

# Cost Effective Hybrid-Cloud-Observability-Network-Monitoring Dumps, Hybrid-Cloud-Observability-Network-Monitoring Exam Pattern

Our Hybrid-Cloud-Observability-Network-Monitoring learning questions are famous for that they are undeniable excellent products full of benefits, so our exam materials can spruce up our own company image. Besides, our Hybrid-Cloud-Observability-Network-Monitoring study quiz is priced reasonably, so we do not overcharge you at all. Not only the office staff can buy it, the students can also afford it. Meanwhile, our Hybrid-Cloud-Observability-Network-Monitoring Exam Materials are demonstrably high effective to help you get the essence of the knowledge which was convoluted. You will get more than you can imagine by our Hybrid-Cloud-Observability-Network-Monitoring learning guide.

How to find a valid exam dumps providers which can elaborate on how to prepare you properly with more appropriate questions to pass Hybrid-Cloud-Observability-Network-Monitoring exams? Yes, here is your chance to know us. Our products are just suitable for you. Our Hybrid-Cloud-Observability-Network-Monitoring exam training dumps will help you master the real test and prepare well for your exam. If you worry about your exam, our Hybrid-Cloud-Observability-Network-Monitoring Exam Training dumps will guide you and make you well preparing, you will pass exam without any doubt.

## Hybrid-Cloud-Observability-Network-Monitoring Exam Pattern, Test Hybrid-Cloud-Observability-Network-Monitoring Dumps Pdf

All Hybrid-Cloud-Observability-Network-Monitoring online tests begin somewhere, and that is what the Hybrid-Cloud-Observability-Network-Monitoring training course will do for you: create a foundation to build on. Study guides are essentially a detailed Hybrid-Cloud-Observability-Network-Monitoring tutorial and are great introductions to new Hybrid-Cloud-Observability-Network-Monitoring training courses as you advance. The content is always relevant, and compound again to make you pass your Hybrid-Cloud-Observability-Network-Monitoring Exams on the first attempt. You will frequently find these Hybrid-Cloud-Observability-Network-Monitoring PDF files downloadable and can then archive or print them for extra reading or studying on-the-go.

## SolarWinds Hybrid Cloud Observability Network Monitoring Exam Sample

## Questions (Q36-Q41):

### NEW QUESTION # 36

It is noted in flow source view that some devices are showing "never received" in the last received flow column. It is verified that the flows are not being blocked by a firewall. What is the likely cause?

- A. a primary field of data is missing and being dropped
- B. flows are IPv6 and not supported by the network monitoring features
- C. interface is no longer monitored by the network monitoring features
- D. node is no longer monitored by the monitoring features

**Answer: D**

Explanation:

If the flow source view in SolarWinds NTA shows "never received" and firewall issues are ruled out, it is often because the device (node) is no longer monitored by SolarWinds. If a node is removed or its monitoring is disabled, the collector will not associate incoming flows from that node, resulting in "never received" status.

Reference:

"If a node is no longer monitored in SolarWinds, the NTA will not process any flows received from that node, and the flow source view will display 'never received'."

- (Network Performance Monitor Administrator Guide, NetFlow Troubleshooting and Monitoring Status section)

### NEW QUESTION # 37

The unclassified traffic in the web console has been identified as MSSQL traffic. It is known as an application mapping that hybrid cloud observability maps by default. Which two of the following reasons explain why the traffic is showing as unclassified? (Choose two.)

- A. The version of MSSQL being used is not supported.
- B. The source or the destination port field is not present.
- C. A firewall is blocking the traffic.
- D. A different port is being used.

**Answer: B,D**

### NEW QUESTION # 38

Several resources are showing duplicate flow data. What is the most likely cause?

- A. SolarWinds' NetFlow service needs to be restarted
- B. source devices are configured to export flow data on ingress and egress
- C. interfaces have duplicate entries in flow sources management
- D. interfaces in flow sources management are set to drop

**Answer: B**

### NEW QUESTION # 39

What can be done to show the description of an object ID (OID)?

- A. Update the MIB database via SolarWinds support.
- B. Download the latest OID.cfq from customer portal.
- C. Perform an SNMPwalk on the target device.
- D. Contact vendor to obtain the latest SNMPwalk.

**Answer: A**

Explanation:

In SolarWinds, the OID description is determined by the MIB database. If a particular OID description is missing or incorrect, the recommended action is to update the MIB database. This can be done by requesting the latest MIB database from SolarWinds support, which regularly releases updates to support new devices and OIDs.

Reference:

" If the description of an OID is not displayed, update the MIB database. SolarWinds support provides MIB database updates to include new device support and additional OID descriptions. "

- (NPM Administrator Guide, SNMP and MIBs section)

#### NEW QUESTION # 40

Which tool is used to establish flow alerts?

- A. create alert flows
- B. manage flow alert pane
- C. create a flow alert panel
- D. flow alert wizard

**Answer: D**

Explanation:

SolarWinds provides the flow alert wizard as the tool to configure and manage flow alerts. This wizard guides administrators through selecting the relevant flow metrics and alert thresholds.

The documentation states:

" Use the Flow Alert Wizard to define and manage alerts on flow-based data, allowing for rapid detection and notification of anomalous network activity. " References:

Network Performance Monitor Administrator Guide, " Configuring Flow Alerts with the Wizard " SolarWinds NTA Documentation

#### NEW QUESTION # 41

.....

We have always taken care to provide the best SolarWinds Hybrid-Cloud-Observability-Network-Monitoring exam dumps to our customers. That's why we offer many other benefits with our product. We provide a demo version of the real product to our customers to clear their doubts about the truthfulness and accuracy of Hybrid Cloud Observability Network Monitoring Exam (Hybrid-Cloud-Observability-Network-Monitoring) preparation material. You can try the product before you buy it.
