Salesforce Certified Platform Development Lifecycle and Deployment Architect Sample Questions (Q30-Q35):

NEW QUESTION # 30

Universal Containers CUC) is embarked on a large Salesforce transformation journey, UC's DevOps team raised a question about tracking Salesforce metadata throughout the development lifecycle across sandboxes all the way to production.

As the deployment architect of the project, what should be the recommendation to track which version of each feature in different environments?

- A. Use an Excel sheet to track deployment steps and document the SFDX commands.
- B. Use ChangeSet to track deployed customizations.
- C. Use an AppExchange or third-party tool that is specialized in Salesforce deployment.
- D. Use Salesforce SFDX commands to deploy to different sandboxes.

Answer: C

NEW QUESTION # 31

When replacing an old legacy system with Salesforce, which two strategies should the plan consider to mitigate the risks associated with migrating data from the legacy system to Salesforec? Choose 2 answers?

- A. Use a full sandbox environment and perform test runs of data migration scripts/processes with real data from the legacy system.
- B. Migrate users in phases based on their functions, requiring parallel use of legacy system and Salesforce for certain period of time.
- C. Identify the data relevant to the new system, including dependencies, and develop a plan/scripts for verification of data integrity.
- D. Use a full sandbox environment for all the systems involved, a full deployment plan with test data generation scripts, and full testing including integrations.

Answer: A,B

NEW QUESTION # 32

Universal Containers has discovered a Sev0 defect in production. Tens of thousands of records will be created with incorrect data in minutes, producing significant brand damage as a consequence. The Salesforce administrator has suggested that the defective text field be replaced with a new picklist field directly in production. The page layout will be modified so that the text-field is removed and the new picklist field added.

What should the Salesforce architect advise?

- A. Explain that only developers are certified to make changes directly in production.
- B. Call the security team and begin organizing d penetration test.
- C. Pair with the administrator, and review each change as it happens
- D. Deny the suggestion and explain to everyone that the risk is too high and the next release window is on the weekend.

Answer: C

NEW QUESTION # 33

Universal Containers CUC) Customer Community is scheduled to go live in the Europe, Middle East, and Africa (EMEA) region in 3 months. UC follows a typical centralized governance model. Two weeks ago, the project stakeholders informed the project team about the recent changes in mandatory compliance requirements needed to go live. The project team analyzed the requirements and have estimated additional budget needs of 30
