANA Cloud Private Edition, Service is a type of maintenance plan. The correct answer is C. Let's dive into this.

What is a Strategy Plan?

A strategy plan uses a maintenance strategy (e.g., time-based, performance-based cycles) to schedule tasks with varying intervals (e.g., 3 months, 6 months, 1,000 km). It's linked to a task list with operations tied to maintenance packages.

Why C?

The purpose is to support the planning and scheduling of activities with different intervals. For example, a strategy might include Package 1 (every 3 months) for an oil check and Package 2 (every 12 months) for a full inspection. The plan schedules these flexibly based on the strategy's rules.

Why Not the Others?

* A: This is a business strategy, not a maintenance plan function.

* B: This describes a multiple counter plan, not a strategy plan.

* D: Orders are generated by scheduling, not the plan's purpose.

Example:

Strategy "STR1" has packages: 3M (oil) and 12M (inspection). The plan schedules calls accordingly.

"A strategy plan supports the planning and scheduling of maintenance activities with different intervals using a maintenance strategy."

질문 # 57

Which type of objects can you maintain in the object list assigned to a contract item? Note: There are 3 correct answers to this question.

- A. Product
- B. Functional location
- C. Document
- D. Equipment bill of material
- E. Equipment

정답: A,B,E

설명:

In SAP S/4HANA Service contracts (scope item 3MO), the object list for a contract item specifies covered objects:

* Equipment: Individual equipment (e.g., serialized assets) can be assigned to track service coverage.

* Product: Materials or service products covered under the contract are listed.

* Functional location: Locations where services are performed can be included in the object list.

* Equipment bill of material: BOMs are referenced separately, not directly in the object list.

* Document: Documents are managed via Document Management System (DMS), not as contract objects. This is configured in the service contract item details. "Assign equipment, products, and functional locations to the object list of a service contract item" (SAP Help Portal, Service Contract Management).

질문 # 58

.....

SAP C-TS470-2412 인증 시험에 응시하고 싶으시다면 좋은 학습자료와 학습 가이드가 필요합니다. SAP C-TS470-2412 시험은 IT 업계에서도 아주 중요한 인증입니다. 시험패스를 원하신다면 충분한 시험준비는 필수입니다.
