□

### NEW QUESTION # 307

You need to automatically apply a sensitivity label to documents that contain information about your company's network including computer names, IP addresses, and configuration information.

Which two objects should you use? Each correct answer presents part of the solution. (Choose two.) NOTE: Each correct selection is worth one point.

- A. a custom trainable classifier
- B. a sensitivity label that has auto-labeling
- C. a data loss prevention (DLP) policy
- D. an Information protection auto-labeling policy
- E. a sensitive info type that uses a regular expression
- F. a sensitive info type that uses keywords

**Answer: A,B**

Explanation:

However, if the label contains trainable classifiers as a label condition:

- When the label conditions contain just trainable classifiers, you won't see the option to automatically create an auto-labeling policy.
- When the label conditions contain trainable classifiers and sensitivity info types, an auto-labeling policy will be created for just the sensitive info types.
