And you will pass for sure with our CAD learning quiz.

ServiceNow Certified Application Developer-ServiceNow Sample Questions (Q95-Q100):

NEW QUESTION # 95

Which one of the following is true?

- A. A UI Policy's Actions and Scripts execute at the same time
- B. The execution order for a UI Policy's Scripts and Actions is determined at runtime
- C. A UI Policy's Actions execute before the UI Policy's Scripts
- D. A UI Policy's Scripts execute before the UI Policy's Actions

Answer: D

NEW QUESTION # 96

Which one of the following is true for a Script Include with a Protection Policy value of Protected?

- A. Any user with the protected_edit role can see and edit the Script Include
- B. The Protection Policy is applied only if the glide.app.apply_protection system property value is true
- C. The Protection Policy is applied only if the application is downloaded from the ServiceNow App Store
- D. The Protection policy option can only be enabled by a user with the admin role

Answer: C

Explanation:

https://docs.servicenow.com/bundle/rome-application-development/page/build/applications/concept/c_ScriptProtectionPolicy.html

NEW QUESTION # 97

Which framework can automatically populate values for the Priority and Category fields based on the Short description field value?

- A. Action
- B. UI Policy
- C. Predictive Intelligence
- D. Assignment Rule
- E. CSDM

Answer: D

NEW QUESTION # 98

Which Application Access configuration field(s) are NOT available if the Can read configuration field is NOT selected?

- A. Can create, Can update, and Can delete
- B. Can read does not affect the availability of other Application Access fields
- C. All access to this table via web services
- D. Allow configuration

Answer: A

Explanation:

"You must first select read access to grant any other API record operation." https://docs.servicenow.com/bundle/tokyo-application-development/page/build/applications/reference/r_TableApplicationAccessFields.html The Application Access configuration fields control the access level for an application and its tables. The following Application Access configuration fields are not available if the Can read configuration field is not selected:

Can create. This field determines whether users can create records on the application tables.

Can update. This field determines whether users can update records on the application tables.

Can delete. This field determines whether users can delete records on the application tables.

These fields are not available because they depend on the Can read field, which determines whether users can view records on the application tables. If users cannot read records, they cannot create, update, or delete them either.

The following Application Access configuration fields are available regardless of the Can read configuration field:

All access to this table via web services. This field determines whether users can access the application tables using web services, such as REST or SOAP.

Allow configuration. This field determines whether users can configure the application tables, such as adding or modifying fields, views, or indexes. Reference: Application Access, Certified Application Developer (CAD) Learning Path

NEW QUESTION # 99

Which of the following is true about deleting fields from a table?

- A. User-defined non-inherited fields can be detected
- B. Any field on a table can be deleted
- C. Inherited fields can be detected

- D. Table records are deleted when a field is detected

Answer: A

Explanation:

User-defined non-inherited fields can be deleted from a table in ServiceNow. These are fields that are created by users on a specific table and are not inherited from a parent table. Inherited fields cannot be deleted from a table, as they are defined on a parent table and shared by all child tables. Any field on a table cannot be deleted, as some fields are system-defined and essential for the table functionality. Table records are not deleted when a field is deleted, as the field deletion only affects the table structure and not the data.

Reference: Delete fields

NEW QUESTION # 100

.....
