

# Download FCP\_FAZ\_AN-7.6 Fee & Reliable FCP\_FAZ\_AN-7.6 Test Answers

If you can own the certification means that you can do the job well in the area so you can get easy and quick promotion. The latest FCP\_FAZ\_AN-7.6 quiz torrent can directly lead you to the success of your career. Our materials can simulate real operation exam atmosphere and simulate exams. The download and install set no limits for the amount of the computers and the persons who use FCP\_FAZ\_AN-7.6 Test Prep. So we provide the best service for you as you can choose the most suitable learning methods to master the FCP\_FAZ\_AN-7.6 exam torrent. Believe us and if you purchase our product it is very worthy.

Everyone wants to stand out in such a competitive environment, but they don't know how to act. Maybe our FCP\_FAZ\_AN-7.6 exam questions can help you. Having a certificate may be something you have always dreamed of, because it can prove that you have a certain capacity. Our FCP\_FAZ\_AN-7.6 learning materials can provide you with meticulous help and help you get your certificate. Our FCP\_FAZ\_AN-7.6 training prep is credible and their quality can stand the test. Therefore, our FCP\_FAZ\_AN-7.6 practice materials can help you get a great financial return in the future and you will have a good quality of life.

## Reliable FCP\_FAZ\_AN-7.6 Test Answers & Updated FCP\_FAZ\_AN-7.6 Dumps

Our FCP\_FAZ\_AN-7.6 exam questions have a lot of advantages. First, our FCP\_FAZ\_AN-7.6 practice materials are reasonably priced with accessible prices that everyone can afford. Second, they are well-known in this line so their quality and accuracy is unquestionable that everyone trusts with confidence. Third, our FCP\_FAZ\_AN-7.6 Study Guide is highly efficient that you have great possibility pass the exam within a week based on regular practice attached with the newest information.

### Fortinet FCP - FortiAnalyzer 7.6 Analyst Sample Questions (Q64-Q69):

NEW QUESTION # 64

Exhibit.

```
FAZ # diagnose fortilogd lograte
last 5 seconds: 78.9, last 30 seconds: 132.1, last 60 seconds: 133.3

FAZ # diagnose fortilogd msgrate
last 5 seconds: 1.4, last 30 seconds: 1.6, last 60 seconds: 1.6
```

What can you conclude about the output?

- A. There are more traffic logs than event logs.
- B. The output is ADOM specific
- C. Both messages and logs are almost finished indexing.
- D. The message rate being lower that the log rate is normal.

Answer: D

Explanation:

In this output, we see two diagnostic commands executed on a FortiAnalyzer device:

\* diagnose fortilogd lograte: This command shows the rate at which logs are being processed by the FortiAnalyzer in terms of log entries per second.

\* diagnose fortilogd msgrate: This command displays the message rate, or the rate at which individual messages are being processed.

The values provided in the exhibit output show:

\* Log rate (lograte): Consistently high, showing values such as 70.0, 132.1, and 133.3 logs per second over different time intervals.

\* Message rate (msgrate): Lower values, around 1.4 to 1.6 messages per second.

Explanation:

\* Interpretation of log rate vs. message rate: In FortiAnalyzer, the log rate typically refers to the rate of logs being stored or indexed, while the message rate refers to individual messages within these logs.

Given that a single log entry can contain multiple messages, it's common to see a lower message rate relative to the log rate.

\* Understanding normal operation: In this case, the message rate being lower than the log rate is expected and typical behavior. This discrepancy can arise because each log entry may bundle multiple related messages, reducing the message rate relative to the log rate.

Conclusion

\* Correct Answer: A. The message rate being lower than the log rate is normal.

\* This aligns with the normal operational behavior of FortiAnalyzer in processing logs and messages.

There is no indication that both logs and messages are nearly finished indexing, as that would typically show diminishing rates toward zero, which is not the case here. Additionally, there's no information in this output about specific ADOMs or a comparison between traffic logs and event logs. Thus, options B, C, and D are incorrect.

## NEW QUESTION # 65

Which log will generate an event with the status Unhandled?

- A. A WebFilter log with action=dropped.
- B. An AppControl log with action=blocked.
- C. An AV log with action=quarantine.
- D. An IPS log with action=pass.

**Answer: D**

Explanation:

In FortiOS 7.4.1 and FortiAnalyzer 7.4.1, the "Unhandled" status in logs typically signifies that the FortiGate encountered a security event but did not take any specific action to block or alter it. This usually occurs in the context of Intrusion Prevention System (IPS) logs.

\* IPS logs with action=pass: When the IPS engine inspects traffic and determines that it does not match any known attack signatures or violate any configured policies, it assigns the action "pass". Since no action is taken to block or modify this traffic, the status is logged as "Unhandled." Let's look at why the other options are incorrect:

\* An AV log with action=quarantine: Antivirus (AV) logs with the action "quarantine" indicate that a file was detected as malicious and moved to quarantine. This is a definitive action, so the status wouldn't be "Unhandled."

\* A WebFilter log with action=dropped: WebFilter logs with the action "dropped" indicate that web traffic was blocked according to the configured web filtering policies. Again, this is a specific action taken, not an "Unhandled" event.

\* An AppControl log with action=blocked: Application Control logs with the action "blocked" mean that an application was denied access based on the defined application control rules. This is also a clear action, not "Unhandled."

## NEW QUESTION # 66

It is a best practice to upload FortiAnalyzer local logs to a remote server. Which three remote servers are supported for the upload? (Choose three.)

- A. FTP
- B. SCP
- C. UDP
- D. SFTP
- E. TCP

**Answer: A,B,D**

**NEW QUESTION # 67**

You need to move reports between two ADOMs.

Which two statements are true? (Choose two.)

- A. The data and time will be appointed to the original report name to avoid conflicts.
- **B. All charts and datasets associated with the report will be imported together.**
- C. You need to convert the reports into templates first.
- **D. The ADOMs must be compatible types.**

**Answer: B,D**

**NEW QUESTION # 68**

Which two FortiAnalyzer features allow you to automatically build a dataset and chart based on a filtered search result? (Choose two.)

- **A. Chart Builder**
- B. Custom View
- C. Dataset Library
- **D. Export to Report Chart (FortiView)**

**Answer: A,D**
