Salesforce Certified Experience Cloud Consultant Sample Questions (Q29-Q34):

NEW QUESTION # 29

Ursa Major Solar (UMS) is automating its business processes using Salesforce. UMS wants its Platinum partners to be able to approve installation projects and deals. In which two ways can UMS accomplish this?

Choose 2 answers

- A. Add external users directly to approval queues and create a digital experience for those users.
- B. Assign external users as the co-owners on records and create a digital experience for those users.
- C. Assign external users as approvers on records and create a digital experience for those users.
- D. Assign external users Super User access on records and create a digital experience for those users.

Answer: A,C

NEW QUESTION # 30

A consultant needs to leverage ExperienceBundle for a deployment but is unable to view it. What is the most likely cause for this issue?

- A. The experience has not yet been published.
- B. A change set containing the Network needs to be deployed.
- C. The "Enable ExperienceBundle Metadata API" setting needs to be checked.
- D. A custom Experience template needs to be created.

Answer: C

Explanation:

The ExperienceBundle Metadata API allows you to retrieve, deploy, create, update, or delete an Experience Cloud site's metadata definition in a single API call. To use this API, you need to enable the "Enable ExperienceBundle Metadata API" setting in the Experience Cloud site's administration settings.

NEW QUESTION # 31

An administrator for Cloud Kicks wants to create a new partner user for an existing site.

Which step does the administrator need to perform right before providing user details and saving the user record?

- A. Click "Manage External User" on the Contact detail page, then click "Enable Partner User".
- B. Click "Manage Partner User" on the Account detail page, then click "Enable Partner User".
- C. Click "Manage Partner User" on the Contact detail page, then click "Enable Customer User".
- D. Click "New" on the User Setup page in Lightning Experience.

Answer: A

NEW QUESTION # 32

Cloud Kicks (CK) is about to launch a public site and is expecting very high traffic in certain regions. CK will be using Content Delivery Network (CDN).

What should CK consider during the go-live phase to prevent usability issues?

- A. CK should provision CDN in those regions where traffic is high and activate CDN where traffic is low.
- B. CK should provision and activate CDN in those regions where traffic is low
- C. CK should provision CDN in those regions where traffic is low and activate CDN where traffic is high.
- **D. CK should provision and activate CDN in those regions where traffic is high.**

Answer: D

Explanation:

To prevent usability issues, CK should provision and activate CDN in those regions where traffic is high. A CDN is a network of servers that delivers cached static content from websites to users based on the geographic location of the user. By provisioning and activating CDN in high-traffic regions, CK can improve the performance and availability of their public site for their users.

NEW QUESTION # 33

What is the most efficient way that a Salesforce Admin can create a single Experience Cloud Site user from a Contact?

- **A. Enable the Contact in Salesforce as a Customer user.**
- B. Email the Contact a link to the Self-Registration page for the site.
- C. Enable the Account as a Customer Account so all Contacts in that Account become Customer users.
- D. Use Data Loader to add the Contact in Salesforce as a Customer user.

Answer: A

Explanation:

This option allows the Salesforce Admin to create a customer user from an existing contact that is associated with a customer account. The customer user inherits the role, profile, and permission sets from the contact.

The Salesforce Admin can also specify a username, email address, and nickname for the customer user.
