ISACA COBIT 2019 Foundation Sample Questions (Q54-Q59):

NEW QUESTION # 54

The different levels of involvement associated with roles and organizational structure are PRIMARILY divided into:

- A. operational and practitioner levels.

- B. governance and management levels.
- C. responsibility and accountability levels.

Answer: C

NEW QUESTION # 55

The enterprise goals defined in the COBIT framework are structured along which of the following dimensions?

- A. Balanced scorecard
- B. Corporate rationalization
- C. Business impact analysis

Answer: A

Explanation:

COBIT 2019 explicitly states that enterprise goals are defined in the COBIT framework and are structured along the balanced scorecard (BSC) dimensions .

Exact Extract (COBIT 2019 Framework: Introduction and Methodology):

"These goals are defined in the COBIT framework, structured along the balanced scorecard (BSC) dimensions , and include the elements shown in figure 4.6." This is also reinforced in the COBIT 2019 Design Guide, using the same wording when describing the enterprise goals design factor.

Exact Extract (COBIT 2019 Design Guide):

"These goals are defined in the COBIT framework, structured along the balanced scorecard (BSC) dimensions , and include the following (figure 2.6)..." Therefore, the correct choice is C. Balanced scorecard .

NEW QUESTION # 56

Which of the following is a KEY input to be considered when defining drivers for a COBIT implementation?

- A. Business case outline
- B. IT process documentation
- C. Stakeholder map
- D. Enterprise policies

Answer: A

Explanation:

The business case outline is a document that provides a high-level overview of the rationale, objectives, scope, approach, benefits, costs, risks, and timeline of the EGIT implementation program. The EGIT implementation program is a program that involves designing and implementing a governance system for an enterprise using COBIT 2019. The business case outline provides the basis for obtaining approval in principle from the stakeholders for initiating the EGIT implementation program. The business case outline is a key input to be considered when defining drivers for a COBIT implementation. The drivers are the internal and external factors that trigger or influence the need for designing and implementing a governance system for an enterprise using COBIT 2019. The drivers include aspects such as business strategy objectives performance risks issues opportunities etc., information and technology strategy objectives performance risks issues opportunities etc., stakeholder needs expectations requirements etc., standards guidelines regulations best practices etc., market conditions competitive pressures customer demands etc., etc. By considering the business case outline when defining drivers for a COBIT implementation an enterprise can ensure that it has a clear understanding of why it needs to design and implement a governance system using COBIT 2019 what are the expected outcomes benefits value etc.,

NEW QUESTION # 57

Which of the following components of the governance system are the KEY decision-making entities in an enterprise?

- A. Organizational structures
- B. People, skills and competencies

- C. Principles, policies and frameworks

Answer: A

Explanation:

The organizational structures component of the governance system are the key decision-making entities in an enterprise. Organizational structures are the arrangements of roles and responsibilities that enable the enterprise to achieve its objectives. Organizational structures can be formal or informal, hierarchical or flat, centralized or decentralized, etc. Organizational structures can include entities such as board, executive management, committees, forums, teams, units, etc. The organizational structures component of the governance system are the key decision-making entities in an enterprise by providing authority, accountability, direction, oversight, evaluation, etc., for information and technology. 1 3 References: COBIT 2019 Framework: Introduction and Methodology , COBIT 2019 Framework: Roles, Responsibilities & RACI Charts

NEW QUESTION # 58

When tailoring the COBIT organizational structure, which of the following is the PRIMARY purpose for aligning role descriptions to the enterprise ' s business context, organization and operating environment?

- A. Assigning levels of accountability and responsibility
- B. Developing hierarchy and reporting structure
- C. Preparing key goal areas and metrics for each role

Answer: A

Explanation:

The primary purpose for aligning role descriptions to the enterprise's business context, organization and operating environment when tailoring the COBIT organizational structure is to assign levels of accountability and responsibility for governance and management activities. This purpose helps to ensure that roles are clearly defined, communicated, understood, and accepted by all stakeholders, and that there are no gaps or overlaps in roles. The purpose is based on the COBIT 2019 Implementation Guide 5 , page 45.
