Workload analytics on Azure

- **Date processing and ingestion on Azure** – main topics within this subdomain include data loading common practices, Azure Data Factory components (activities, pipeline, etc.), and data processing
- **Data visualization in Microsoft Power BI** – this topic requires candidates to learn more about paginated reporting, dashboards, interactive reports, as well as workflow in Power BI.
- **Elements of a modern data warehouse** – this sub-section is focused on Azure data services related to modern data warehousing. In addition, applicants should be familiar with modern data warehousing workload and architecture.
- **Analytics workloads** – under this topic, candidates should learn more about transactional workloads as well as data warehousing workloads. Also, they have to get skilled in differentiating between an analytics and a transactional workload, know the difference between real and batch time, and be able to determining when a data warehouse solution is required.
