New Deep-Security-Professional Valid Test Tutorial | Efficient Trend Test Deep-Security-Professional Questions Answers: Trend Micro Certified Professional for Deep Security

The (Deep-Security-Professional exam offered by Trend is regarded as one of the most promising certification exams in the field of. The Deep-Security-Professional preparation products available here are provided in line with latest changes and updates in Deep-Security-Professional syllabus. The Trend Deep-Security-Professional undergo several changes which are regularly accommodated to keep our customers well-informed. We have the complete list of Popular Deep-Security-Professional Exams. Now you can simply choose your Deep-Security-Professional exam from the list and be directed right to its page where you can find links to download Deep-Security-Professional exams.

Trend Micro Certified Professional for Deep Security Sample Questions (Q70-Q75):

NEW QUESTION # 70
Which of the following statements correctly identifies the purpose of the Integrity Monitoring Protection Module?

- A. The Integrity Monitoring Protection Module monitors traffic to verify the integrity of incoming traffic to identify protocol deviations, packets fragments and other protocol anomalies.
- B. The Integrity Monitoring Protection Module monitors incoming traffic to confirm the integrity of header information including packet source and destination details.
- C. The Integrity Monitoring Protection Module monitors and analyzes the integrity of application logs to identify tampering, corruption and other suspicious modifications to the logs.
- D. The Integrity Monitoring Protection Module monitors critical operating system objects such as services, processes, registry keys and ports to detect and report malicious or unexpected changes.

Answer: D

Explanation:
The Integrity Monitoring module is designed to watch over key OS objects-such as files, registry keys, processes, and ports-and detect/report unauthorized or unexpected changes for compliance and security auditing.

NEW QUESTION # 71
What is the purpose of the override.properties file?

- A. This file allows properties to be tested on Deep Security Manager without affecting the original configuration.
- B. This file contains the original out-of-the-box configuration properties for Deep Security Manager. This file is renamed to dsm.properties upon initialization of Deep Security Manager.
- C. This file allows Deep Security Agents to override enforced behavior by providing new policy configuration details.
- D. This file is used to transfer policy settings from one installation of Deep Security Man-ager to another

Answer: A

Explanation:
The properties specified in this configuration file override the properties specified in the dsm.properties file. This file can be created manually by a support engineer to modify product be-havior without affecting the original configuration.
Explication: Study Guide - page (42)

NEW QUESTION # 72
Which of the following statements is true regarding Deep Security Manager-todatabase com-munication?

- A. Deep Security Manager-to-database traffic is encrypted by default, but can be disabled by modifying settings in the dsm.properties file.
- B. Deep Security Manager-to-database traffic is not encrypted by default, but can be en-abled by modifying settings in the dsm.properties file.

- C. Deep Security Manager-to-database traffic is not encrypted by default, but can be en-abled by modifying settings in the ssl.properties file.
- D. Deep Security Manager-to-database traffic is encrypted by default but can be disabled by modifying settings in the db.properties file.

Answer: B

Explanation:
By default, Manager-to-database traffic is NOT encrypted. To enable encrypted communication (SSL/TLS), you must modify the dsm.properties file and configure the JDBC connection to use SSL.
Option A is incorrect; configuration is not in ssl.properties.
Option B and C are incorrect; traffic is not encrypted by default.

NEW QUESTION # 73
Your organization would like to implement a mechanism to alert administrators when files on a protected servers are modified or tampered with. Which Deep Security Protection Module should you enable to provide this functionality?

- A. The Integrity Monitoring Protection Module
- B. The Intrusion Prevention Protection Module
- C. Deep Security can not provide this type of functionality
- D. The File Inspection Protection Module

Answer: A

NEW QUESTION # 74
Which of the following correctly describes the Firewall rule Action of Force Allow?

- A. Force Allow permits traffic that would otherwise be denied by other Firewall rules to pass, but still enforces filtering by the Intrusion Prevention Protection Module.
- B. Force Allow permits traffic to bypass analysis by all Deep Security Protection Modules.
- C. Force Allow explicitly allows traffic that matches the Firewall rule to pass, and implicitly denies all other traffic.
- D. Force Allow permits traffic to bypass analysis by both the Firewall and Intrusion Pre-vention Protection Modules.

Answer: A

Explanation:
Force Allow permits the matching traffic through the firewall, even if other firewall rules would block it.
However, traffic is still subject to analysis and filtering by the Intrusion Prevention (IPS) module.
From the official documentation:
"Force Allow: Permits traffic through the firewall that would otherwise be blocked, but the traffic will still be analyzed by the Intrusion Prevention module and other relevant protection modules." References:
