Trustable SPLK-1004 Exam Cram Questions - Pass SPLK-1004 Exam

The site of Exam4Free is well-known on a global scale. Because the training materials it provides to the IT industry have no-limited

applicability. This is the achievement made by IT experts in Exam4Free after a long period of time. They used their knowledge and experience as well as the ever-changing IT industry to produce the material. The effect of Exam4Free's Splunk SPLK-1004 Exam Training materials is reflected particularly good by the use of the many candidates. If you participate in the IT exam, you should not hesitate to choose Exam4Free's Splunk SPLK-1004 exam training materials. After you use, you will know that it is really good.

Splunk Core Certified Advanced Power User Sample Questions (Q93-Q98):

NEW QUESTION # 93
Which field Is requited for an event annotation?

- A. _time
- B. annotation_label
- C. annotation_category
- D. eventype

Answer: A

Explanation:
For an event annotation in Splunk, the required field is time (Option B). The time field specifies the point or range in time that the annotation should be applied to in timeline visualizations, making it essential for correlating the annotation with the correct temporal context within the data.

NEW QUESTION # 94
Which of the following is true about thesummariesonly=targument of thetstatscommand?

- A. When using an unaccelerated data model, the search produces a larger result count than with summariesonly=f.
- B. Applies only to unaccelerated data models.
- C. Applies only to accelerated data models.
- D. When using an accelerated data model, the search produces a larger result count than with summariesonly=f.

Answer: C

Explanation:
Comprehensive and Detailed Step by Step Explanation:
Thesummariesonly=targument of thetstatscommandapplies only to accelerated data models. It ensures that the search uses only the precomputed summaries of the data model, ignoring raw data.
Here's why this works:
* Purpose of summariesonly=t: When set totrue, thetstatscommand restricts the search to use only the accelerated summaries of the data model. This improves performance but may exclude events that are not part of the summary.
* Accelerated Data Models: Acceleration creates summaries of data models, making them faster to query.
Usingsummariesonly=tensures that only these summaries are queried, avoiding raw data entirely.
Other options explained:
* Option B: Incorrect becausesummariesonly=tdoes not apply to unaccelerated data models; it requires acceleration to function.
* Option C: Incorrect becausesummariesonly=tapplies only to accelerated data models, not unaccelerated ones.
* Option D: Incorrect becausesummariesonly=ttypically produces fewer results, as it excludes raw data that is not part of the summary.
Example:
| tstats count WHERE index=_internal summariesonly=t BY sourcetype
This query uses only the accelerated summaries of the_internalindex.

NEW QUESTION # 95
Which search generates a field with a value of "hello"?

- A. | makeresults | fields="hello"
- B. | makeresults | eval field="hello"

- C. | makeresults | eval field=make{"hello"}
- D. | makeresults field="hello"

Answer: B

Explanation:
The correct search to generate a field with a value of"hello"is:
Copy
1
| makeresults | eval field="hello"
Here's why this works:
* makeresults: This command creates a single event with no fields.
* eval: Theevalcommand is used to create or modify fields. In this case, it creates a new field namedfield and assigns it the value"hello".
Example:
| makeresults
| eval field="hello"
This will produce a result like:
_time field
------------------- -----
<current_timestamp> hello
References:
* Splunk Documentation onmakeresults:https://docs.splunk.com/Documentation/Splunk/latest/SearchReference/Makeresults
* Splunk Documentation oneval:https://docs.splunk.com/Documentation/Splunk/latest/SearchReference/Eval

NEW QUESTION # 96
How can the erex and rex commands be used in conjunction to extract fields?

- A. The erex and rex commands cannot be used in conjunction under any circumstances.
- B. The regex generated by the erex command can be edited and used with the erex command in a subsequent search.
- C. The regex generated by the rex command can be edited and used with the erex command in a subsequent search.
- D. The regex generated by the erex command can be edited and used with the rex command in a subsequent search.

Answer: D

Explanation:
The erex command in Splunk generates regular expressions based on example data. These generated regular expressions can then be edited and utilized with the rex command in subsequent searches.

NEW QUESTION # 97
What is one way to troubleshoot dashboards?

- A. Go to the Troubleshooting dashboard of me Searching and Reporting app.
- B. Run the | previous_searches command to troubleshoot your SPL queries.
- C. Delete the dashboard and start over.
- D. Create an HTML panel using tokens to verify that they are being set.

Answer: A

Explanation:
To troubleshoot dashboards in Splunk, one effective approach is to go to the Troubleshooting dashboard of the Search & Reporting app (Option B). This dashboard provides insights into the performance and potential issues of other dashboards and searches, offering a centralized place to diagnose and address problems. This method allows for a structured approach to troubleshooting, leveraging built-in tools and reports to identify and resolve issues.

NEW QUESTION # 98

......

Just imagine that if you get the SPLK-1004 certification, then getting high salary and promotion will completely have no problem.
