MogiExamは我々が研究したトレーニング資料を無料で更新します。それはあなたがいつでも最新のEAPA_2025試験トレーニング資料をもらえるということです。EAPA_2025認定試験の目標が変更されれば、MogiExamが提供した勉強資料も変化に追従して内容を変えます。MogiExamは各受験生のニーズを知っていて、あなたがEAPA_2025認定試験に受かることに有効なヘルプを差し上げます。あなたが首尾よく試験に合格するように、我々は最も有利な価格と最高のクオリティを提供して差し上げます。

Esri EAPA_2025 認定試験の出題範囲：

トピック	出題範囲
トピック 1	<ul style="list-style-type: none"> Payroll Administration and Management: This section of the exam measures skills of Payroll Managers and covers administrative oversight and leadership within payroll departments. It includes establishing and enforcing payroll policies, developing management practices, and ensuring effective communication and customer service. Candidates are also evaluated on their ability to manage staffing, promote employee development, and maintain essential core competencies within payroll teams.
トピック 2	<ul style="list-style-type: none"> Payroll Process and Supporting Systems and Administration: This section of the exam measures skills of Payroll Systems Administrators and covers the operational and technical aspects of payroll management. It focuses on maintaining employee master files, understanding payroll system functionalities, and ensuring business continuity through effective technology use. Candidates must also demonstrate knowledge of system upgrades, maintenance, and project implementation within payroll environments.
トピック 3	<ul style="list-style-type: none"> Compliance, Research, and Resources: This section of the exam measures the skills of Payroll Compliance Officers and covers the legal and regulatory framework governing payroll processes. It includes escheatment, legislative updates, and regulatory reporting requirements, along with proper record retention and penalty management. Candidates are also expected to understand multi-state taxation, reciprocity rules, and global payroll considerations while efficiently researching and applying compliance resources.

Esri ArcGIS Pro Associate 2025 認定 EAPA_2025 試験問題 (Q63-Q68):

質問 # 63

In ArcGIS Pro, a GIS analyst adds a mosaic dataset to a map and notices that the entire mosaic area is covered with a black and white checkerboard.

Which tool should the analyst use to make the images visible in the map as part of the mosaic dataset?

- A. Repair Mosaic Dataset Paths
- B. Build Pyramids
- C. Define Overviews

正解: A

解説:

The black-and-white checkerboard indicates that the mosaic dataset cannot locate the source rasters. Repair Mosaic Dataset Paths allows the analyst to correct the file paths if the rasters have been moved or renamed, thus restoring visibility.

* Define Overviews (Option A) creates reduced-resolution overviews for fast display but does not fix broken paths.

* Build Pyramids (Option B) builds pyramids for raster display performance but also requires valid data paths first.

Therefore, the correct answer is C.

質問 # 64

A GIS specialist needs to organize discontinuous imagery into a single dataset and wants to select individual rasters and download them when necessary.

Which dataset should be used to achieve this?

- A. Raster dataset
- B. LAS dataset
- C. Mosaic dataset

正解: C

解説:

Mosaic datasets manage collections of multiple rasters, including discontinuous imagery, without physically merging the data. They allow users to query, subset, and download individual rasters on demand while maintaining a single logical dataset.

* Raster dataset (Option A) stores a single continuous raster.

* LAS dataset (Option B) is specific to lidar point cloud data.

Therefore, the correct answer is C.

質問 # 65

An attribute table contains three columns with details of monthly rainfall for three consecutive years. A GIS analyst wants to compare the total rainfall, mean rainfall, and the minimum and maximum rainfall for each year.

Which tool should the analyst use to most efficiently compare this tabular data?

- A. Create Field Statistics Chart
- B. Summary Statistics
- C. Data Engineering view

正解: C

解説:

The Data Engineering view in ArcGIS Pro provides quick access to key statistics (total, mean, min, max, etc.) for any numeric fields in a table. This allows rapid inspection of multiple fields without running separate geoprocessing tools or creating charts.

* Create Field Statistics Chart (Option B) creates charts but is not as efficient for comparing multiple fields simultaneously.

* Summary Statistics (Option C) creates grouped output tables but is more suitable for aggregation across rows, not across multiple fields.

質問 # 66

A land surveyor downloads an Excel sheet from the city website that contains the updated land cover codes with over 30 classes. Which tool will help the surveyor update their existing land cover data to the new codes?

- A. Classify Raster
- B. Reclassify Field
- C. **Reclass By Table**

正解: C

解説:

The Reclass By Table tool allows the surveyor to import a lookup table (such as an Excel sheet) that contains the old and new land cover codes. This is the most efficient method for batch reclassification when many classes are involved.

* Classify Raster (Option A) is used for unsupervised or supervised classification.

* Reclassify Field (Option C) is not a valid ArcGIS Pro tool for raster data reclassification.

Therefore, the correct answer is B.

質問 # 67

Which workflow should be used to share a map as a TIFF file?

- A. Share > Print Map
- B. Share > Capture To Clipboard
- C. **Share > Export Map**

正解: C

解説:

Export Map under the Share tab provides options to export maps into various formats, including TIFF, PDF, PNG, JPEG, and others. This is the standard workflow for creating a high-quality raster file suitable for sharing and archiving.

* Print Map (Option A) is for sending the map directly to a printer.

* Capture To Clipboard (Option C) copies the current map extent as an image to the clipboard for temporary use, not for file creation.

Therefore, the correct answer is B.

-

質問 # 68
